

OMB Control No: 0955–0019) to reflect progress made and ongoing efforts in areas including public health, TEFCAs, and information blocking to ensure alignment with current priorities such as improving public health interoperability and Make Health Tech Great Again. These updates were developed in consultation with subject matter experts (SMEs) to improve the

relevance, clarity, and usefulness of the data collected in all five key areas of the survey. For example, certain questions with low response rates and have lower relevance to current priorities have been removed or reorganized. Some question and response wording have also been updated to ensure consistency with current policy efforts. For example, in the TEFCAs section, the list of Qualified

Health Information Networks (QHINs) have been updated to reflect the current list. These changes are intended to reduce respondent burden and improve overall data quality while maintaining continuity with prior surveys where appropriate.

This is a 3-year request for OMB approval.

ANNUALIZED BURDEN HOUR TABLE

Forms (if necessary)	Respondents (if necessary)	Number of respondents	Number of responses per respondents	Average burden per response (hours)	Total burden hours
	U.S. based public and private HIOs	100	1	0.75	75
Total	75

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate.
