[Docket No. CP03–75–000]

Freeport LNG Development, L.P.;
Notice of Motion To Vacate Certificate
in Part

Take notice that on April 6, 2026, Freeport LNG Development, L.P. (Freeport LNG), 333 Clay Street, Suite 5050, Houston, Texas 77002, filed in the above-referenced docket a motion to partially vacate certain authorizations granted by the Commission on June 18, 2004, and further amended in 2005 and 2009.¹ In the Certificate Order, the Commission granted Freeport LNG authorization to construct, own, and operate a liquefied natural gas (LNG) import terminal located on Quintana Island in Brazoria County, Texas. The proposal involves the decommissioning, disconnection, and removal of certain regasification facilities that are no longer in use.

In its motion, Freeport LNG states that it has operated the terminal exclusively for liquefaction and export purposes for more than a decade, and that it no longer utilizes certain regasification facilities authorized in the Certificate Order. Freeport LNG states that it has constructed and continues to operate the remaining facilities but seeks to remove the obsolete regasification facilities. Freeport LNG explains that these facilities are not necessary to support current operations but will continue to support the terminal's safe and efficient operation through their removal. Freeport LNG explains that removal of these facilities will enhance safety and operational efficiency by reducing maintenance of non-operational assets and allowing personnel to focus on active systems. Therefore, Freeport LNG requests that the Commission terminate the portion of the authorization for the project that authorizes the regasification facilities.
