

permit segments, totaling 0.15 miles (804 feet) in length, are in Class 2 locations.

TGT SPL 20–1TT delivers un-odorized natural gas to a power plant. Odorizing the gas will adversely impact the performance and efficiency of the power plant. To avoid these impacts,

TGT asks PHMSA to waive the requirement of 49 CFR 192.625(b), which requires the odorization of a combustible gas in a transmission line in a Class 3 location so that a concentration in air of one-fifth of the lower explosive limit is readily

detectable by a person with a normal sense of smell.

The draft conditions were preliminarily determined to ensure that the special permit is not inconsistent with pipeline safety. The requested special permit segments are as follows:

Operator SPS No.	County, state	Class location	Outside diameter (inches)	Line name	Length (feet)	Year installed
1	DeSoto, MS	3	16	SPL 20–1TT	1,089	2002

PHMSA has incorporated and implemented the following categorical exclusion (CE) into its procedures:

1. *Granting, renewing, or denying a special permit related to waiving class location or odorization requirements, following the procedures set forth in 49 CFR 190.341, including the identification of any enforceable conditions, imposed pursuant to 49 CFR 190.341(d)(2), that are required to prevent and address pipeline safety and environmental risk (DOT 5610.1D).*

Environmental Protection Specialists from PHMSA independently reviewed the special permit request for compliance with the National Environmental Policy Act (NEPA). Based on the scope of the action, PHMSA has further determined there are no extraordinary circumstances that would preclude application of the CE to this special permit. To ensure continued human and environmental safety, the operator must fulfill the conditions of the special permit; continue to employ good operating practices; and continue to follow any additional applicable permitting requirements, State laws, or Federal requirements related to environmental protection. Should conditions change, or should extraordinary circumstances materialize, the operator must contact PHMSA for reevaluation. The proposed action is hereby categorically excluded from further NEPA review. The final CE will be published at <https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures>.

The special permit request, draft proposed special permit with conditions, and CE for the above-described TGT pipeline segments are available for review and public comment in Docket No. PHMSA–2026–0067. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data to be considered.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. PHMSA will consider each relevant comment it receives in making its decision to grant or deny this special permit request.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Linda Daugherty,
Acting Associate Administrator for Pipeline Safety.

Title: Assessment of Fees.

OMB Control No.: 1557–0223.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Description: The OCC is requesting comment on its proposed extension, without change, of the information collection titled, “Assessment of Fees.” The OCC is authorized by the National Bank Act (for national banks and Federal branches and agencies) and the Home Owners’ Loan Act (for Federal savings associations) to collect assessments, fees, and other charges as necessary or appropriate to carry out the responsibilities of the OCC. 12 U.S.C. 16, 481, 482 and 1467. The OCC requires independent credit card national banks and independent credit card Federal savings associations (collectively, independent credit card institutions) to pay an additional assessment based on receivables attributable to accounts owned by the national bank or Federal savings association. 12 CFR 8.2(c). Independent credit card institutions are national banks or Federal savings associations that engage primarily in credit card operations and are not affiliated with a full-service national bank or full-service Federal savings association. 12 CFR 8.2(c)(3)(vi) and (vii). Under 12 CFR 8.2(c)(2), the OCC also has the authority to assess an independent credit card institution that is affiliated with a full-service national bank or full-service Federal savings association if the OCC concludes that the affiliation is intended to evade the requirements of 12 CFR part 8. The OCC requires independent credit card institutions to report receivables attributable data to the OCC semiannually or at a time specified by the OCC. 12 CFR 8.2(c)(4). “Receivables attributable” are the total amount of outstanding balances due on credit card accounts owned by independent credit card institutions (the receivables attributable to those accounts) on the last day of an assessment period minus receivables retained on the national bank or Federal savings association’s balance sheet as of that day. 12 CFR 8.2(c)(3)(viii). The OCC uses the information to calculate the assessment for each independent credit card institution and adjust the assessment rate for independent credit card institutions over time.
