Ampersand Gilman Hydro LP; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Gilman Hydroelectric Project No. 2392. The existing 4.95-megawatt (MW) project is located on the Connecticut River and straddles the Village of Gilman, within the Town of Lunenburg,

Essex County, Vermont, and the Town of Dalton, Coos County, New Hampshire. The project does not occupy any federal lands. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link.
