NUCLEAR REGULATORY COMMISSION

[NRC-2026-2113]

Monthly Notices: Applications and Amendments to Licenses Involving No Significant Hazards Considerations; Revised Schedule and Title Change

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is notifying the public of its revised schedule and title change for Monthly Notices of Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations.

DATES: The revised schedule and title change described in this document takes effect on May 12, 2026.

ADDRESSES: Please refer to Docket ID NRC-2026-2113 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2026-2113. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301-415-1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin ADAMS Public Search." For problems with ADAMS, please contact

the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. SUPPLEMENTARY INFORMATION: Section 189a.(2)(A) of the Atomic Energy Act of 1954, as amended (the Act), grants the Commission the authority to issue and make immediately effective any amendment to an operating license or any amendment to a combined construction and operating license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person. Section 189a.(2)(B) of the Act, as amended, requires that the Commission periodically (but not less frequently than once every 30 days) publish notice of any amendments issued, or proposed to be issued pursuant to section 189a.(2)(A). To fulfill this requirement, the NRC periodically issues a document entitled, "Monthly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations," in the **Federal Register**.

Instead of publishing monthly notices every 28 days, the NRC will publish a notice approximately every 2 weeks (every 14 days). The new title for this publication will be "Biweekly Notice; Applications and Amendments to Licenses Involving No Significant Hazards Considerations." The modification to the publication schedule is intended to better align with the guidance outlined in Executive Order 14300, "Reform of the Nuclear Regulatory Commission" issued on May 23, 2025.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: April 27, 2026.

For the Nuclear Regulatory Commission.

Hipólito González,

Acting Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC received a subsequent license renewal application (SLRA) from Constellation Energy Generation, LLC, dated March 25, 2026, requesting subsequent renewal of Renewed Facility Operating License No. DPR-63, which authorizes Constellation Energy Generation, LLC to operate NMP1 up to 1,850 megawatts thermal. NMP1 is located in Oswego County, New York. Constellation Energy Generation, LLC submitted the SLRA pursuant to part 54 of title 10 of the *Code of Federal Regulations* (10 CFR), “Requirements for Renewal of Operating Licenses for

Nuclear Power Plants.” A notice of receipt of the SLRA was published in the **Federal Register** on April 15, 2026 (91 FR 20183).

The NRC staff has determined that Constellation Energy Generation, LLC has submitted sufficient information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, 51.45, and 51.53(c) to enable the staff to undertake a review of the SLRA and that, therefore, the SLRA is acceptable for docketing. The current docket number, 50-220, for Renewed Facility Operating License No. DPR-63 will be retained. The determination to accept the SLRA for docketing does not constitute a determination that a subsequent renewed license should be issued and does not preclude the NRC staff from requesting additional information as the review proceeds.

Before issuance of the requested subsequent renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. In accordance with 10 CFR 54.29, the NRC may issue a subsequent renewed license on the basis of its review if it finds that actions have been identified and have been or will be taken with respect to: (1) managing the effects of aging during the period of extended operation on the functionality of structures and components that have been identified as requiring aging management review; and (2) time-limited aging analyses that have been identified as requiring review, such that there is reasonable assurance that the activities authorized by the subsequent renewed license will continue to be conducted in accordance with the current licensing basis and that any changes made to the plant's current licensing basis will comply with the Act and the Commission's regulations.

The NRC staff will also complete an environmental review of the SLRA and will document its findings in accordance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Commission's regulations in 10 CFR part 51, “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions.” The staff will prepare an environmental assessment that will be used to determine whether an environmental impact statement is necessary, or a finding of no significant impact is warranted to satisfy the NRC's NEPA obligations. In considering the SLRA, 10 CFR 54.29 requires that the Commission must find that the applicable requirements of subpart A of 10 CFR part 51 have been satisfied and that any matters raised under 10 CFR 2.335, “Consideration of Commission
