

clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: NIH Office of Intramural Training & Education—Application, Registration, and Alumni Systems, 0925–0299, exp., date, 03/31/2027, REVISION, Office of Intramural Training & Education (OITE), Office of Intramural Research (OIR), Office of the Director (OD), National Institutes of Health (NIH).

Need and Use of Information Collection: The Office of Intramural Training & Education (OITE) administers a variety of programs and initiatives to recruit pre-college through post-doctoral educational level individuals into the National Institutes of Health Intramural Research Program (NIH-IRP) to facilitate their development into future biomedical scientists. The proposed information

collection is necessary to assess the eligibility and quality of potential awardees for traineeships in these programs.

The OITE collection systems use templates that have features that may be enabled based on that particular program need, this includes the following categories: number of recommendation letters, financial need statement, NIH campus location, etc. In addition, these templates allow for program specific labeling and directions to ensure each collection form is tailored for a specific training program, including but not limited to: Summer Internship Program (SIP), Postbaccalaureate Program (PBP), Graduate Partnerships Program (GPP), Undergraduate Scholarship Program (UGSP), and Fellows Award for Research Excellence (FARE).

The collection forms solicit the following information categories: personal information, eligibility criteria, contact information, university-assigned student identification number, training program selection, scientific discipline

interests, educational level, educational history, reference information, resume components, employment history, employment interests, research abstract, personal statement, letters of recommendation, financial aid need, and sensitive data. Additional collection forms are designed to collect information relevant to on-boarding paperwork, event registrations, off-boarding paperwork, interview experience feedback, and training program experience feedback. Sensitive data collected on the applicants: race/ethnicity, sex, relatives at NIH, and recruitment method, are made available only to select OITE staff members or in aggregate form to select NIH offices; no sensitive information is provided to the admission committees for admission consideration.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 14,311.

Description of the Need for the Information and Proposed Use: Public housing agencies (PHA) apply for funding to assist very low-income families to lease or purchase housing. PHAs maintain records on participant eligibility, unit acceptability, lease and housing assistance payments, and budget and payment documentation. PHAs may also project-base a portion of their vouchers or use their vouchers under the Homeownership Option. The Tribal HUD-VASH program provides rental assistance and supportive services to Native American veterans who are Homeless or At Risk of Homelessness living on or near a reservation or other Indian areas.

The Housing Choice Voucher (HCV) Program is the federal government's major program for assisting low-income families, the elderly, and individuals with disabilities to afford decent, safe, and sanitary housing in the private market. Since housing assistance is provided on behalf of the family or
