**SUPPLEMENTARY INFORMATION:**

*Title:* Part 150, Position Limits, (OMB Control No. 3038-0013). This is a request for extension of a currently approved information collection.

*Abstract:* Commodity Exchange Act ("CEA") section 4a directs the Commission to establish limits on speculative positions, as the Commission determines to be necessary, to prevent the harms caused by excessive speculation. This Position Limits collection of information (OMB Control No. 3038-0013) includes collections of information required under both the Final Rule and the Aggregation Rule (as each Rule is defined below).

In 2021, the Commission issued a final rule on position limits that implemented CEA section 4a and established the Commission's new position limits regime found in part 150 of the Commission's Regulations ("Final Rule").<sup>1</sup> The Final Rule, among other things, included: new and amended Federal spot-month limits for the 25 core referenced futures contracts; (2) amended Federal non-spot limits for the nine legacy agricultural contracts subject to existing Federal position limits; (3) amended rules governing exchange-set limit levels and grants of exemptions therefrom; (4) an amended process for requesting certain spread exemptions and non-enumerated bona fide hedge recognitions for purposes of Federal position limits directly from the Commission; (5) a new streamlined process for recognizing non-enumerated bona fide hedge positions from Federal limit requirements; and (6) amendments to part 19 of the Commission's Regulations and related provisions that eliminated certain reporting obligations that require traders to submit a Form 204 and Parts I and II of Form 304.

Separately, in 2016 the Commission issued a final rule amending Commission Regulation 150.4, which sets forth requirements regarding the aggregation of positions subject to federal position limits (the "Aggregation Rule").<sup>2</sup> Among other things, Regulation

<sup>1</sup> See "Position Limits for Derivatives," 86 FR 3236 (Jan. 24, 2021).

<sup>2</sup> See "Aggregation of Positions," 81 FR 91454 (Dec. 16, 2016). The position aggregation

150.4 includes standards for the aggregation of accounts and procedures for seeking an exemption from position aggregation requirements under the Commission's federal position limits.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.<sup>3</sup> On February 2, 2026, the Commission published in the **Federal Register** notice of the proposed extension of this information collection and provided 60 days for public comment on the proposed extension, 91 FR 4507 ("60-Day Notice"). The Commission did not receive any relevant comments on the 60-Day Notice.

*Burden Statement:* The Commission anticipates that there will continue to be approximately 776 respondents and the hourly burden will remain the same as provided in the 60-Day Notice. The respondent burden for this collection is estimated to be as follows:

*Estimated number of respondents:* 776.

*Estimated average burden hours per respondent:* 15.14 hours.

*Estimated total annual burden hours for all respondents:* 11,748 hours.

*Frequency of Collection:* As needed.

There are no capital costs or operating and maintenance costs associated with this collection.

(Authority: 44 U.S.C. 3501 *et seq.*)

Dated: April 29, 2026.

**DATES:** The NOI to prepare an EIS published in the **Federal Register** on July 9, 2024 (89 FR 56348) is withdrawn as of May 1, 2026.

**ADDRESSES:** U.S. Army Corps of Engineers, Norfolk District, 803 Front Street, Norfolk, Virginia 23510.

**SUPPLEMENTARY INFORMATION:** The Collier County CSRSM Study was initiated to investigate the feasibility of addressing storm and flood risks to vulnerable populations, property, infrastructure, and ecosystems along coastlines in Collier County, and develop and evaluate various alternatives aimed at managing those risks and increasing coastal resiliency against storm surge. Alternatives were formulated to address the full study scope in 2023. The time and cost to collect data and perform complex modeling required to properly identify a cost effective, viable solution led USACE to determine that current federal funding was insufficient to complete the analysis. USACE is therefore terminating this study and the preparation of the associated EIS, which was initiated by a NOI to Prepare an EIS in the **Federal Register** on July 9, 2024 (89 FR 56348).
