

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Nothing in the proposal imposes any burden on the ability of customers or other exchanges to compete. The Exchange operates in a highly competitive market in which exchanges and other vendors offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Extending the designated time for terminating the dedicated GPS antenna services and for removal of all dedicated GPS antennas, as proposed, will not cause any burden on inter-market competition. Additionally, there is no burden to intra-market competition because the dedicated GPS antenna service is ultimately being terminated for all customers. The Exchange is merely proposing to further extend the designated time for the termination of the dedicated GPS service and removal of all dedicated GPS antennas and to provide at least 10 business days advance notice of the specific retirement date via emails to Customer Portal Accounts, which would provide all customers with the same timeline for terminating or converting to the shared GPS antenna service on a non-discriminatory basis. Continuing with the service until the announced retirement date, however, is voluntary, and customers are free to terminate their dedicated GPS antenna service at any time before the announced retirement date. Use of any co-location service is completely voluntary, and each market participant can determine whether to use co-location services based on the requirements of its business operations.

The purpose of this proposal is to further extend the designated date for termination of the GPS dedicated antenna service (and removal of all dedicated GPS antennas) beyond April 30, 2026, as previously scheduled, and to inform the Commission and market participants of that change. The Exchange anticipates retiring the dedicated GPS antenna service by the end of May 2026, and proposes to announce the specific retirement date in an email to Customer Portal Accounts at least 10 business days in advance of retiring the service. The removal of the Exchange's dedicated GPS antenna service under Rule General 8, Section 1(d) was proposed in a previous rule

filing that was submitted to the SEC,¹⁷ and the Exchange is not proposing in this filing any changes to that filing other than to further modify the designated date for the termination of the dedicated GPS antenna service and associated fee and the removal of all dedicated GPS antennas. The Exchange is further extending that termination date and implementing a notice-based approach in light of unanticipated delays in migrating existing customers off of the dedicated GPS antenna service, and in order to provide customers who have opted for the shared GPS antenna service with sufficient time to complete the migration before termination of their dedicated GPS antenna service takes effect. As discussed above, continuation of that service until the announced retirement date is voluntary, and customers are free to terminate their dedicated GPS antenna service at any time before the announced retirement date.
