##### Background

FMCSA's primary mission is to reduce crashes, injuries, and fatalities involving large trucks and buses. The Secretary of Transportation has delegated to FMCSA its responsibility under 49 U.S.C. 31136 and 31502 to prescribe regulations that ensure CMVs are operated safely. As part of this mission, the Agency's Medical Programs Division works to ensure that CMV drivers engaged in interstate commerce are physically qualified and able to safely perform their work.

The public interest in, and right to have, safe highways requires the assurance that drivers of CMVs can safely perform the increased physical and mental demands of their duties. FMCSA's physical qualification standards provide this assurance by requiring drivers to be examined and medically certified as physically and mentally qualified to drive.

The purpose of this voluntary IC is to assist the ME in determining if the driver is medically qualified under 49 Code of Federal Regulations (CFR) 391.41 and to ensure that there are no

disqualifying medical conditions that could adversely affect their safe driving ability or cause incapacitation constituting a risk to the public. Under 49 CFR 391.41(b)(12), a person is physically qualified to drive a CMV if that person does not use any drug or substance identified in 21 CFR 1308.11 Schedule I, an amphetamine, a narcotic, or other habit-forming drug; and does not use any non-Schedule I drug or substance that is identified in the other Schedules in 21 CFR part 1308 except when the use is prescribed by a *licensed medical practitioner*, as defined in 49 CFR 382.107, who is familiar with the driver's medical history and has advised the driver that the substance will not adversely affect the driver's ability to safely operate a CMV.

The use of this IC is at the discretion of the ME and facilitates communication with treating healthcare professionals who are responsible for prescribing certain medications so that the ME fully understands the reasons the medications have been prescribed. This information assists the ME in determining whether the underlying medical condition and the prescribed medication will impact the driver's safe operation of a CMV. Therefore, there is no required collection frequency.

The "391.41 CMV Driver Medication Form, MCSA-5895," may be downloaded from the FMCSA website. Prescribing healthcare providers are also able to either fax or scan and email the report to the certified ME. Consistent with OMB's commitment to minimizing respondents' recordkeeping and paperwork burdens and the increased use of secure electronic modes of communication, the Agency believes that approximately 50 percent of the "391.41 CMV Driver Medication Forms, MCSA-5895," are transmitted electronically.

The information collected from the "391.41 CMV Driver Medication Form, MCSA-5895," is used by the certified ME that requested the completion of the form. The "391.41 CMV Driver Medication Form, MCSA-5895," is attached to the "Medical Examination Report Form, MCSA-5875," which becomes part of the CMV driver's record maintained by the certified ME. The information is not available to the public. The Federal Motor Carrier Safety Regulations covering driver physical qualification records are found at 49 CFR 391.43, which specify that a medical examination must be performed on CMV drivers subject to part 391 who operate in interstate commerce. The results of the examination must be recorded in accordance with the requirements set forth in that section.

MEs are required to maintain records of the CMV driver medical examinations they conduct.
