POLICY JUSTIFICATION

(U) Singapore—Guided Multiple Launch Rocket System-Alternative Warhead

(U) The Government of Singapore has requested to buy forty-five (45) pods of M30A2 guided multiple launch rocket system-alternative. The following non-major defense equipment items will also be included: telemetry kits; engineering services; technical assistance; and other related elements of logistics and program support. The estimated total cost is \$83.14 million.

(U) This proposed sale will enhance the foreign policy and national security objectives of the United States by improving the security of a strategic partner that is an important force for political stability and economic progress in Asia.

(U) The proposed sale will improve Singapore’s defensive capability to guard against hostile aggression and shield the allies who train and operate within their borders and improve its ability to defend its territorial integrity and deter regional threats, thereby increasing regional stability. Singapore will have no difficulty absorbing these articles and services into its armed forces.

(U) The proposed sale of this equipment and support will not alter the basic military balance in the region.

(U) The principal contractor(s) will be selected through competitive

procurements conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

(U) Implementation of this proposed sale will require the assignment of two (2) additional U.S. Government and two (2) contractor representatives to Singapore, as required, for a duration of ten (10) days to provide engineering and technical support services as well as program and technical reviews.

(U) There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 26–24

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. (U) The M30A2 guided multiple launch rocket system-alternative warhead (GMLRS-AW) is a program of record for the U.S. Department of War. The M30A2 GMLRS-AW shares a greater than 90% commonality with the M31A1 guided multiple launch rocket system-unitary (GMLRS-U). The primary difference between the GMLRS-U and GMLRS-AW is the replacement of the GMLRS-U’s high explosive warhead with a 200-pound fragmentation warhead of pre-formed tungsten penetrators, which is optimized for effectiveness against large area and imprecisely located targets. The munitions otherwise share a common motor, global positioning system and precise positioning service (GPS/PPS)-aided inertial guidance provided by selective availability anti-spoofing module or M-Code, control system, fusing mechanism, multi-option height of burst capability, and an effective range between 15 and 70 kilometers.

2. (U) The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. (U) If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. (U) A determination has been made that Singapore can provide substantially

the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. (U) All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Singapore.

POLICY JUSTIFICATION

Kuwait—Lower Tier Air and Missile Defense Sensor Radars

The Government of Kuwait has requested to buy up to eight (8) Lower Tier Air and Missile Defense Sensor (LTAMDS) radars; five (5) Large Tactical Power Systems; and eight (8) frequency converters (1 per tactical site and 1 per central maintenance facility; 2 spares). The following non-major defense equipment items will also be included: identification, friend or foe KIV-77 encryptor; AN/PYQ-10 simple key loaders; ancillary devices to support controlled cryptographic items; LTAMDS emulators (simulators); heavy expanded mobility tactical truck M983A4 light equipment transporter modified high temp kit; battery maintenance center (BMC) shelters; sets tools and test equipment; small repair parts trailer (SRPT); prime mover—BMC

shelters/SRPT; fielding and follow-on support field service representative (FSR); prime mover FSR support; technical assistance field team; spares; publications; personnel training and training equipment; software development; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$8 billion.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a major non-NATO ally that has been an important force for political stability and economic progress in the Middle East.

The proposed sale will improve Kuwait's capability to meet current and future threats by providing advanced air defense detection as part of procurement of the LTAMDS radar system and thereby enhancing its air defense capability. This enhanced capability will protect Kuwait and local allied land forces and will significantly improve Kuwait's contribution to Integrated Air Missile Defense. Kuwait will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require the assignment of twelve (12) U.S. Government and twelve (12) contractor representatives to Kuwait for a duration up to twenty (20) years to support maintenance and sustain operations.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 26-34

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Lower Tier Air and Missile Defense Sensor (LTAMDS) radar is a system designed to counter advanced threats such as hypersonic, drones, and cruise missiles. Featuring a 360-degree surveillance capability with three

antenna arrays (one in front and two in back), the system is intended to replace the Patriot radar and integrate into the U.S. Army's Integrated Air and Missile Defense System.

2. The Large Tactical Power System is a military program providing tactical electric power for the Department of War, featuring dual 500 kW generators in both skid-mounted and trailer-mounted configuration. These systems are designed for a large-scale power need in tactical environments, aiming to increase mission endurance, reach, and survivability.

3. The frequency converters change the frequency of an alternating current (AC) to a different frequency, either higher or lower, for applications such as controlling motor speed or running equipment designed for a different power standard. It works by first converting the incoming AC power to direct current (DC), then using an inverter to convert the DC back into AC at the desired frequency and voltage.

4. The identification, friend or foe KIV-77 encryptors is a combat identification system designed for command and control. It uses a transponder that listens to an interrogation signal and sends a response that identifies the broadcaster.

5. The AN/PYQ-10 simple key loader is an advanced secure cryptographic device, enabling safe distribution and storage of communication security keys.

6. The Global Positioning System Precise Positioning Service Selective Availability Anti-Spoofing Module (GPS PPS SAASM) is embedded within the LTAMDS radar. The GPS PPS SAASM is a secure, encrypted navigation system providing users with highly accurate position, navigation, and timing data.

7. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

8. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

9. A determination has been made that Kuwait can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

10. All defense articles and services listed in this transmittal have been

authorized for release and export to the Government of Kuwait.

Transmittal No. 26-21

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Belgium

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$	0 million
Other	\$156.1 million	

TOTAL \$156.1 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* Foreign Military Sales case BE-B-WDQ was below congressional notification threshold at \$86.95 million (\$0 in major defense equipment (MDE)) and included AN/PRC-117G radios; AN/PRC-152A radios; AN-PRC-160 radios; AN/PRC-158 radios; and AN/PRC-163 radios. The Government of Belgium has requested that the case be amended to include additional non-MDE items. This amendment will cause the case to exceed the notification threshold, and thus notification of the entire program is required. The above notification requirements are combined as follows:

Major Defense Equipment (MDE):

None

Non-Major Defense Equipment:

The following non-MDE items will be included: AN/PRC-117G radios; AN/PRC-152A radios; AN-PRC-160 radios; AN/PRC-158 radios; AN/PRC-163 radios, AN/PRC-167 radios; KIK-11 tactical key loader, AN/PRC-117G accessories, dismount kit, vehicular integration, and batteries; AN/PRC-152A accessories, dismount kit, and vehicular integration; AN/PRC-158 accessories, dismount kit, vehicular integration, and training; AN/PRC-160 accessories, dismount kit, vehicular integration, batteries, and training; AN/PRC-163 ancillaries, batteries, and dismount accessories; AN/PRC-167 ancillaries, batteries, and dismount accessories; RF-9820S radio and dismount accessories; radio specific audio, power, and configuration accessories; U.S. Government and contractor technical engineering, logistics, and personnel services; and other related elements of logistics and program support.

(iv) *Military Department:* Army (BE-B-WDQ)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* March 24, 2026

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Belgium—Communications Equipment

The Government of Belgium has requested to buy additional AN/PRC-163 radios; AN/PRC-167 radios; AN/PRC-160 radios; AN/PRC-117G radios; AN/PRC 152A radios; AN/PRC 158 radios; KIK-11 tactical key loader, AN/PRC-117G accessories, dismount kit, vehicular integration, and batteries; AN/PRC-152A accessories, dismount kit, and vehicular integration; AN/PRC-158 accessories, dismount kit, vehicular integration, batteries, and training; AN/PRC-163 ancillaries, batteries, and dismount accessories; AN/PRC-167 ancillaries, batteries, and dismount accessories; RF-9820S radio and dismount accessories; radio specific audio, power, and configuration accessories; U.S. Government and

contractor technical engineering, logistics, and personnel services; and other related elements of logistics and program support that will be added to a previously implemented case whose value was under the congressional notification threshold. The original Foreign Military Sales case, valued at \$86.95 million, included the following non-major defense equipment items: AN/PRC-117G radios; AN/PRC-152A radios; AN-PRC-160 radios; AN/PRC-158 radios; and AN/PRC-163 radios. The estimated total cost is \$156.1 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO Ally which is an important force for political stability and economic progress in Europe.

The proposed sale will enable the Belgium Army to communicate across moderate to extended distances using encryption that prevents interception. The proposed sale will support its goal of improving national and territorial defense, as well as interoperability with U.S. and NATO forces. Belgium will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be L3 Harris, located in Melbourne, FL. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Belgium.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
