

circumstances in 43 CFR 46.215 do not apply. Reasonably foreseeable effects encompass effects of implementation of the action including effects of the action in addition to other past, present, and reasonably foreseeable future effects.

Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that may qualify for application of a categorical exclusion (516 DM 8.5(C)(2)) pursuant to NEPA, the DOI's NEPA regulations, and the DOI DM. A low-effect ITP is one that would result in (1) negligible or minor individual or cumulative effects on species covered in the HCP; (2) no significant effect on the human environment; and (3) reasonably foreseeable effects that would not result in significant effects to the human environment.

#### Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER21381462 to FLLWCC, LLC/FLOW CC, LLC (Oakwood & Lake Wales Country Club (Vintage)).

#### Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. If you submit a comment at <https://www.regulations.gov>, your entire comment, including any personal identifying information, will be posted on the website. If you submit a hard copy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

#### Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*), its implementing regulations (50 CFR 17.32), National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), as amended, and the and the Department of Interior's implementing regulations (43 CFR part 46).

### Geological Survey

[Docket No. USGS-2026-0067; OMB Control Number 1028-0106; GX26WC00GJNV331]

#### Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; USGS Ash Fall Report

**AGENCY:** U.S. Geological Survey, Interior.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act (PRA) of 1995, the U.S. Geological Survey (USGS) is proposing to renew an information collection.

**DATES:** Interested persons are invited to submit comments on or before June 8, 2026.

**ADDRESSES:** You may submit comments by one of the following methods:

- **Internet:** <https://www.regulations.gov>. Search for and submit comments on Docket No. USGS-2026-0067.

- **U.S. Mail:** USGS, Information Collections Clearance Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192.

#### FOR FURTHER INFORMATION CONTACT:

Kristi Wallace by email at [kwallace@usgs.gov](mailto:kwallace@usgs.gov), or by telephone at (907) 786-7109. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

**SUPPLEMENTARY INFORMATION:** In accordance with the PRA of 1995 (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), the USGS provides the public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on March 3, 2026, (91 FR 10408). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

**Abstract:** The USGS provides notifications and warnings to the public of volcanic activity in the United States in order to reduce the loss of life, property, and economic and societal impacts. Ash fall to the ground can pose

significant disruption and damage to buildings, transportation, water and wastewater, power supply, communications equipment, agriculture, and primary production leading to potentially substantial societal impacts and costs, even at thicknesses of only a few millimeters or inches. Additionally, fine grained ash, when ingested can cause health impacts to humans and animals. The USGS will use reports entered in real time by respondents of ash fall in their local area to correct or refine ash fall forecasts as the ash cloud moves downwind. Retrospectively these reports will enable USGS to improve their ash fall models and further research into eruptive processes.

This project is a database module and web interface allowing the public and Alaska Volcano Observatory (AVO) staff to enter reports of ash fall in their local area in real time and retrospectively following an eruptive event. Users browsing the AVO website during eruptions will be directed towards a web form allowing them to fill in ash fall information and submit the information to AVO.

Compiled ashfall reports are available in real-time to AVO staff through the AVO internal website. A pre-formatted summary report or table that distills information received online will show ash fall reports in chronological order with key fields including (1) date and time of ash fall, (2) location, (3) positive or negative ash fall (4) name of observer, and (5) contact information is easily viewable internally on the report so that calls for clarification can be made by AVO staff quickly and Operations room staff can visualize ashfall information quickly.

Ashfall report data will also be displayed on a dynamic map interface and show positive (yes ash) and negative (no ash) ash fall reports by location. Ashfall reports (icons) will be publicly displayed for a period of 24 hours and shaded differently as they age so that the age of reports is obvious.

The ashfall report database will help AVO track eruption clouds and associated fallout downwind. These reports from the public will also give scientists a more complete record of the amount and duration and other conditions of ash fall. Getting first-hand accounts of ash fall will support model ash fall development and interpretation of satellite imagery. AVO scientists will—as time allows—be able to contact the individuals using their entered contact information for clarification and details. Knowing the locations from which ash-fall reports have been filed will improve ash fall warning messages,

AVO Volcanic Activity Notifications, and make fieldwork more efficient. AVO staff will be able to condense and summarize the various ash fall reports and forward that information on to emergency management agencies and the wider public. The online form will also free up resources during exceedingly busy times during an eruption, as most individuals currently phone AVO with their reports.

*Title of Collection:* USGS Ash Fall Report.

*OMB Control Number:* 1028–0106.

*Form Number:* None.

*Type of Review:* Extension of a currently approved collection.

*Respondents/Affected Public:* General Public, local governments and emergency managers.

*Total Estimated Number of Annual Respondents:* We are likely to ask individuals to respond 1–6 times year which is the number of past eruptions we have during any one year in Alaska. Individuals can submit responses more than once during an eruption to report ashfall details.

*Total Estimated Number of Annual Respondents:* 250.

*Total Estimated Number of Annual Responses:* 250 individuals affected by a volcanic ashfall event each year.

*Estimated Completion Time per Response:* We estimate the public reporting burden will average 5 minutes per response. This includes the time for reviewing instructions and answering a web-based questionnaire.

*Total Estimated Number of Annual Burden Hours:* 21 hours.

*Respondent's Obligation:* Voluntary.

*Frequency of Collection:* On occasion, after each ashfall event.

*Total Estimated Annual Non-hour Burden Cost:* \$750.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA of 1995 (44 U.S.C. 3501 *et seq.*).

**Jacob Lowenstern,**

*Center Director, USGS Volcano Science Center.*

### Bureau of Reclamation

[RN.17730001.0000000 26XR0680S1 RR040U2200]

#### Colorado River Basin Salinity Control Advisory Council Notice of Public Meeting

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of public meeting.

**SUMMARY:** The Bureau of Reclamation is publishing this notice to announce that a Federal Advisory Committee meeting of the Colorado River Basin Salinity Control Advisory Council (Council) will take place. The meeting is open to the public.

**DATES:** The meeting will take place in-person and virtually on Wednesday, May 13, 2026, beginning at 3:00 p.m. to approximately 4:30 p.m. (PDT) and Thursday, May 14, 2026, beginning at 8:30 a.m. to approximately 9:30 a.m. (PDT).

**ADDRESSES:** The in-person meeting will be held at the Southern Nevada Water Authority, Molasky Corporate Center, 100 N City Parkway, Las Vegas, NV 89106.

The virtual meeting held on Wednesday, May 13, 2026, may be accessed at <https://us02web.zoom.us/j/89470457016>.

The virtual meeting held on Thursday, May 14, 2026, may be accessed at <https://us02web.zoom.us/j/84829775490>.

**FOR FURTHER INFORMATION CONTACT:** Kathleen Callister, telephone (801) 524–3781; email at [kcallister@usbr.gov](mailto:kcallister@usbr.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** The meeting of the Council is being held under the provisions of the Federal Advisory Committee Act of 1972. The Council was established by the Colorado River Basin Salinity Control Act of 1974 (Pub. L. 93–320) (Act) to receive reports and advise Federal agencies on implementing the Act.

*Purpose of the Meeting:* The purpose of the meeting is to discuss the accomplishments of Federal agencies and make recommendations on future
