SUPPLEMENTARY INFORMATION: Public Law 114-143, the Integrated Public Alert and Warning System Modernization Act of 2015, and Presidential Executive Order 13407, Public Alert Warning System, require FEMA to implement the public alert and warning system to disseminate timely and effective warnings to people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and wellbeing. The Integrated Public Alert and Warning System (IPAWS) is the Department of Homeland Security's (DHS) response to the Executive Order. The Stafford Act (42 U.S.C. 5121, *et. seq.*, Pub. L. 93-288, as amended) requires that FEMA make IPAWS available to Federal, State, Tribal, territorial, and local agencies for the purpose of providing warning to governmental authorities and the civilian population in areas endangered by disasters. The information collected is used to create a Memorandum of Agreement (MOA) with FEMA that establishes rules regarding the management, operations, and security of a connection between Federal, State, Tribal, territorial, and local alerting authorities and IPAWS-OPEN (Open Platform for Emergency Notifications).

Collection of Information

Title: Integrated Public Alert and Warning Systems (IPAWS) Memorandum of Agreement Applications.

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660-0140.

FEMA Forms: IPAWS Memorandum of Agreement Application, FEMA Form FF-302-FY-22-102 (formerly 007-0-25): The information collected is utilized by FEMA to identify the identity of the alerting authority and the software being used to connect to IPAWS-OPEN. The information is only shared with the FEMA Office of the Chief Information Officer to generate a digital certificate for the State/Tribal/territorial/local alerting authority which authenticates the user and the software to connect with IPAWS-OPEN and deliver life-saving public alerts and warnings within their jurisdiction.

IPAWS Public Alerting Authority (PAA) Application, FEMA Form FF-302-FY-22-103 (formerly 007-0-26a/b): This information collection captures information detailing which types of events the local jurisdiction is approved to use IPAWS for and which primary dissemination channels should be available. For example, if a community wants to be able to send a Civil Emergency Message (CEM) to broadcast across radio, television, and cable, they will request "CEM" for "EAS"—the Emergency Alert System. These requested permissions are reviewed by either the State or Tribal authorities for compliance with established overall alerting policies and plans. IPAWS uses the approved information to configure permissions in IPAWS-OPEN.

Abstract: The information requested is required to provide FEMA with required information to issue a digital certificate for the alerting authority and its software that authenticates the user's identity to establish secure access to IPAWS-OPEN. Failure to obtain this information will negatively impact the number of jurisdictions that can access IPAWS-OPEN and their ability to warn the American people in a timely manner of emergencies that may be a threat to life and property.
