

stakeholder perceptions, experiences, and expectations; provide an early warning of issues with the service; or focus attention on areas where communication, training, or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between ONC and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. If this information is not collected, vital feedback from TEFCA users and stakeholders on the ONC services will be unavailable.

Likely respondents to the data collections under this generic clearance will be the Qualified Health Information Networks® (QHINs™), which are health

information networks approved to access and exchange data through TEFCA. Over each of the next three years, an estimated 15 respondents are expected to participate, with approximately 7 qualitative feedback activities occurring annually and an average of 71 responses per respondent. The frequency of response will vary by activity, with each response taking an average of 80 minutes. This results in a total estimated burden of 1,420 hours annually, or 4,260 hours over the three-year period.
