

Animal and Plant Health Inspection Service

Title: Infectious Salmon Anemia (ISA) Payment of Indemnity.

OMB Control Number: 0579-0192.

Summary of Collection: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. Infectious Salmon Anemia (ISA) is a clinical disease resulting from infection with the ISA virus and poses a substantial threat to the economic viability and sustainability of salmon aquaculture in the United States and abroad. This indemnity program entails the use of several information collection activities, including completing a program enrollment form as well as an appraisal and indemnity claim form; developing biosecurity protocols; conducting biosecurity audits; developing site-specific ISA action plans; compiling fish inventories and mortality reports (and recordkeeping); and disease surveillance to control ISA. Program participants, who may include certain aquaculture industry business owners, managers, site employees, and accredited veterinarians, and designated laboratories, must also assist APHIS with certain disease surveillance activities. Without the information it would be impossible for APHIS to contain and prevent ISA outbreaks in the United States.

Need and Use of the Information: APHIS uses a form to enroll aquaculture industry businesses, three others to reimburse them for disease losses, and other information activities to document or conduct biosecurity, protocols, and audits; develop site-specific ISA action plans; compile fish inventories and mortality reports (and keep records of the inventories and reports); and conduct disease surveillance.

Description of Respondents: Business or other for-profit.

Number of Respondents: 13.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Animal and Plant Health Inspection Service

Title: Contract Pilot and Aircraft Acceptance.

OMB Control Number: 0579-0298.

Summary of Collection: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture, either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of

plant pests and noxious weeds that are new to or not widely distributed within the United States. The Animal and Plant Health Inspection Service (APHIS) contracts for these services, and prior to any aerial applications, requests certain information from the contractor and/or contract pilots to ensure that the work will be done according to contract specifications. Among other things, APHIS asks to see aircraft registration, the aircraft's airworthiness certificate, the pilot's license, the pilot's medical certification, the pilot's proof of flight review, the pilot's pesticide applicator's license, and the aircraft and engine logbooks.

Need and Use of the Information: Contract Pilot and Aircraft Acceptance Form (PPQ-816) and SIT Pilot and Aircraft Check-In Sheet (PPQ Form 818) are used by the Plant Protection and Quarantine personnel who are involved with contracts for aerial application services for emergency pest outbreaks. The forms are used to document that the pilot and aircraft meet contract specifications. If APHIS did not collect this information or collected it less frequently, APHIS would not be able to verify if APHIS contracts for aerial application services met specifications.

Description of Respondents: Businesses.

Number of Respondents: 8.

Frequency of Responses: Reporting; On occasion.

Total Burden Hours: 8.
