National Oceanic and Atmospheric Administration

[RTID 0648–XF712]

Determination of Overfishing or an Overfished Condition

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: This action serves as a notice that NMFS has found that Atlantic white marlin and roundscale spearfish continue to be overfished; the Pribilof Island blue king crab stock continues to be overfished; and the Bering Sea snow crab is now overfished.

FOR FURTHER INFORMATION CONTACT: Karen E. Greene, (301) 427–8558.

SUPPLEMENTARY INFORMATION: Pursuant to section 304(e)(2) of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1854(e)(2), NMFS, must notify councils, and publish a notice in the **Federal Register**, whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

NMFS has determined that Atlantic white marlin and roundscale spearfish, both of which are assessed and managed together, continue to be overfished. This determination is based on the most recent assessment, completed in 2025 using data through 2023, that found the spawning stock biomass is less than the minimum stock size threshold (MSST), which supports the determination that the stocks remain overfished. NMFS continues to work with the International Commission for the Conservation of Atlantic Tunas to rebuild these stocks through its international rebuilding program.

NMFS has determined that the Pribilof Island blue king crab stock continues to be overfished. This determination is based on the most recent assessment, completed in 2025 using data from 2024, that found the mature male biomass is less than the MSST, which supports the

determination that the stock remains overfished.

NMFS has determined that the Bering Sea snow crab stock is again overfished (it was previously determined to be overfished in 2022; 88 FR 14349, March 8, 2023). This determination is based on the most recent assessment, completed in 2025 using data through 2025, that found the mature male biomass is less than the MSST, which supports a determination that the stock is overfished.

NMFS continues to work with the North Pacific Fishery Management Council to rebuild both of these crab stocks.

Dated: May 7, 2026.

Kelly Denit,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

Notice of Availability of a Draft Management Plan and Draft Environmental Assessment for the Olympic Coast National Marine Sanctuary; Request for Public Comment

AGENCY: Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) has prepared a draft management plan (DMP) as part of the Olympic Coast National Marine Sanctuary (OCNMS or sanctuary) management plan review. The DMP, which replaces a 2011 sanctuary management plan, was developed to evaluate substantive progress toward implementing the goals of the sanctuary, and to make revisions to the management plan as necessary to fulfill the purposes and policies of the National Marine Sanctuaries Act. NOAA also prepared a draft environmental assessment (DEA), which evaluates the environmental impacts of implementing the DMP, and ongoing field activities. NOAA is soliciting public comments on the DMP and DEA at this time.

DATES: Written comments should be received on or before 11:59 p.m. Eastern Daylight Time on July 13, 2026.

ADDRESSES: Copies of the DMP and DEA along with additional background materials are available at <https://olympiccoast.noaa.gov/management/mpr>.

You may submit comments on the DMP and DEA by any of the following methods:

Electronic Submission: Federal eRulemaking Portal: <https://www.regulations.gov>. Submit electronic comments via the Federal eRulemaking Portal and search for Docket Number NOAA–NOS–2023–0003.

Mail: Written comments may also be mailed to Olympic Coast National Marine Sanctuary (Management Plan Review), 115 Railroad Ave. East, Suite 301, Port Angeles, WA 98362.

Instructions: All comments received are a part of the public record, and the entirety of the comment, including the name of the commenter, email address, attachments, and other supporting materials, will be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information such as account numbers or Social Security numbers. NOAA will accept anonymous comments through [regulations.gov](https://www.regulations.gov) (enter N/A in the required fields to remain anonymous).

FOR FURTHER INFORMATION CONTACT: H el ene Scalliet, Deputy Superintendent, Olympic Coast National Marine Sanctuary, Olympic Coast National Marine Sanctuary, 115 Railroad Ave. East, Suite 301, Port Angeles, WA 98362, or see <https://olympiccoast.noaa.gov/management/mpr>.

SUPPLEMENTARY INFORMATION:

I. Background

Olympic Coast National Marine Sanctuary was designated in July 1994. It spans 3,188 square miles of marine waters off the rugged coast of the Olympic Peninsula, covering much of the continental shelf and the heads of several major submarine canyons, with seasonal upwelling that supports locally abundant marine life and seasonal populations of marine mammals and seabirds. Along its shores are thriving kelp and intertidal communities, teeming with fishes and other sea life. In the darkness of the seafloor, scattered communities of deep-sea coral and sponges form habitats for fish and other marine wildlife.

In addition to important ecological resources, the Olympic Coast has a rich cultural and historical legacy. The sanctuary is located within the boundaries of the legally defined usual and accustomed (U&A) fishing areas of
