POLICY JUSTIFICATION

Lithuania—AIM-9X Sidewinder Block II Missiles

The Government of Lithuania has requested to buy an additional one hundred fifty-two (152) AIM 9X Block II Sidewinder tactical missiles; eight (8) AIM-9X Block II tactical guidance units; six (6) AIM-9X Block II captive air training missiles; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support that will be added to a previously implemented case whose value was under the congressional notification threshold. The original Foreign Military Sales case, valued at \$19.5 million (\$10.5 million in major defense equipment (MDE)), included sixteen (16) AIM-9X Block II Sidewinder tactical missiles; two (2) AIM-9X Block II tactical guidance units; training; weapon system support; training aids and devices; spare parts; and other related elements of logistics and program support. This notification is for a combined total of the following MDE items: one hundred sixty-eight (168) AIM 9X Block II Sidewinder tactical missiles; ten (10) AIM-9X Block II tactical guidance units; and six (6) AIM-9X Block II captive air training missiles. The following non-MDE items will also be included: training; weapon system support; training aids and devices; spare parts; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$214 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a NATO Ally that is an important force for ensuring peace and stability in Europe.

The proposed sale will help improve the security of Lithuania and assist in maintaining political stability, military balance, and economic progress in the region. Lithuania will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Lithuania.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 26-40

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The AIM-9X Block II Sidewinder tactical missile represents a substantial increase in performance over the AIM-9M and replaces the AIM-9X Block I missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag and high angle of attack airframe, and the ability to integrate the helmet mounted cueing system. The most current AIM-9X Block II operational flight software provides fifth-generation infrared missile capabilities such as lock-on-after-launch, weapons data link, and surface launch.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Lithuania can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been

authorized for release and export to the Government of Lithuania.

POLICY JUSTIFICATION

The Netherlands—Hellfire Missiles

The Government of the Netherlands has requested to buy five hundred thirty (530) AGM-114R2 Hellfire Missiles. The following non-major defense equipment items will also be included: U.S. Army Aviation and Missile Command Security Assistance Management Directorate technical assistance; Tactical Aviation and Ground Munitions Project Office technical assistance; non-standard books, publications, and other Hellfire publications; integration support; and other related elements of logistics and program support. The estimated total cost is \$200 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO Ally which is an important force for political stability and economic progress in Europe.

The proposed sale will modernize the Netherlands' armed forces, expand its capability to strengthen homeland defense, and deter regional threats. This enhanced capability will contribute to the Netherlands' military goals of updating capability while further enhancing interoperability with the United States and other allies. The Netherlands will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Corporation, located in Orlando, FL. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Annex

Item No. vii

(vii) *Sensitivity of Technology*
1. The AGM-114R2 Hellfire Missile is used against heavy and light armored targets, thin skinned vehicles, urban structures, bunkers, caves, and personnel. The missile is inertial measurement unit based, with a variable delay fuse, improved safety and reliability.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Netherlands can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Netherlands.
