SUPPLEMENTARY INFORMATION:**I. Abstract**

This is a request for renewal of an approved information collection. The National Marine Fisheries Service (NMFS) requests comments on the extension of a currently approved information collection for the West

Coast Region Groundfish Electronic Fish Ticket Program.

As part of its fishery management responsibilities, the National Oceanic and Atmospheric Administration (NOAA) NMFS collects information to determine the amount and type of groundfish caught by fishing vessels. Electronic fish tickets are submissions of landings data from the first receiver to the Pacific States Marine Fisheries Commission (PSMFC) and NMFS. This collection supports requirements for participants of the Pacific Coast shore based commercial groundfish fisheries (including the shore based Individual Fishing Quota (IFQ) program, the limited entry fixed gear fishery, and the open access fixed gear fishery) to account for all landed catch and to send electronic catch data used to manage the catch allocations and limits. The respondents are principally shore based first receivers.

II. Method of Collection

Electronic fish ticket data of landings data will be submitted from the first receiver to PSMFC. Shoreside first receivers, defined as persons who receive, purchase, or take custody, control, or possession of catch onshore directly from a vessel, are required to use a web-based, NMFS-approved electronic fish ticket program to send catch reports within 24 hours from the date of the landing. The electronic fish tickets are based on information currently required in state fish receiving tickets or landing receipts. The PSMFC currently receives and stores fish ticket data from the states. This data is maintained on the Pacific Fisheries Information Network (PacFIN) database.
