

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2026-0002; Internal Agency Docket No. FEMA-B-2556]

Proposed Flood Hazard Determinations for Gaston County, North Carolina, and Incorporated Areas**AGENCY:** Federal Emergency Management Agency, Department of Homeland Security.**ACTION:** Notice; withdrawal.

SUMMARY: The Federal Emergency Management Agency (FEMA) is withdrawing its proposed notice concerning proposed flood hazard determinations, which may include the addition or modification of any Base Flood Elevation, base flood depth, Special Flood Hazard Area boundary or zone designation, or regulatory floodway (herein after referred to as proposed flood hazard determinations) on the Flood Insurance Rate Maps and, where applicable, in the supporting Flood Insurance Study reports for Gaston County, North Carolina, and Incorporated Areas.

DATES: This withdrawal is effective May 19, 2026.**ADDRESSES:** You may submit comments, identified by Docket No. FEMA-B-2556, to David N. Bascom, Acting Director, Engineering and Modeling Division, National Flood Insurance Program, Resilience, FEMA, 400 C Street SW, Washington, DC 20472, or (email) david.bascom@fema.dhs.gov.**FOR FURTHER INFORMATION CONTACT:** David N. Bascom, Acting Director, Engineering and Modeling Division, National Flood Insurance Program, Resilience, FEMA, 400 C Street SW, Washington, DC 20472, or (email) david.bascom@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: On October 2, 2025, FEMA published a proposed notice at 90 FR 47788, proposing flood hazard determinations for Gaston County, North Carolina, and Incorporated Areas. FEMA is withdrawing the proposed notice for this county because Gaston County requires a revised flood map before it can move forward in the mapping process. FEMA intends to publish a Notice of Proposed Flood Hazard Determinations for Gaston County in the **Federal Register** followed by a notice in the affected community's local newspaper in the near future.

(Authority: 42 U.S.C. 4104; 44 CFR 67.4.)

Elizabeth Asche,*Assistant Administrator, Federal Insurance Directorate, Resilience, Federal Emergency Management Agency, Department of Homeland Security.*

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2026-0034]

National Flood Insurance Program (NFIP); Assistance to Private Sector Property Insurers, Notice of Adjustment to FY 2027 Arrangement**AGENCY:** Federal Emergency Management Agency (FEMA), Department of Homeland Security (DHS).**ACTION:** Notice; correction.

SUMMARY: On May 5, 2026, FEMA published a notice of the Fiscal Year (FY) 2027 Financial Assistance/Subsidy Arrangement (Arrangement) for private property insurers interested in participating in the NFIP's Write Your Own Program. The notice stated that the FY 2027 Arrangement's effective date was October 1, 2026. To be effective on that date, the FY 2027 Arrangement was required to be published on April 1, 2026. Because of the lapse in DHS appropriations, FEMA was unable to publish on April 1, 2026. Therefore, FEMA is changing the effective date of the FY 2027 Arrangement to be December 1, 2026.

FOR FURTHER INFORMATION CONTACT: Karolyn Kiss, Federal Insurance Directorate (FID), Resilience, FEMA, 400 C St. SW, Washington, DC 20472 (mail); (202) 646-3140 (phone); or karolyn.kiss@fema.dhs.gov (email).**SUPPLEMENTARY INFORMATION:****Correction**

In FR Doc. 2026-08728, beginning on page 24262 in the **Federal Register** of Tuesday, May 5, 2026, the following corrections are made:

On page 24262, in the third column, in the first paragraph under III. FY 2027 Arrangement, "October 1, 2026" is corrected to read "December 1, 2026."

On page 24263, in the first column, in the first paragraph under Article II. Commencement and Termination,

"October 1, 2026" is corrected to read "December 1, 2026."

Elizabeth A. Asche,*Assistant Administrator for Federal Insurance Directorate, Resilience Federal Emergency Management Agency.*

BILLING CODE 9111-52-P

DEPARTMENT OF THE INTERIOR**Geological Survey**

[Docket No. USGS-ECO-2026-0002; OMB Control Number 1028-0136; GX26MR00UTCWD00]

Agency Information Collection Activities; Nonindigenous Aquatic Species eDNA Data Submission Forms**AGENCY:** U.S. Geological Survey, Interior.**ACTION:** Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the U.S. Geological Survey (USGS) is proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before July 20, 2026.**ADDRESSES:** You may submit comments by one of the following methods:

- *Internet:* <https://www.regulations.gov>. Search for and submit comments on Docket No. USGS-ECO-2026-0002.
- *U.S. Mail:* USGS, Information Collections Clearance Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192.

FOR FURTHER INFORMATION CONTACT: To request additional information about this information collection request (ICR), please contact Matthew Neilson by email at mneilson@usgs.gov, or by telephone at +1 352-517-4091. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the PRA of 1995 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA. We may not conduct, or sponsor and you are not required to respond to a collection of information unless it

displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: America is under siege by many harmful non-native species of plants, animals, and microorganisms. More than 6,500 nonindigenous species are now established in the United States, posing risks to native species, valued ecosystems, and human and wildlife health. These invaders extract a huge cost, an estimated \$120 billion per year, to mitigate their harmful impacts. The current annual environmental, economic, and health-related costs of invasive species exceed those of all other natural disasters combined.

Through its Invasive Species Program (<http://www.usgs.gov/ecosystems/>), the USGS plays an

important role in federal efforts to combat invasive species in natural and semi-natural areas through early detection and assessment of newly established invaders; monitoring of invading populations; and improving understanding of the ecology of invaders and factors in the resistance of habitats to invasion. The USGS provides the tools, technology, and information supporting efforts to prevent, contain, control, and manage invasive species nationwide. To meet user needs, the USGS also develops methods for compiling and synthesizing accurate and reliable data and information on invasive species for inclusion in a distributed and integrated web-based information system.

As part of the USGS Invasive Species Program, the Nonindigenous Aquatic Species (NAS) database (<http://nas.er.usgs.gov/>) functions as a repository and clearinghouse for occurrence information on nonindigenous aquatic species from across the United States. It contains locality information on approximately 1,480 species of vertebrates, invertebrates, and vascular plants introduced since 1850. Taxa include foreign species as well as those native to North America that have been transported outside of their natural range. The NAS website provides immediate access to new occurrence records through a real-time interface with the NAS database. Visitors to the website can use a set of predefined queries to obtain lists of species according to state or hydrologic basin of interest. Fact sheets, distribution maps, and information on new occurrences are continually posted and updated. Dynamically generated species distribution maps show the spatial accuracy of the locations reported, population status, and links to more information about each report.

Environmental DNA (eDNA) comprises genetic material that has been sloughed, excreted, or otherwise released into the environment and can be detected in water, soil, and air. For aquatic organisms, this includes skin, excrement, mucus, saliva, blood, and gametes. Collection of environmental samples can be screened for the presence of eDNA, allowing for the detection of low-density organisms before detectability by traditional sampling methods. The combination of traditional specimen sightings and eDNA detections can provide more complete species distribution records and significantly improve the ability to respond quickly to new invasions as part of an early detection rapid response

(EDRR) system. Working with interagency eDNA experts, the NAS database has used a consensus method to identify and develop community data standards for integrating eDNA detection data.

Title of Collection: Nonindigenous Aquatic Species eDNA Data and Metadata Submission Forms.

OMB Control Number: 1028–0136.

Form Number: None.

Type of Review: Renewal of a currently approved collection.

Respondents/Affected Public: Federal, State, and local government employees, and university personnel.

Total Estimated Number of Annual Respondents: We estimate approximately 25 total respondents annually.

Total Estimated Number of Annual Responses: We estimate a total of 35 responses annually.

Estimated Completion Time per Response: We estimate up to 90 minutes (1.5 hours) per response.

Total Estimated Number of Annual Burden Hours: We estimate a total of 52.5 annual burden hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Brian D Kimbrell,

Federal Register Liaison, U.S. Department of the Interior, Office of the Chief Information Officer.
