

resources should be adopted. Regulatory decisions should be made without undue delay.” Consistent with the NRC’s “Efficiency” principle, granting these exemptions, allows the NRC to “minimize the use of resources” and make its regulatory decision as efficiently as possible while still fulfilling its NEPA obligations through its evaluation of the environmental impacts of the proposed action and alternatives, and the issuance of an EA and FONSI. By aligning the level of NEPA review with the project’s potential environmental impacts, the NRC staff was able to conduct an efficient yet thorough analysis. This approach maintained the quality and integrity of the environmental review while supporting timely, informed decision-making.

*Environmental Considerations for Exemptions*

In accordance with 10 CFR 51.31(a), the Commission has determined that the granting of these exemptions will not have a significant effect on the quality of the human environment, as discussed in the NRC staff’s EA and FONSI. A

summary of the EA and the detailed FONSI are located in Sections II and III of this document, respectively.

*Exemption Conclusion*

Accordingly, the NRC has determined that pursuant to 10 CFR 51.6, that the exemptions are authorized by law and are otherwise in the public interest. Therefore, the NRC hereby grants one-time exemptions from the requirements in 10 CFR 51.20(b)(1), 10 CFR 51.25, and 10 CFR 51.75(a) to allow the NRC to issue an EA and FONSI instead of an EIS to meet its obligations under NEPA and the NRC’s regulations for the environmental review of the LMGs CP application.

The exemptions are effective on May 18, 2026.
