**SUPPLEMENTARY INFORMATION:** Section 1301 of WRDA 2024 (Pub. L. 118-272) amended Section 301 of WRDA 2020 (33 U.S.C. 579d-2) specifies how the Corps should develop a deauthorization list of inactive projects to submit to Congress and provide an opportunity for public input on the list prior to submission. The intent is to identify water resources development projects and separable elements of projects that are no longer viable for construction due to: (1) a lack of local support, (2) a lack of available Federal or non-Federal resources, or (3) an authorizing purpose that is no longer relevant or feasible. This process is intended to identify projects for Congress to deauthorize and allow the continued authorization of projects that remain viable for construction.

33 U.S.C. 579d-2 provides that the Secretary shall develop a Proposed Deauthorization List that identifies water resources development projects and separable element of projects, authorized for construction before June 10, 2014, that meet one of the three criteria listed above. Projects and separable elements on the proposed deauthorization list also are those that (1) planning, design, or construction was not initiated before January 4, 2025; or (2) planning, design, or construction was initiated before January 4, 2025, but for which no funds, Federal or non-Federal, were obligated for planning, design, or construction of the project or separable element of the project during the current fiscal year or any of the 10 preceding fiscal years.

In accordance with Section 103(f) of WRDA 1986, as amended (33 U.S.C. 2213(f)), a separable element is defined as “a portion of a project—(1) which is physically separable from other portions of the project; and (2) which—(A) achieves hydrologic effects, or (B) produces physical or economic benefits,

which are separately identifiable from those produced by other portions of the project.”

Following this public review period of the Proposed Deauthorization List, the Assistant Secretary of the Army for Civil Works will consider the comments received and publish a Final Deauthorization List in the **Federal Register** and submit the list to Congress. The Proposed Deauthorization List can be found at: <https://www.usace.army.mil/Missions/Civil-Works/Water-Resources-Development-Act/>.

*Authority:* This notice is required by Section 1301 of the Water Resources Development Act of 2024, Pub. L. 118-272.

*Type of Review:* Revision of a currently approved ICR.

*Respondents/Affected Public:* State, Local, and Tribal Governments.

*Abstract:* The Case Service Report (RSA–911) is used to collect individual level data on State Vocational Rehabilitation (VR) program participants on a quarterly basis. The data collected in this report are mandated by section 101(a)(10) and 607 of the Rehabilitation Act of 1973 (Act) and section 116(d) of the Workforce Innovation and Opportunity Act. In addition, the Rehabilitation Services Administration (RSA) uses data reported through this collection to support its other responsibilities under the Act. Section 14(a) of the Act calls for the evaluation of programs authorized under the Act, as well as an assessment of the programs' effectiveness in relation to cost. Many of these evaluations use RSA–911 data. RSA also uses data captured through the RSA–911 during the conduct of both the annual review and periodic on-site monitoring of VR agencies required by section 107 of the Act to examine the effectiveness of program performance. Other important management activities, such as the provision of technical assistance, program planning, and budget preparation and development, are greatly enhanced through the use of RSA–911 data. In addition, RSA uses RSA–911 data in the exchange of data under a data sharing agreement with the Social Security Administration and the U.S. Department of Health and Human Services as required by section 131 of the Act. Finally, the RSA–911 is considered to be one of the most robust databases in describing the demographics of the disabled population in the country and as such is used widely in researchers' disability-related analyses and reports.
