

day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: National Science Foundation (NSF) Directorate for Technology, Innovation and Partnerships (TIP) Reviewer Request Form

OMB Control Number: 3145–0273.

Type of Request: Revision to and extension of approval of an information collection.

Proposed Project

For more than 70 years, the National Science Foundation (NSF) has supported the full spectrum of science, technology, engineering, and mathematics (STEM) research and education—from foundational, curiosity-driven discovery to use-inspired and solutions-oriented research that addresses national and economic challenges. Across this continuum, scientific discovery, innovation, and technology translation are deeply interconnected.

The NSF Directorate for Technology, Innovation and Partnerships (TIP) was established to strengthen the agency's capacity to accelerate the translation of research outputs to the market. TIP advances use-inspired and translational research through investments that support technology development, workforce development, and regional innovation as outlined in the CHIPS and Science Act.

Some examples of TIP investments include: Accelerating Research Translation (ART), (<https://www.nsf.gov/funding/opportunities/art-accelerating-research-translation>) Innovation Corps (I-Corps) (<https://beta.nsf.gov/funding/initiatives/i-corps/about-teams>), Regional Innovation Engines (NSF Engines) (<https://www.nsf.gov/funding/initiatives/regional-innovation-engines>), Pathways to Enable Open-Source Ecosystems (POSE) (<https://www.nsf.gov/funding/initiatives/pathways-enable-open-source-ecosystems>), and America's Seed Fund (SBIR/STTR) (<https://seedfund.nsf.gov/>).

Due to the breadth and specialized nature of these programs, the Directorate requires the ability to recruit reviewers with wide-ranging expertise, experience, and perspectives. Appropriate reviewers for TIP programs may come from varied sectors and professional backgrounds, including academia, industry, startups, venture development, technology transfer organizations, workforce development entities, regional innovation partnerships, nonprofit organizations, and open-source communities.

Accordingly, NSF requests renewal of Office of Management and Budget (OMB) approval for the *TIP Directorate Reviewer Request Form*. The information collection enables TIP programs to gather information necessary to identify and recruit reviewers whose expertise, experience, and professional backgrounds align with the objectives, subject matter, and evaluation needs of specific funding opportunities and merit review activities.

The information collection consists of two components. The first component aligns with the NSF-wide Reviewer Request Form (NSF 428A) and collects standard reviewer information, educational background, demographic information, and professional experience. The second component contains customizable program-specific questions that allow TIP programs to request additional information relevant to the goals and needs of individual programs or solicitations.

Program-specific information may include, but is not limited to:

- Areas of technical or domain expertise;
- Sector experience (*e.g.*, academia, industry, nonprofit, venture, or government);
- Experience in technology translation, commercialization, entrepreneurship, workforce development, or regional innovation ecosystem development;
- Professional affiliations, websites, or LinkedIn profiles;
- Prior reviewer, mentoring, or startup advisory experience; and
- Potential conflicts of interest.

The flexibility afforded by the customizable portion of the *TIP Reviewer Request Form* is necessary because reviewer qualifications appropriate for one TIP program may not adequately reflect the expertise required for another. The requested information will support TIP Program Directors in identifying reviewers with the appropriate expertise and perspectives necessary to conduct fair, rigorous, and context-appropriate merit review processes across the Directorate's diverse portfolio and funding activities.

Following standard OMB requirements, NSF will require OMB approval in advance and provide OMB with a copy of the form containing these questions and/or data fields. Data collected will be used strictly for reviewer recruiting purposes. The data collection burden to the individuals will be limited to no more than 10 minutes of the respondents' time in each instance.

Respondents: The respondents generally have the education and/or experience level commensurate to a university assistant professor.

Estimated Number of Annual Respondents: 4,000.

Burden on the Public: It is estimated to take 10 minutes per respondent per form, for a total of 667 hours per year.

Dated: May 19, 2026.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request; Grantee Reporting Requirements for the Industry-University Cooperative Research Centers (IUCRC) Program

AGENCY: National Science Foundation.

ACTION: Submission for OMB Review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following request for revision of the approved collection of research and development data in accordance with the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register** and no comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 401 Dulany Street, Alexandria, VA 22314; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

SUPPLEMENTARY INFORMATION: NSF may not conduct or sponsor a collection of

information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Title of Collection: Grantee Reporting Requirements for the Industry-University Cooperative Research Centers (IUCRC) Program

OMB Number: 3145-0088.

Type of Request: Revision to and extension of approval of an information collection.

Proposed Project:

The IUCRC program provides a structure for academic researchers to conduct fundamental, pre-competitive research of shared interest to industry and government organizations. These organizations pay membership fees to a consortium so that they can collectively envision and fund research, with at least 90% of Member funds allocated to the direct costs of these shared research projects.

IUCRCs are formed around research areas of strategic interest to U.S. industry. Industry is defined very broadly to include companies (large and small), startups and non-profit organizations. Principal Investigators form a Center around emerging research topics of current research interest, in a pre-competitive space but with clear pathways to applied research and commercial development. Industry partners join at inception, as an existing Center grows, or they inspire the creation of a new Center by recruiting university partners to leverage NSF support. Government agencies participate in IUCRCs as Members or by partnering directly with NSF at the strategic level.

Universities, academic researchers, and students benefit from IUCRC participation through the research funding, the establishment and growth of industry partnerships, and educational and career placement opportunities for students. Industry Members benefit by accessing knowledge, facilities, equipment, and intellectual property in a highly cost-efficient model; leveraging Center research outcomes in their future proprietary projects; interacting in an informal, collaborative way with other private sector and government entities with shared interests; and identifying and recruiting talent. NSF provides funding to support Center administrative costs and a governance framework to manage membership, operations, and evaluation.

Sites within Centers will be required to provide data to NSF and/or its authorized representatives (contractors and/or grantees) annually—after the award expires for their fiscal year of activity—for the life of the Phase I, and if applicable, Phase II, and Phase III award(s).

Information collected are both quantitative and descriptive; they will provide managing Program Directors a means to monitor the operational and financial states of the Centers and ensure that the award is in good standing. These data will also allow NSF to assess the Centers in terms of intellectual, broader, and commercial impacts that are core to our review criteria. Finally, in compliance with the Evidence Act of 2019, information collected will be used in satisfying congressional requests, and supporting the agency's policymaking and reporting needs.

In addition to the agency's annual report requirement, Principal Investigators (IUCRC Center and Site Directors) of the awards are required to provide the following information:

Center-related Information:

- Center Data Reporting
 - A comprehensive annual survey collecting information on structure, funding, membership, personnel, and outcomes of the Center during a given reporting period. A Center must submit data for each fiscal year no later than September 30 of each year of operation, as well as after the award expires to describe its final year of activity.

Certification of Membership

- A list of members and membership fees collected by the Center and certified by the respective university's Sponsored Research Office (SRO), Total Program Income collected during the reporting period, In-kind Contributions during the reporting period, Allocation and Expenditures of each Site's research funds by project.

Site Research Projects Summary

- A list all projects in which the Site participated, including each project's goals; research tasks; key milestones, metrics/deliverables; developing results or outcomes; project budgets; and personnel.

• Assessment Coordinator Report

- An independent assessment of the annual Center activities (this report is done by an independent evaluator, and uploaded by the Principal Investigator as part of the NSF annual reporting requirement).

Logistical Information:

- IUCRC Directory

○ IUCRCs must provide accurate and current information for the online IUCRC directory (<https://iucrc.nsf.gov/centers/?uni=&sta=&prifoc=&prifoc=1&foc=>). The IUCRC program helps awardees to get their information updated on the website.

Optional:

• IUCRC Impact Stories for Public Distribution

IUCRCs are highly encouraged to submit information on their emerging research highlights and significant breakthrough stories to NSF to showcase their impact to the public and industry (see <https://iucrc.nsf.gov/centers/achievements/>) including new products, technology creation and/or enhancements, intellectual property of significant commercial relevance, and major improvements in cost-savings, efficiency, sustainability, productivity, and job growth.

Not only do these data provide valuable information on program activities, products, outcomes, and impact, they also help to paint a detailed longitudinal view of the program, provide insights for benchmarking individual Center performance, advancing industry-university engagement approaches, strengthening future workforce, and contribute to the Nation's research and technology ecosystem.

Use of the Information: The information collected is for internal use by NSF, sharing with the U.S. public, congressional requests, and for securing future funding for continued IUCRC program maintenance and growth. Survey data is collected and published at <https://iucrcstats.org>, made possible through NSF grant award 1732084.

Estimate Burden on the Public: Estimated at 1.5 hours per award for 250 sites and one hour per 80 Centers for a total of 330 respondents and 455 hours per year.

Respondents: IUCRC Awardees (Academic Institutions).

Estimated Number of Respondents: One from each IUCRC site (estimated: 225 active sites/year).

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: May 19, 2026.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–1387]

State of Indiana: NRC Staff Assessment of a Proposed Agreement Between the Nuclear Regulatory Commission and the State of Indiana

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed state agreement; request for comment.

SUMMARY: As required by Section 274e. of the Atomic Energy Act of 1954, as amended (AEA), the U.S. Nuclear Regulatory Commission (NRC or Commission) is publishing the proposed Agreement for public comment (Appendix A). The NRC is also publishing the summary of a draft assessment by the NRC staff of the State of Indiana’s regulatory program. Comments are requested on the proposed Agreement and its effect on public health and safety. Comments are also requested on the draft staff assessment, the adequacy of the State of Indiana’s program, and the adequacy of the staffing of the State’s program, as discussed in this document.

DATES: Submit comments by June 15, 2026. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal Rulemaking website:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–1387. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Sherrie Flaherty, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–7288; email: Sherrie.Flaherty@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2026–1387 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–1387.
- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin ADAMS Public Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the “Availability of Documents” section.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking Website (<https://www.regulations.gov>). Please include Docket ID NRC–2026–1387 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

By letter received January 29, 2026, Governor Mike Braun of the State of Indiana requested that the NRC enter into an Agreement with the State of Indiana as authorized by Section 274b. of the AEA. Under the proposed Agreement, the Commission would discontinue, and the State of Indiana would assume, regulatory authority over certain types of byproduct materials as defined in the AEA, source material, and special nuclear material in quantities not sufficient to form a critical mass.

III. Additional Information on Agreements Entered Under Section 274 of the AEA

Under the proposed Agreement, the NRC would discontinue its authority over 213 licenses and would transfer its regulatory authority over those licenses to the State of Indiana. The NRC periodically reviews the performance of the Agreement States to assure compliance with the provisions of Section 274.

Section 274e. of the AEA requires that the terms of the proposed Agreement be published in the **Federal Register** for public comment once each week for four consecutive weeks. This document is being published in fulfillment of that requirement.

IV. Proposed Agreement With the State of Indiana

Background

(a) Section 274b. of the AEA provides the mechanism for a State to assume regulatory authority from the NRC over certain radioactive materials and
