

from EPA, review the draft contaminant candidate list, review, discuss, and prepare responses to charge questions, and discuss the draft responses on the EPA's draft CCL 6.

**Availability of meeting materials:** All meeting materials, including the agenda, will be available on the SAB web page at <https://sab.epa.gov>.

**Procedures for providing public input:** Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to the EPA. Members of the public can submit relevant comments pertaining to the committee's charge or meeting materials. Input from the public to the SAB will have the most impact if it provides specific scientific or technical information or analysis for the SAB to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comments should follow the instructions below to submit comments.

**Oral statements:** In general, individuals or groups requesting an oral presentation virtually will be limited to three minutes. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Persons interested in providing oral statements should contact the DFO listed in the **FOR FURTHER INFORMATION CONTACT** section; preferably via email, by June 8, 2026, for the June 15, 2026 meeting, by June 22, 2026, for the June 29–July 1, 2026, meetings, and by August 19, 2026, for the August 26, 2026, meeting, to be placed on the list of registered speakers.

**Written statements:** Written statements will be accepted throughout the advisory process; however, for timely consideration by SAB members, statements should be submitted to the DFO by June 8, 2026, for consideration at the June 15, 2026, meeting, by June 22, 2026, for consideration at the June 29–July 1, 2026 meetings, and by August 19, 2026, for consideration at the August 26, 2026, meeting. Written statements should be supplied by email to the DFO listed in the **FOR FURTHER INFORMATION CONTACT** section. Submitters are requested to provide an unsigned version of each document because the SAB Branch does not

publish documents with signatures on its websites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB website. Copyrighted material will not be posted without the explicit permission of the copyright holder.

**Accessibility:** For information on access or services for individuals with disabilities, please contact the DFO listed in the **FOR FURTHER INFORMATION CONTACT** section; at least ten business days before the meetings, to give the EPA as much time as possible to process your request.

**Meeting cancellation:** The July 1, 2026, meeting may be canceled if the CCL 6 DWC concludes its business on June 30, 2026. If the July 1, 2026, meeting is canceled, notice will be posted on the SAB website at <https://sab.epa.gov>.

The purpose of this information collection is to continually streamline and simplify processes for wireless applicants and licensees, who previously used a myriad of forms for various wireless services and types of requests, in order to provide the Commission information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public, which has access to all publicly available wireless licensing information on-line, including

maps depicting a licensee’s geographic service area.
