Committee

Proposal Review Panel for Electrical, Communications, and Cyber Systems, #1196

Pursuant to 41 U.S.C. 102–3.60(a), to establish, renew, reestablish, or merge a discretionary (agency discretion) advisory committee, an agency must first consult with the General Services Administration's Committee Management Secretariat (the Secretariat) and, as part of the consultation, provide a written public interest determination approved by the head of the agency to the Secretariat with a copy to the Office of Management and Budget. In addition, pursuant to 41 U.S.C. 102–3.35, an agency shall follow the same consultation process and document in writing the same determination of need before creating a subcommittee under a discretionary committee that is not made up entirely of members of a parent advisory committee. Information on the following factors for the committee is provided to the Secretariat to demonstrate that renewing the committee is in the public interest:

1. Annual budget: \$216,389.
- a. Federal personnel on a full-time equivalent (FTE) basis: 2.9 FTE.
- b. Other Federal internal costs: \$0.
- c. Proposed payments to members: \$212,745.
- d. Proposed number of members: 529.
- e. Reimbursable costs: \$3,644.
2. If applicable, the total dollar value of grants expected to be recommended during the fiscal year: \$108,005,090.
3. Criteria for selecting members to ensure the committee has the necessary. Members represent a broad balance of the research community to include geographic distribution, industry, academe, Federal government and laboratories, career level distribution, and appropriate research disciplines. Members are selected to achieve a balance of viewpoints and expertise in scientific areas encompassed by division activities.

5. Justification that the information or advice provided by the Federal advisory committee or subcommittee is not available from another Federal advisory committee, another Federal Government source, or any other more cost-effective and less burdensome source.

Proposals submitted from the research community demonstrate methods of incorporating the latest state-of-the-art expertise into their subject matter. The community of subject matter experts provides qualified peer review specific to the proposals.

6. If the consultation is a committee renewal, a summary of the previous accomplishments of the committee and the reasons it needs to continue.

In the fiscal year 2025, the committee reviewed 1,186 proposals in 76 meetings, with 529 members participating from external institutions and federal organizations. The use of panelists to review proposals for the Agency is an invaluable asset. The cost of obtaining the expertise, insight, and information received by the Division using alternative methods, such as hiring full or part-time employees, would be extremely high.

7. Explanation of why the committee/subcommittee is essential to the conduct of agency business.

The NSF mission is set out in the NSF Act of 1950 authorizes and directs the Agency to initiate and support basic scientific research and research fundamental to the engineering process and science and engineering education programs at all levels and in all fields of science and engineering. The involvement of knowledgeable peers from outside the Foundation in the review of proposals is the keystone of NSF's proposal review system. Their judgments of the extent to which proposals address the merit review criteria are vital for informing NSF staff and influencing funding recommendations.

This public interest determination documents that renewing the committee is essential to the conduct of agency business and that the information to be obtained is not already available

through another advisory committee or source within the Federal Government.

Dated: May 26, 2026.

Committee Management Officer, National Science Foundation.
