#### Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Generic Clearance for Socioeconomics of Coral Reef Conservation, Hawai'i 2027 Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. This notice pertains to an individual survey under the approved collection of information for Socioeconomics of Coral Reef Conservation. Public comments were previously requested via the **Federal Register** on January 5, 2024 during a 60-day comment period and on April 15, 2024 during an additional 30-day comment period. This notice allows for an additional 30 days for public comments with respect to the Hawai'i survey.

*Agency:* National Oceanic & Atmospheric Administration (NOAA), Commerce.

*Title:* Generic Clearance for Socioeconomics of Coral Reef Conservation, Hawai'i 2027 Survey.

*OMB Control Number:* 0648-0646.

*Form Number(s):* None.

*Type of Request:* Regular. Revision of an approved information collection.

*Number of Respondents:* 1,700.

*Average Hours Per Response:* 20 minutes (0.33 hours).

*Total Annual Burden Hours:* 567 hours.

*Needs and Uses:* This request is for a revision to the currently approved collection of information, OMB Control Number 0648-0646, under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and implementing regulations at 5 CFR part 1320. This previously-approved information collection assists NOAA in the administration of the National Coral Reef Monitoring Program (NCRMP), which was established by the NOAA Coral Reef Conservation Program (CRCP) under the authority of the Coral Reef Conservation Act of 2000, 16

U.S.C. 6401 *et seq.* This act authorizes CRCP to, among other things, conserve and restore the condition of United States coral reef ecosystems and enhance public awareness, understanding, and appreciation of coral reefs and coral reef ecosystems and their ecological and socioeconomic value. In accordance with its mission goals, NOAA developed a survey to track relevant information regarding each jurisdiction's population, social and economic structure, the benefits of coral reefs and related habitats, the impacts of society on coral reefs, and the impacts of coral management on communities. The survey is repeated in each jurisdiction every five to seven years in order to provide longitudinal data and information for managers to effectively conserve coral reefs for current and future generations.

The purpose of this information collection is to obtain human dimensions information from residents in Hawai'i. Specifically, NOAA is seeking information on the behaviors and activities related to coral reefs, as well as information on perceptions of coral reef conditions and attitudes toward specific reef conservation activities. The survey has a core set of questions that are asked across all jurisdictions to allow for information to be tracked over time and across jurisdictions. To account for geographical, cultural and linguistic differences between jurisdictions, the survey questions include items that are specific to the local context and developed based on jurisdictional partner feedback.

We intend to use the information collected through this instrument for research purposes, as well as for measuring and improving the results of our reef protection programs. Because many of our efforts to protect reefs rely on education and changing attitudes toward reef protection, the information collected will allow CRCP to ensure that programs are designed appropriately at the start, future program evaluation efforts are as successful as possible, and outreach efforts are targeting the intended recipients with useful information.

*Affected Public:* Individuals or households.

*Frequency:* Every 5–7 years.

*Respondent's Obligation:* Voluntary.

*Legal Authority:* Coral Reef Conservation Act of 2000.

This information collection request may be viewed at [www.reginfo.gov](http://www.reginfo.gov). Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0646.
