

Vischer Ferry Hydroelectric Project No. 4679 (project). The project is located on the Mohawk River in Saratoga and Schenectady counties, New York. Commission staff has prepared an Environmental Assessment (EA) for the project.¹

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. Certain New Chemicals or Significant New Uses; Statements of Findings—March 2026

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Toxic Substances Control Act (TSCA) requires EPA to publish in the **Federal Register** a statement of its findings after its review of certain TSCA submissions when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to premanufacture notices (PMNs), microbial commercial activity notices (MCANs), and significant new use notices (SNUNs) submitted to EPA under TSCA. This document presents statements of findings made by EPA on such submissions during the period from March 1, 2026, to March 31, 2026.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA-HQ-OPPT-2026-1849, is available online at <https://www.regulations.gov>. Additional information about dockets generally, along with instructions for visiting the docket in person, is available at <https://www.epa.gov/dockets>.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action provides information that is directed to the public in general.

B. What action is the Agency taking?

This document lists the statements of findings made by EPA after review of submissions under TSCA section 5(a) that certain new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. This document presents statements of findings made by EPA during the applicable period.

C. What is the Agency's authority for taking this action?

TSCA section 5(a)(3) requires EPA to review a submission under TSCA section 5(a) and make specific findings pertaining to whether the substance may present unreasonable risk of injury to health or the environment. Among those potential findings is that the chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment per TSCA Section 5(a)(3)(C).

TSCA section 5(g) requires EPA to publish in the **Federal Register** a statement of its findings after its review of a submission under TSCA section 5(a) when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to PMNs, MCANs, and SNUNs submitted to EPA under TSCA section 5.

Anyone who plans to manufacture (which includes import) a new chemical substance for a non-exempt commercial purpose and any manufacturer or processor wishing to engage in a use of a chemical substance designated by EPA as a significant new use must submit a notice to EPA at least 90 days before commencing manufacture of the new chemical substance or before engaging in the significant new use.

The submitter of a notice to EPA for which EPA has made a finding of "not likely to present an unreasonable risk of injury to health or the environment" may commence manufacture of the chemical substance or manufacture or processing for the significant new use notwithstanding any remaining portion of the applicable review period.

II. Statements of Findings Under TSCA Section 5(a)(3)(C)

In this unit, EPA identifies the PMNs, MCANs and SNUNs for which EPA has made findings under TSCA section 5(a)(3)(C) that the new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. For the findings made

during this period, the following list provides the EPA case number assigned to the TSCA section 5(a) submission and the chemical identity (generic name if the specific name is claimed as confidential).

- P-25-0085-0088, Arylcarboxylic acid, polymer with alkanol, ester with substituted polyalkylene glycol (P-25-0085) (Generic Name); polymer of arylcarboxylic acid, glycol, polyalkylene glycol ether (P-25-0086) (Generic Name); polymer of arylcarboxylic acid, alkanediol and alcohols, alkoxyated (P-25-0087) (Generic Name); and polymer of arylcarboxylic acid, glycols and polyalkylene glycol ether (P-25-0088) (Generic Name).

- P-25-0089, Polymer of arylcarboxylic acid, sulfoarylcarboxylic acid, alkyl ester salt, glycols and oligoethylene glycol ether (Generic Name).

- P-25-0104, Alkyl alkenoic acid, substituted heteropolycyclic substituted alkyl ester, polymer with substituted carbopolycyclic, alkyl alkenoate, alkyl carbopolycyclic alkyl alkenoate and heteromonocyclic alkyl alkenoate (Generic Name).

- P-25-0142, Propenoic acid, methyl-, [bis(dimethyl)-trimethyl-bis(trimethylsilyl)oxy]-disiloxanyl ethyl silyl oxy]-dimethyl-[[trimethyl-bis(trimethylsilyl)oxy]-disiloxanyl ethyl]-disiloxanyl propyl ester (Generic Name).

To access EPA's decision document describing the basis of the "not likely to present an unreasonable risk" finding made by EPA under TSCA section 5(a)(3)(C), lookup the specific case number at <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/determined-not-likely>.
