

flexibility to create and use tailored information collection templates based on current program reporting requirements. This is important to allow for SAMHSA's:
 —Monitoring of compliance with federal practice, guidelines, and requirements,

—Oversight of the implementation of the scope of the grant activities with the grant recipients' proposed project,
 —Assessment of the efficiency and efficacy of recipient activities,
 —Quick understanding of and remediation to national, regional, and/or site-specific issues,

—Provision of additional support and technical assistance, as needed,
 —Documentation of promising practices, innovative services, and program strengths, and
 —Flexible and responsive oversight of federal funds.

Discussion

The Coast Guard is making available a report titled “Monetizing the Benefits of Avoided Oil Spills in the Maritime Environment” prepared by Industrial Economics Inc. This report was written to update the value of avoided oil spills used by the Coast Guard in regulatory analysis. Coast Guard has been using an avoided cost approach to value prevented oil spills in its regulatory analyses. The estimated cost which had been in use since 2008 was based on an average cost per gallon spilled and was developed using data about payments from the Oil Spill Liability Trust Fund that occurred from 2002-2007. Coast Guard has updated our methods for

³ The hourly wage estimate is \$30 based on the Occupational Employment and Wages, Mean

2024. (<https://www.bls.gov/oes/current/oes210000.htm>).

valuing avoided oil spills using newer, more current data and revised methods. In this report, we describe our review of available literature and datasets, our selection of a valuation method based on current best practices, and the development of recommended values. We request your comments on the data, methodology, models, and findings presented in this report. A copy of the report is available in the docket.

This notice is issued under authority of 5 U.S.C. 552.
