*Title of Collection:* Student Support Services Annual Performance Report.

*OMB Control Number:* 1840-0525.

*Type of Review:* Revision of a currently approved ICR.

*Respondents/Affected Public:* Private Sector; State, Local, and Tribal Governments.

*Total Estimated Number of Annual Responses:* 1,181.

*Total Estimated Number of Annual Burden Hours:* 18,129.

*Abstract:* Student Support Services (SSS) program grantees must submit the Annual Performance Report (APR) annually. The reports are used to evaluate grantees' performance for substantial progress, respond to Government Performance and Results Act requirements, and award prior experience points at the end of each project (budget) period. The Department also aggregates the data to provide descriptive information on the projects and to analyze the impact of the SSS program on the academic progress of participating students.

Total burden hours have been adjusted to reflect an increase in the size of the reporting universe. In addition, the collection has been updated to include the Competitive Preference Priorities used in the Fiscal Year 2025 competition for new awards. No change in burden is associated with this update.

**SUPPLEMENTARY INFORMATION:** Port Arthur LNG requests a short-term blanket authorization to export LNG that has been previously imported into the United States from foreign sources for a two-year period commencing "as early as practicable, but no later than October 1, 2026." Port Arthur LNG states that it will export the LNG from the Port Arthur LNG terminal in Jefferson County, Texas (Port Arthur LNG Terminal), to any country with the capacity to import LNG via ocean-going carrier and with which trade is not prohibited by U.S. law or policy. This includes both countries with which the United States has entered into a free trade agreement (FTA) requiring national treatment for trade in natural gas (FTA countries) and all other countries (non-FTA countries). This Notice applies only to the portion of the Application requesting authority to export the LNG to non-FTA countries pursuant to section 3(a) of the NGA, 15 U.S.C. 717b(a).

Port Arthur LNG states that it already holds long-term authorizations to export domestically produced LNG from the Port Arthur LNG Terminal, in Docket Nos. 15-53-LNG, 18-162-LNG, and 15-96-LNG. Port Arthur LNG states that, prior to commencing commercial operations under these authorizations, it "intends to use cooldown cargoes with imported, foreign-sourced LNG to pre-cool its liquefaction facilities during start-up." Port Arthur LNG notes that, "[a]fter the imported LNG completes the cooling process, Port Arthur LNG will 're-export' the LNG," and thus it "seeks authorization from DOE/HCEO to export the previously imported, foreign-sourced LNG used in its cooldown cargoes." Port Arthur LNG further states that it does not seek authorization to export domestically produced natural gas or LNG.

Port Arthur LNG requests this authorization on its own behalf and as agent for other entities that hold title to the LNG at the time of export. Additional details can be found in Port Arthur LNG's Application, posted on the DOE website at <https://www.energy.gov/sites/default/files/2026-05/Port%20Arthur%20Application%20for%20Blanket%20Authorization%20to%20Export%20Previously%20Imported%20LNG.pdf>.

**DOE Evaluation**

In reviewing Port Arthur LNG's Application, DOE will consider any issues required by law or policy under NGA section 3(a), DOE's regulations, and any other documents deemed appropriate. Parties that may oppose the

Application should address these issues and documents in their comments and/or protests, as well as other issues deemed relevant to the Application.
