Abstract of Information Available*Accession 253*

Human remains representing at least 22 individuals, have been identified. No associated funerary objects are present.

The human remains are from accession 253. The collection history of Chico State has largely been from the county where the campus resides, Butte County, and the surrounding counties that are part of the campus' service region. While the exact provenience of these human remains is unknown, it is reasonable to conclude, based on the collection history of the campus, that these human remains are from within the boundaries of Butte County and Chico State's service region. Due to non-existence of records, accession 253 essentially became Chico State's general accession for Native American human remains that have been disassociated from any site information.

The University is unaware of the human remains listed above being treated with pesticides, preservatives, or other substances that may pose a hazard to the remains or to those handling them.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the acquisition history of the human remains described in this notice.

Determinations

Chico State has determined that:

- The human remains described in this notice represent the physical remains of at least 22 individuals of Native American ancestry.
- There is a connection between the human remains described in this notice and the Mechoopda Indian Tribe of
