#### Article VIII

The Commission, upon its own initiative after reasonable notice and opportunity for hearing to the State, or upon request of the Governor of Indiana, may terminate or suspend all or part of this Agreement and reassert the licensing and regulatory authority vested in it under the Act, if the Commission finds that (1) such termination or suspension is required to protect the public health and safety, or (2) the State has not complied with one or more of the requirements of Section 274 of the Act. The Commission shall periodically review actions taken by the State under this Agreement to ensure compliance with Section 274 of the Act, which requires a State program to be adequate to protect the public health and safety with respect to the materials covered by this Agreement and to be compatible with the Commission's program.

## NUCLEAR REGULATORY COMMISSION

[NRC-2024-0036]

### Draft Regulatory Guide: Preparing Probabilistic Fracture Mechanics Submittals

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice; discontinuation.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is discontinuing Draft Regulatory Guide (DG) DG-1422, "Preparing Probabilistic Fracture Mechanics Submittals." DG-1422 is being discontinued because the proposed guidance does not provide the clarity sought by the NRC staff for preparing regulatory applications using

probabilistic fracture mechanics (PFM) as a technical basis.

**DATES:** The discontinuation of DG–1422 takes effect on June 5, 2026.

**ADDRESSES:** Please refer to Docket ID NRC–2024–0036 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

**SUPPLEMENTARY INFORMATION:**

**I. Discussion**

The NRC is discontinuing DG–1422, “Preparing Probabilistic Fracture Mechanics Submittals.” DG–1422 describes a framework to develop the contents of a licensing submittal that the staff of the NRC considers acceptable when performing PFM analyses in

support of regulatory applications. This DG was intended to revise Regulatory Guide (RG) 1.245, “Preparing Probabilistic Fracture Mechanics Submittals.” The NRC provided an opportunity for public comment on Revision 0 (ADAMS Accession No. ML23291A298) and Revision 1 (ADAMS Accession No. ML24312A308) to DG–1422 in the **Federal Register** on February 29, 2024 (89 FR 14782), and August 8, 2025 (90 FR 38512), respectively. After reviewing the public comments, the staff found that the proposed guidance does not provide the clarity sought for preparing regulatory applications using PFM as a technical basis. In addition, the staff has determined that the expected benefit to nuclear stakeholders is not sufficient to justify further action to revise RG–1.245.

Although DG–1422 will not be issued as final guidance, the comments received during the public comment period may be considered by the NRC staff in the future for the development of any related guidance. Should the NRC develop such guidance, it will inform the public through a new notice of availability of the documents for public comment.

This notice documents final staff action on docket NRC–2024–0036. No further action is expected for this docket.

**II. Submitting Suggestions for Improvement of Regulatory Guides**

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC’s public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the “Regulatory Guide” series.
