[Docket Number FRA–2010–0031]

**Long Island Rail Road’s Request To Amend Its Positive Train Control System**

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Notice of availability and request for comments.

**SUMMARY:** This document provides the public with notice that, on May 21, 2026, Long Island Rail Road (LIRR) submitted a request for amendment (RFA) to its FRA-certified positive train control (PTC) system. FRA is publishing this notice and inviting public comment on the railroad’s RFA to its PTC system.

**DATES:** FRA will consider comments received by June 25, 2026. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

**ADDRESSES:**

*Comments:* Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

*Instructions:* All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA–2010–0031. For convenience, all active PTC dockets are hyperlinked on FRA’s website at <https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets>. All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information.

**FOR FURTHER INFORMATION CONTACT:** Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816–516–7168, email: [Gabe.Neal@dot.gov](mailto:Gabe.Neal@dot.gov).

**SUPPLEMENTARY INFORMATION:** In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad’s PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC

system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA’s approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA’s regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that on May 21, 2026, LIRR submitted an RFA to its PTCSP for its Advanced Civil Speed Enforcement System II (ACES II), which seeks FRA’s approval for a temporary ACES II outage on approximately four miles of the Main Line Branch to facilitate modifications to Queens interlocking complex, including the addition of signals. That RFA is available in Docket No. FRA–2010–0031.

Interested parties are invited to comment on LIRR’s RFA by submitting written comments or data. During FRA’s review of this railroad’s RFA, FRA will consider any comments or data submitted within the timeline specified in this notice, and, to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. See 49 CFR 236.1021; see also 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad’s RFA at FRA’s sole discretion.

**Privacy Act Notice**
