

potential liability as early in the adjudication process as possible. Forms CM-2790 and CM-2970a are used for claims filed after January 19, 2001, and indicate that the coal mine operator will submit additional evidence or respond to the notice of claim. Black Lung Benefits Act section 426 authorizes this information collection. See 30 U.S.C. 936.

This information collection is currently approved for use through October 31st, 2026.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Written comments will receive consideration and be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention 1240-0033.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

## II. Desired Focus of Comments

OWCP is soliciting comments concerning the proposed information collection related to the Operator Response to Schedule for the Submission of Additional Evidence and Operator Response to Notice of Claim. OWCP is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of OWCP's estimate of the burden related to the information collection, including the validity of the methodology and assumptions used in the estimate;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the information collection on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Documents related to this information collection request are available at <https://regulations.gov> and at DOL-OWCP located at 200 Constitution Avenue NW, Room C-3520, Washington, DC 20210. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

## III. Current Actions

This information collection request concerns Operator Response to Schedule for the Submission of Additional Evidence and Operator Response to Notice of Claim. OWCP has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

*Type of Review:* Revision of a currently approved collection.

*Agency:* Office of Workers' Compensation Programs.

*OMB Number:* 1240-0033.

*Affected Public:* Private Sector-businesses or other for profits.

*Number of Respondents:* 8,230.

*Number of Responses:* 11,470.

*Annual Burden Hours:* 2,644 hours.

*Annual Respondent or Recordkeeper Cost:* \$2,923.

*OWCP Forms:* Operator Response to Schedule for the Submission of Additional Evidence (CM-2970) and Operator Response to Notice of Claim (CM-2970a).

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at <https://www.reginfo.gov>.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NASA Document Number: 26-033; NASA Docket Number: NASA-2026-0265]

### Name of Information Collection: JSC Form 1830 Report of Medical Examination

**AGENCY:** National Aeronautics and Space Administration (NASA).

**ACTION:** Notice of Renewal of Information Collection, correction.

**SUMMARY:** NASA, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act (PRA) of 1995.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to NASA PRA Clearance Officer, Stayce Hoult, NASA Headquarters, 300 E Street SW, JC0000, Washington, DC 20546, or email [hq-ocio-pra-program@mail.nasa.gov](mailto:hq-ocio-pra-program@mail.nasa.gov).

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of June 3, 2026, in FR Doc. 2026-11109, on page 33235, in the second column on page 33236, add the OMB Number: in the III Data section to read: "2700-0170".

**Nanette Smith,**

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-289; EAXX-429-00-000-1773009788; NRC-2026-0397]

### Constellation Energy Generation, LLC; Christopher M. Crane Clean Energy Center; Draft Environmental Assessment and Draft Finding of No Significant Impact

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft environmental assessment (EA) and draft finding of no significant impact (FONSI) regarding the evaluation of the reasonably foreseeable environmental effects from proposed Federal actions related to reauthorizing

power operations at the Christopher M. Crane Clean Energy Center (CCEC). Specifically, the NRC is considering issuance of an exemption and three license amendments, which were requested by Constellation Energy Generation, LLC (CEG) to support the potential reauthorization of power operations at the CCEC. The U.S. Department of Energy (DOE) Office of Energy Dominance Financing (EDF) is a cooperating agency on the draft EA. The DOE EDF's proposed action is a decision on providing Federal financial assistance (a loan guarantee) for refueling and resumption of power operations at the CCEC.

**DATES:** Submit comments by July 8, 2026. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

**ADDRESSES:** You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–0397. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: [Bridget.Curran@nrc.gov](mailto:Bridget.Curran@nrc.gov). For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Email:* Comments may be submitted to the NRC electronically using the email address [CCECRestartEnvironmental@nrc.gov](mailto:CCECRestartEnvironmental@nrc.gov).

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

**FOR FURTHER INFORMATION CONTACT:** Kevin Folk, telephone: 301–415–6944; email: [Kevin.Folk@nrc.gov](mailto:Kevin.Folk@nrc.gov), or Ashley Waldron, telephone: 301–415–7317; email: [Ashley.Waldron@nrc.gov](mailto:Ashley.Waldron@nrc.gov). Both are staff of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

**SUPPLEMENTARY INFORMATION:**

## I. Obtaining Information and Submitting Comments

### A. Obtaining Information

Please refer to Docket ID NRC–2026–0397 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–0397.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin ADAMS Public Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to [PDR.Resource@nrc.gov](mailto:PDR.Resource@nrc.gov). The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in the document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to [PDR.Resource@nrc.gov](mailto:PDR.Resource@nrc.gov) or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

- *Public Library:* A copy of the draft EA and draft FONSI is available for public review at the following public library location: Middletown Public Library, 20 North Catherine Street, Middletown, PA 17057.

- *NRC Public Project Website:* The draft EA and draft FONSI along with information regarding the CCEC, including licensing, operation, decommissioning, and potential restart, is available at <https://www.nrc.gov/info-finder/reactors/ccec>.

### B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2026–0397 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS.

The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

## II. Introduction

The CCEC, formerly Three Mile Island Nuclear Station, Unit 1 (TMI–1), consists of a single pressurized-water nuclear reactor located in Dauphin County, Pennsylvania, on Three Mile Island in the Susquehanna River. Originally licensed for operation on April 19, 1974, the NRC issued a renewed facility operating license (RFOL) for TMI–1 on October 22, 2009, with the license term expiring on April 19, 2034.

On June 20, 2017, and September 26, 2019, Exelon Generation Company, LLC, the licensee who then operated the facility, submitted certifications that it would permanently cease operations of TMI–1 and had permanently removed fuel from the reactor vessel, respectively, in accordance with paragraph 50.82(a)(1) of title 10 of the *Code of Federal Regulations* (10 CFR). Upon the NRC's docketing of these certifications, the RFOL license no longer authorized operation of the reactor or emplacement or retention of fuel into the reactor vessel, as provided by 10 CFR 50.82(a)(2).

CEG is seeking to return the CCEC to power operations and has submitted for NRC approval an exemption request and three license amendment requests (LARs) in support of allowing the resumption of power operations through April 19, 2034, the previous expiration date of the facility's RFOL.

A notice of opportunity to request a hearing and petition for leave to intervene was published in the **Federal Register** on February 24, 2026, regarding the three LARs. Consistent with the Atomic Energy Act of 1954, as amended (the Act), and the NRC's regulations, the NRC did not publish a notice of opportunity for hearing on the exemption request.

The NRC staff has prepared a draft EA and draft FONSI documenting its environmental review of the proposed actions related to reauthorizing power operations at the CCEC. Based on its

environmental review, the NRC staff has made the preliminary determination that the proposed actions will not have a significant effect on the quality of the human environment. Therefore, the NRC staff has made the preliminary determination that it will not prepare an environmental impact statement (EIS) for the proposed actions and that a FONSI is warranted.

The NRC staff will consider comments on the draft EA and draft FONSI received over a 30-day public comment period from Federal, State, local, and Tribal officials and members of the public. After consideration of these comments, the NRC staff will make a final determination regarding whether it will prepare an EIS for the proposed actions or whether a FONSI is warranted.

The environmental review included fulfillment of the NRC's obligations related to Section 106 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 300101, *et seq.*) (NHPA). The regulation in section 800.8 of title 36 of the *Code of Federal Regulations* (36 CFR), "Coordination with the National Environmental Policy Act," allows agencies to use their National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*) process to fulfill the requirements of Section 106 of the NHPA. Therefore, pursuant to 36 CFR 800.8(c), the NRC used its process for the preparation of the EA on the proposed actions to comply with Section 106 of the NHPA in lieu of the procedures set forth at 36 CFR 800.3 through 800.6.

### III. Summary of Draft Environmental Assessment

#### *Description of the Proposed Federal Actions and Need*

The NRC's proposed actions are decisions on whether to grant or deny CEG's interdependent, connected licensing and regulatory requests, including any revisions or supplements thereto or other regulatory or licensing requests submitted to the NRC, that are necessary to support reauthorizing power operations and refueling of the CCEC reactor. The DOE EDF's proposed action is a decision on providing Federal financial assistance for refueling and resumption of power operations at the CCEC pursuant to CEG's loan guarantee agreement with the DOE that was issued pursuant to the Energy Policy Act (EPA) of 2005.

The need for the NRC proposed actions, which would collectively support the reauthorization of power operations and refueling of the CCEC under the existing RFOL, is to provide

835 megawatts-electric of baseload power generation capability to the Pennsylvania, New Jersey, and Maryland electric grid. In support of its decision to pursue the resumption of power operations at the CCEC, CEG cites a 20-year power purchase agreement signed in 2024 with Microsoft to supply carbon-free energy from the CCEC to Microsoft's data centers located within the PJM Interconnection LLC's electric grid.

The need for the DOE proposed action (Federal financial assistance in the form of a loan guarantee) is to implement DOE's authority under Title XVII of the EPA of 2005, which was reauthorized, amended, and revised by the Inflation Reduction Act of 2022 (42 U.S.C. 16517) and the One Big Beautiful Bill Act (Pub. L. 119–21 (July 4, 2025)) to create the EDF Program. The purpose of the EDF Program is to finance projects and facilities in the United States that retool, repower, repurpose, or replace energy infrastructure that has ceased operations or enable operating energy infrastructure to increase capacity or output.

#### *Environmental Impacts of the Proposed Federal Actions*

In the draft EA, the NRC staff assessed the potential reasonably foreseeable environmental effects (impacts) from the proposed actions associated with the following relevant resource areas: land use and visual resources; meteorology, air quality, and noise; surface water resources; groundwater resources, ecological resources (terrestrial and aquatic); Federally protected ecological resources, historic and cultural resources; socioeconomic conditions; radiological and nonradiological human health; waste management; uranium fuel cycle and transportation; and postulated accidents. The NRC staff also considered decommissioning impacts as well as greenhouse gas emissions and climate change effects. The NRC staff determined that the environmental impacts of the proposed actions would be NOT SIGNIFICANT for each potentially affected environmental resource area. In addition, the NRC staff determined that the projected effects of climate change would not alter any of the impact determinations described in the EA.

#### *Environmental Impacts of Alternatives to the Proposed Federal Actions*

The NRC staff considered a reasonable range of alternatives to the proposed actions, including an analysis of any environmental impacts of not implementing the proposed actions (*i.e.*, the no-action alternative). The NRC staff

determined that there are no alternatives that meet the need for the proposed actions. For the no-action alternative, the NRC staff determined that the environmental impacts could potentially be SIGNIFICANT. In contrast, the potential environmental impacts from the proposed actions of reauthorizing power operations at the existing CCEC would be NOT SIGNIFICANT for each potentially affected environmental resource area. Therefore, the NRC staff concluded that there are no environmentally preferable alternatives to the proposed actions.

### IV. Draft Finding of No Significant Impact

The proposed Federal actions before the NRC are whether to grant requests for an exemption and license amendments to support reauthorizing power operations at the CCEC through the remainder of its RFOL term (to April 19, 2034). The NRC staff has conducted an environmental review of these actions and prepared a draft EA. This draft FONSI incorporates by reference the draft EA summarized in Section III of this notice and referenced in Section V of this notice. Based on its preliminary determination in the draft EA that the environmental impacts of the proposed actions would be NOT SIGNIFICANT for each potentially affected resource area, the NRC staff is issuing a draft determination that the proposed Federal actions will not have a significant effect on the quality of the human environment. Accordingly, the NRC staff has made a draft determination not to prepare an EIS for the proposed Federal actions and that a FONSI is warranted.

This draft FONSI and the related environmental documents are available for public inspection as discussed in the draft EA and Section I of this notice. Before making its final determination, the NRC staff will consider comments on the draft EA and draft FONSI received over a 30-day public comment period from Federal, State, Tribal, and local officials and members of the public. Once the NRC staff makes its final determination, the NRC will publish the final EA and final FONSI or proceed to prepare an EIS. At the conclusion of the NRC environmental review, the DOE EDF would publish a separate notice or decision document, as appropriate.

### V. Availability of Documents

The documents identified in the following table are available to interested parties through ADAMS, as indicated.

Document description	ADAMS accession No./ Federal Register Notice
Draft Environmental Assessment and Draft Finding of No Significant Impact for the Christopher M. Crane Clean Energy Center Reauthorization of Power Operations Project, dated June 5, 2026. Constellation Energy Generation, LLC; Christopher M. Crane Clean Energy Center; Applications for Amendments to Renewed Facility License Involving Proposed No Significant Hazards Consideration Determination and Containing Safeguards Information and Order Imposing Procedures for Access to Safeguards Information; License amendment request (LAR); notice of opportunity to comment, request a hearing, and petition for leave to intervene; order imposing procedures, dated February 24, 2026.	ML26120A058.  ML26013A106; 91 FR 8910.

(Authority: 42 U.S.C. 2011 *et seq.*)

Dated: June 3, 2026.

For the Nuclear Regulatory Commission.

**BILLING CODE 7590-01-P**

**NUCLEAR REGULATORY COMMISSION**

[NRC-2026-2905]

**Policy Statement on Mandatory Hearings for Reactor Licensing**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Policy statement; issuance.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing a policy statement entitled “Policy Statement on Mandatory Hearings for Reactor Licensing.” This policy statement sets forth the NRC’s plan for conducting future mandatory hearings on reactor license and permit applications. The statement explains the rationale for adopting the process to be used going forward and describes the new process.

**DATES:** The policy statement is effective on June 8, 2026.

**ADDRESSES:** Please refer to Docket ID NRC-2026-2905 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:*

Electronically at <https://www.regulations.gov>.

Search for Docket ID NRC-2026-2905. Address questions about NRC dockets to Helen Chang; telephone: 301-415-3228; email: [Helen.Chang@nrc.gov](mailto:Helen.Chang@nrc.gov). For technical questions contact the individuals listed in the **FOR FURTHER INFORMATION**

**CONTACT** section of this document.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the

ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin ADAMS Public Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to [PDR.Resource@nrc.gov](mailto:PDR.Resource@nrc.gov). The “Policy Statement on Mandatory Hearings for Reactor Licensing” is available as an attachment to this document.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to [PDR.Resource@nrc.gov](mailto:PDR.Resource@nrc.gov) or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in the **SUPPLEMENTARY INFORMATION** section.

**FOR FURTHER INFORMATION CONTACT:** Sara Kirkwood, Office of the General Counsel, telephone: 301-287-9187, email: [Sara.Kirkwood@nrc.gov](mailto:Sara.Kirkwood@nrc.gov); or Marcia Simon, Office of the General Counsel, telephone: 301-287-9176, email: [Marcia.Simon@nrc.gov](mailto:Marcia.Simon@nrc.gov); U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Pursuant to section 189a. of the Atomic Energy Act of 1954 (AEA), the NRC is required to “hold a hearing” after 30 days’ notice on certain reactor license applications (for construction permits, early site permits, and combined licenses). The NRC has reassessed and altered its approach to conducting these mandatory (or “uncontested”) hearings several times over the last two decades. For example, during this time span, the Commission itself (the five-member collegial body of principal officers that oversees the agency) has delegated and then reassumed the role of presiding officer at certain mandatory hearings and has streamlined the process to create a

hearing based entirely on written submittals from the applicant and the NRC staff (*see, e.g.*, SRM-SECY-21-0107, “Selection of Presiding Officer for Mandatory Hearings Associated with Construction Permit Applications” (ADAMS Accession No. ML22083A045), and SRM-SECY-24-0032, “Revisiting the Mandatory Hearing Process at the U.S. Nuclear Regulatory Commission” (ADAMS Accession No. ML24200A044)).

Because the AEA does not define “hearing” and does not specify the content of mandatory hearings or particular procedures to be used, the NRC has considerable discretion to establish the content and procedures for mandatory hearings. Historically, the NRC has chosen to structure the mandatory hearing as a confirmation of the sufficiency of the NRC staff’s technical review of the application, held after the NRC staff review is complete. However, the AEA does not specify when the mandatory hearing must take place or that it must include a sufficiency review.

The Accelerating Deployment of Versatile, Advanced Nuclear for Clean Energy Act of 2024 (ADVANCE Act), which was signed into law in July 2024, establishes requirements to enhance the NRC’s timeliness and efficiency in conducting nuclear power reactor licensing reviews. Section 207 of the ADVANCE Act specifically addresses the hearing process, requiring the NRC (for certain combined license applications) to, among other things, complete “any necessary public licensing hearings and related processes” not later than two years after docketing the application. Subsequently, in May of 2025, the President directed a series of reforms to improve the NRC’s efficiency and effectiveness in Executive Order (E.O.) 14300, “Ordering the Reform of the Nuclear Regulatory Commission.” As relevant to this policy statement, section 5(j) of E.O. 14300 directs the NRC to streamline its public hearing process.

In light of these significant developments, the NRC is revising the mandatory hearing process for reactor licensing in a manner that satisfies the
