

due to NEMIS-driven business rules (automatically), applicant request, or a FEMA caseworker request. The scope of an inspection for owners includes noting real and personal property (furnishing and appliances) damages to the interior and exterior of the dwelling, addressing special needs, transportation, unmet needs, and miscellaneous purchases. Inspectors do not note real property specifications for renters.

Once the inspector validates the information provided by the applicant during registration intake, the inspector begins an assessment of real and/or personal property damages utilizing Automated Construction Estimator (ACE) software. The same ACE software screens are used regardless of how the inspection occurs (*i.e.*, via onsite, via voice over the phone, or via video). The inspector then uploads this information back to FEMA via the NEMIS through use of a secure connection. The inspector only records observed disaster-caused damages and does not determine eligibility or damage award levels. FEMA's policies and business rules determine eligibility and award levels based upon the damage assessment and other available information.
