Background

The golden tilefish and blueline tilefish fisheries north of the North Carolina/Virginia border are managed under the Tilefish FMP, which outlines the process for establishing annual specifications. The Tilefish FMP requires the Mid-Atlantic Fishery Management Council (Council) to recommend acceptable biological catch (ABC), annual catch limit (ACL), annual catch target (ACT), total allowable landings (TAL), and other management measures for the commercial and recreational sectors of the fisheries. The Council’s Scientific and Statistical Committee (SSC) provides ABC recommendations for both species to the Council to derive these catch limits. The Council makes recommendations to NMFS that may not exceed the SSC’s
