financial company, as set forth in Regulation XX and summarized below.

Consolidated liabilities of a U.S. financial company that was subject to consolidated risk-based capital rules as of December 31 of the year being measured equal the difference between the U.S. financial company's risk-weighted assets (as adjusted upward to reflect amounts that are deducted from regulatory capital elements pursuant to the Federal banking agencies' risk-based capital rules) and total regulatory capital, as calculated under the applicable risk-based capital rules. Companies in this category include (with certain exceptions listed below) bank holding companies, savings and loan holding companies, and insured depository institutions. The Federal Reserve used information collected on the Consolidated Financial Statements for Holding Companies (''FR Y–9C'') and the Bank Consolidated Reports of Condition and Income (''Call Report'') to calculate liabilities of these institutions.

Consolidated liabilities of a U.S. financial company not subject to consolidated risk-based capital rules as of December 31 of the year being measured equal liabilities calculated in accordance with applicable accounting standards. Companies in this category include bank holding companies and savings and loan holding companies subject to the Federal Reserve's Small Bank Holding Company Policy Statement, savings and loan holding companies substantially engaged in insurance underwriting or commercial activities, and U.S. companies that control insured depository institutions but are not bank holding companies or savings and loan holding companies. ''Applicable accounting standards'' is defined as Generally Accepted Accounting Principles (''GAAP''), or such other accounting standard or method of estimation that the Board determines is appropriate.[4] The Federal Reserve used information collected on the FR Y–9C, the Parent Company Only Financial Statements for Small Holding Companies (''FR Y–9SP''), and the Financial Company Report of Consolidated Liabilities (''FR XX–1'') to calculate liabilities of these institutions.

Under Regulation XX, liabilities of a foreign banking organization's U.S. operations are calculated using the risk-weighted asset methodology for subsidiaries subject to the risk-based capital rule, plus the assets of all branches, agencies, and nonbank subsidiaries, calculated in accordance with applicable accounting standards. Liabilities attributable to the U.S. operations of a foreign financial company that is not a foreign banking organization are calculated in a similar manner to the method described for foreign banking organizations, and liabilities of a U.S. subsidiary not subject to the risk-based capital rule are calculated based on the U.S. subsidiary's liabilities under applicable accounting standards. The Federal Reserve used information collected on the Capital and Asset Report for Foreign Banking Organizations (''FR Y–7Q''), the FR Y–9C, and the FR XX–1 to calculate liabilities of these institutions.

By order of the Board of Governors of the Federal Reserve System, acting through the Director of Supervision and Regulation under delegated authority.

Benjamin W. McDonough,

Secretary of the Board.

[4] A financial company may request to use an accounting standard or method of estimation other than GAAP if it does not calculate its total consolidated assets or liabilities under GAAP for any regulatory purpose (including compliance with applicable securities laws). 12 CFR 251.3(e). In previous years, the Board received and approved requests from eleven financial companies to use an accounting standard or method of estimation other than GAAP to calculate liabilities. Ten of the companies were insurance companies that reported financial information under Statutory Accounting Principles (''SAP''), and one was a foreign company that controlled a U.S. industrial loan company that reported financial information under International Financial Reporting Standards (''IFRS''). For the insurance companies, the Board approved a method of estimation that was based on line items from SAP-based reports, with adjustments to reflect certain differences in accounting treatment between GAAP and SAP. For the foreign company, the Board approved the use of IFRS. Such companies that continue to be subject to Regulation XX continue to use the previously approved methods. The Board did not receive any new requests this year.

SUPPLEMENTARY INFORMATION:

A. Purpose

Executive Order 14400, Urgent National Action to Save College Sports, directs the Administrator of General Services to propose a regular collection of information to evaluate compliance with the rules covered in the E.O. to aid contract and grantmaking agencies' compliance with the E.O. starting August 1, 2026.

The System for Award Management (SAM or *SAM.gov*) serves as the primary registration and award management database for the U.S. Federal Government. SAM currently collects, validates, stores, and disseminates data in support of agency acquisition and financial assistance missions. SAM validates entity registration information and electronically shares the secure and encrypted data with Federal agency personnel to facilitate their award making and payments. Additionally, SAM shares its data with Federal Government procurement, financial assistance, and electronic business systems.

Both current and potential Colleges and Universities are required to register in SAM pursuant to Title 2 of the Code of Federal Regulations (CFR) and the Federal Acquisition Regulation (FAR) to receive specified Federal awards. Entities complete a registration process to provide basic information relevant to procurement and Federal financial assistance transactions. These entities may also report various information applicable to the federal award process in *SAM.gov.*

Registered entities identified as Higher Education Institutions during the SAM entity registration and meeting the $20M (adjusted for inflation) threshold for intercollegiate athletics activities revenue will certify their compliance quarterly with the terms within E.O. 14400. This certification information will be available for Federal officials for contract and grantmaking activities and compliance verification.

B. Annual Reporting Burden

Respondents: 11,720.

Responses per Respondent: 1–5 (1 for screening responses and 4 for certification responses).

Total Annual Responses: 14,620 (11,720 screening responses and 2,900 certification responses).

Hours per Response: 0.25 for screening response and 0.5 for certification response.

Total Burden Hours: $241,557 ($161,589.50 for screening response and $79,967.50 for certification response).

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary, whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a watermarked ''DRAFT'' copy of the supporting statement via the Federal eRulemaking portal at *regulations.gov* and searching for Docket ID ''GSA–GSA–2026–0265.'' Select the document titled ''Supporting Statement: 3090–XXXX—System for Award Management Quarterly Certification of Compliance with Executive Order 14400, Urgent National Action to Save College Sports—DRAFT'' located under Supporting and Related Material.
