• Supplementing Section VII.B, “Required Waivers to Law and Regulations,” 82 FR 52104 to explicitly identify the existing waiver of 5 U.S.C. Chapter 33, Section 3326, Appointments of Retired members of the armed forces to positions within the DoW. Waived as necessary to appoint a retired military member within the 180 period after retirement without having to receive a waiver. This clarification does not establish new authorities or waive any additional statutory or regulatory requirements, as the applicable provisions of Chapter 33, Subchapter I, are already waived, with the exception of sections 3302, 3321, and 3328.

• In compliance with federal mandate, removes terminology related to Diversity, Equity, and Inclusion from official documents, including but not limited to, the original FR notice, Position Requirements Document and Factor Descriptors (Sections II.A and II.D, 82 FR 52104).

V. Participating Organizations and Coverage

Eligible organizations must consist of at least one-third employees in coded acquisition positions and a combination of at least two-thirds acquisition employees and/or personnel directly supporting the acquisition mission.

POLICY JUSTIFICATION

Denmark—Joint Air-to-Surface Standoff Missiles with Extended Range

The Government of Denmark has requested to buy two hundred (200) AGM–158 Joint Air-to-Surface Standoff Missiles with Extended Range. The following non-major defense equipment items will also be included: JASSM test and support equipment, and containers; spare parts, consumables, accessories, and repair and return support; weapon system support; precise positioning Global Positioning System; classified and unclassified software delivery and support; classified and unclassified publications and technical documentation; site surveys; transportation support; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$842 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Denmark’s capability to meet current and future threats by providing the Royal Danish Air Force (RDAF) with the ability to conduct long-range precision strikes, strengthening RDAF F–35 aircraft capabilities. Denmark will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, located in Orlando, FL. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Denmark.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 26–73

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AGM–158 Joint Air-to-Surface Standoff Missile with Extended Range (JASSM–ER) All Up Round is a low-observable, highly survivable, subsonic cruise missile designed to penetrate next-generation air defense systems enroute to target. The JASSM–ER is designed to kill hard, medium-hardened, soft, and area type targets. The extended range over the baseline was obtained by going from a turbo jet to a turbo-fan engine and by reconfiguring the fuel tanks for added capacity. Precise positioning is provided by either selective availability anti-spoofing module or M-Code.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Denmark can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been

authorized for release and export to the Government of Denmark.
