Title of Collection: Survey of Graduate Students and Postdoctorates in Science and Engineering.

OMB Control Number: 3145–0062.

Type of Request: Intent to seek approval to extend an information collection for three years.

Summary of Collection: The Survey of Graduate Students and Postdoctorates in Science and Engineering (GSS), sponsored by the NCSES within the U.S. NSF and the National Institutes of Health, is designed to comply with legislative mandates by providing information on the characteristics of academic graduate enrollments in science, engineering and health fields. This request to extend the information collection for three years is to cover the

2026, 2027, and 2028 GSS survey cycles. The information collected by the GSS is solicited under the authority of the National Science Foundation Act of 1950, as amended and the America COMPETES Reauthorization Act of 2010. Data collection starts each fall in October and data are obtained primarily through a Web survey. Data are disseminated annually. All information will be used for statistical purposes only. Participation in the survey is voluntary.

To improve coverage of postdocs, the GSS periodically collects information on postdocs employed in Federally Funded Research and Development Centers (FFRDCs). This survey of postdocs at FFRDCs will be conducted as part of the 2027 GSS survey cycle.

Additional details regarding this survey are provided in an earlier **Federal Register** Notice, at 91 FR 11340.

Use of the Information: The GSS data are routinely provided to Congress, other parts of NSF, other Federal agencies, the GSS institutions

themselves, and several professional societies. In addition, the National Institutes of Health (NIH) publish GSS data annually in the NIH Data Book <https://report.nih.gov/nihdatabook/>.

Expected Respondents: The GSS is an annual census of all eligible academic institutions in the U.S. with graduate programs in science, engineering, and health fields. The response rate is calculated based on the number of reporting units (departments, programs, research centers, and health care facilities) that respond to the survey. For reference, in 2024, the GSS population was 23,121 units reported from 635 academic institutions. Based on recent cycles NCSES expects the annual response rate to be around 98 percent.

Estimate of Burden: The total estimated respondent burden of the GSS, including 2,000 hours for potential methodological studies to improve the survey procedures, will be 52,855 hours over the three-cycle survey clearance period.

TABLE 1—GSS ESTIMATED RESPONSE BURDEN

Category	Respondents (# of school coordinators)	Total burden (hours)
Total burden for 2026	793	16,886
Total burden for 2027	839	17,009
<i>GSS institutions</i>	798	16,923
<i>FFRDCs</i>	41	86
Total burden for 2028	803	16,960
Potential future methodological studies (across all 3 survey cycles)		2,000
Total estimated burden	2,435	52,855
Estimated average annual burden	812	17,618

Comments: As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through publication of a 60-Day Notice in the **Federal Register** on March 9, 2026, at 91 FR 11340. NCSES received no comments.

Dated: June 15, 2026.

Reports Clearance Officer, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-9075; NRC-2024-0129]

Powertech USA, Inc.; Dewey-Burdock In Situ Uranium Recovery Project; Environmental Assessment, Finding of No Significant Impact, and Final Programmatic Agreement

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering the renewal of source and byproduct materials license SUA-1600 for Powertech USA, Inc.'s (Powertech or licensee) Dewey-Burdock in situ uranium recovery (ISR) project in Custer and Fall River counties, South Dakota, for an additional 20 years. Powertech plans to recover uranium from the ore body and produce yellowcake using the ISR process. Yellowcake, the uranium oxide product of the ISR process, is used in the production of fuel for commercially operated nuclear power

reactors. The NRC staff is issuing an environmental assessment (EA), finding of no significant impact (FONSI), and Section 106 Programmatic Agreement (PA) associated with the proposed licensing action.

DATES: The EA and FONSI and Section 106 PA referenced in this document are available on June 17, 2026.

ADDRESSES: Please refer to Docket ID NRC-2024-0129 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- **Federal Rulemaking Website:** Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0129. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301-415-1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
