

Transmittal No. 26–63

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Assault Amphibious Vehicle (AAV) is a fully tracked amphibious landing vehicle used to maneuver surface assault elements of the landing force. Its equipment from assault shipping during amphibious operations to inland objectives and to conduct mechanized operations and related combat support in subsequent operations ashore.

2. The AAVC–7A1 family of vehicles includes the Command Variant, which is an armored assault amphibious full-tracked landing vehicle. The vehicle provides a mobile task force communication center in amphibious operations from ship to shore through surf zone to inland objectives.

3. The AAVR–7A1 family of vehicles includes the Recovery Variant, which is an armored assault amphibious full-tracked vehicle. The vehicle is designed to recover vehicles and provide field support maintenance.

4. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that Italy can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Italy.

POLICY JUSTIFICATION

Korea—Joint Direct Attack Munitions

The Republic of Korea has requested to buy seven hundred eight (708) KMU-557 Joint Direct Attack Munitions (JDAM) tail kits; and fifty-eight (58) KMU-572 JDAM guidance sets. The following non-major defense equipment items will also be included: weapons support equipment; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$106 million.

This proposed sale will support the foreign policy and national security

objectives of the United States by improving the security of a major ally that is an important force for political stability and economic progress in the Indo-Pacific region.

The proposed sale will improve the Republic of Korea's capability to meet current and future threats by expanding its critical air defense capability in the region and ensuring interoperability with U.S. Forces. The Republic of Korea will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be The Boeing Company, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Republic of Korea.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. Joint Direct Attack Munitions (JDAM) are bomb bodies with warhead-specific tail kits that contain Inertial Navigation System (INS) Global Positioning System (GPS) guidance, which provide accurate and adverse weather smart munitions. The JDAM can target enemies from a modest standoff range at high and low altitudes against land and surface targets, day or night. The JDAM can receive target coordinates from preplanned mission data from the delivery aircraft onboard aircraft sensors, during captive carry, or from a third-party source via manual or automated aircrew cockpit entry.

2. The KMU-557 is the tail kit for a GBU-56 (2,000-pound Laser JDAM).

3. The KMU-572 is the tail kit for a GBU-38 (500-pound JDAM).

4. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software
