

conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the applicant apply for a supplemental type certificate to modify any other model included on the same type certificate to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Dassault Aviation Model Falcon 900EX airplane must comply with the exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Dassault Aviation Model Falcon 900EX airplane will incorporate the following novel or unusual design feature:

The installation of a digital systems architecture that will allow increased connectivity to and access from external network sources, (e.g., operator networks, wireless devices, internet connectivity, service provider satellite communications, electronic flight bags, etc.) to the airplane's previously isolated electronic assets (networks, systems, and databases).

Discussion

The Dassault Model Falcon 900EX airplane's electronic system architecture and network configuration change is novel or unusual for commercial transport airplanes because it may allow increased connectivity to and access from external network sources, airline operations, and maintenance networks to the airplane control domain, and airline information services domain. The airplane's control domain and airline information-services domain perform functions required for the safe operation and maintenance of the airplane. Previously, these domains had very limited connectivity with external network sources. This data network and design integration creates a potential for unauthorized persons to access the airplane's control domain and airline information-services domain and presents security vulnerabilities related to the introduction of computer viruses and worms, user errors, and intentional sabotage of airplane electronic assets (networks, systems, and databases)

critical to the safety and maintenance of the airplane.

The existing FAA regulations did not anticipate these networked airplane-system architectures. Furthermore, these regulations and the current guidance material do not address potential security vulnerabilities, which could be exploited by unauthorized access to airplane networks, data buses, and servers. Therefore, these special conditions ensure that the security (i.e., confidentiality, integrity, and availability) of the airplane's systems is not compromised by unauthorized wired or wireless electronic connections. This includes ensuring that the security of the airplane's systems is not compromised during maintenance of the airplane's electronic systems.

These special conditions also require the applicant to provide appropriate instructions to the operator to maintain all electronic-system safeguards that have been implemented as part of the original network design so that this feature does not allow or introduce security threats. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the Dassault Aviation Model Falcon 900EX airplane. Should Honeywell apply at a later date for a supplemental type certificate to modify any other model included on Type Certificate No. A46EU to incorporate the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only a certain novel or unusual design feature on Dassault Aviation Model Falcon 900EX airplanes. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of this feature on the airplane.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 40113, 44701, 44702, and 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the

Administrator, the following special conditions are issued as part of the type certification basis for Dassault Aviation Model Falcon 900EX airplanes, as modified by Honeywell.

1. The applicant must ensure airplane electronic system security protection from access by unauthorized sources external to the airplane, including those possibly caused by maintenance activity.

2. The applicant must ensure that electronic system security threats are identified and assessed, and that effective electronic system security protection strategies are implemented to protect the airplane from all adverse impacts on safety, functionality, and continued airworthiness.

3. The applicant must establish appropriate procedures to allow the operator to ensure that continued airworthiness of the aircraft is maintained, including all post type certification modifications that may have an impact on the approved electronic system security safeguards.

Issued in Fort Worth, Texas, on June 15, 2026.

Jorge R. Castillo,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[ED–2026–OSERS–0530]

Final Waivers and Extensions of the Project Periods With Funding for the American Indian Vocational Rehabilitation Services Program and the American Indian Vocational Rehabilitation Training and Technical Assistance Center

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education (Department)

ACTION: Final waivers and extensions of project periods with funding.

SUMMARY: The Secretary waives the requirements in the Education Department General Administrative Regulations that generally prohibit project periods exceeding five years and project period extensions involving the obligation of additional Federal funds. The waivers and extensions enable 43 American Indian Vocational Rehabilitation Services (AIVRS) projects under Assistance Listing Number (ALN) 84.250N and one American Indian

Vocational Rehabilitation Training and Technical Assistance Center (AIVRTTAC) under ALN 84.250Z to receive funding for an additional period, not beyond September 30, 2027.

DATES: These waivers and extensions of the project periods are effective July 20, 2026.

FOR FURTHER INFORMATION CONTACT: August Martin. Telephone: 202-987-0116. Email: August.Martin@ed.gov.

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7-1-1.

SUPPLEMENTARY INFORMATION: On April 2, 2026, the Department published in the **Federal Register** (91 FR 16599) a proposal to waive the requirements in the Education Department General Administrative Regulations that generally prohibit project periods exceeding five years and extend the project periods with funding to enable 43 AIVRS projects under Assistance Listing Number (ALN) 84.250N, and one AIVRTTAC project under 84.250Z currently in their fifth year, to receive funding for an additional period, not beyond September 30, 2027.

There are no differences between the notice of proposed waivers and extensions of the project periods with funding and this notice of final waivers and extensions of the project periods with funding, as discussed in the *Analysis of Comments and Changes* section of this document.

Public Comment

In response to the Department's invitation in the notice of proposed waivers and extensions of the project periods with funding, 25 parties submitted 27 comments with two comments counted as duplicate.

Generally, the Department does not address technical and other minor changes or suggested changes the law does not authorize the Department to make under the applicable statutory authority. In addition, the Department does not address general comments that raised concerns not directly related to the proposed waivers and extensions of the project periods with funding.

Analysis of Comments and Changes

An analysis of the comments and of any changes since publication of the notice of proposed waiver and extension of the project period with funding follows.

Comment: Sixteen commenters submitted comments in support of the extensions of the project periods with funding, stating the extension is necessary for the continuity of

vocational rehabilitation (VR) services to existing VR program participants.

Discussion: We appreciate the commenters' support for the waivers and extensions and agree that funding this extension will continue to provide VR services to existing participants.

Change: None.

Comment: Several commenters submitted comments that were generally supportive of the AIVRS or AIVRTTAC programs but did not provide specific feedback on the proposed waivers and extensions, including a few commenters that shared support for a specific AIVRS project, a few commenters requesting waivers and extensions for specific AIVRS grants, and a few commenters that advocated for continued and consistent funding for the AIVRS and AIVRTTAC programs.

Discussion: The Department appreciates the commenters feedback on and support for the programs but does not address general comments not directly related to the proposed waivers and extensions with funding.

Change: None.

Comment: One commenter shared support for the proposed waivers and extensions for the 43 projects under the AIVRS program but raised concerns with the proposed waiver and extension for the grant project under the AIVRTTAC program, citing specific experience related to the current grant project. The commenter advocated that the Department address various performance and compliance concerns as a condition of any extension of the current grantee's project period.

Discussion: The Department appreciates the commenter's feedback on the AIVRTTAC program. The Department reiterates that, following the finalization of these waivers and extensions, all impacted grantees would be able to request continuation funding for an additional year. In that request, all grantees would need to certify that they have the capacity to continue activities. Additionally, in making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application, or whether the continuation of the project is in the best interest of the Federal Government. The Secretary also considers whether the

grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23). In making any continuation award determination, the Secretary may consider all relevant information.

We also note that the Department conducts routine risk evaluations of grantees over the course of the grant period, as well as ongoing monitoring of and communication with grantees regarding risk, compliance, and performance, aligned with the Guidance for Federal Financial Assistance in 2 CFR part 200, as adopted and amended as regulations of ED in 2 CFR part 3474, and the Education Department General Administrative Regulations in 34 CFR part 75.

Changes: None.

Final Waivers and Extensions

The Department believes that it is in the public interest to extend the AIVRS program and the AIVRTTAC in lieu of running a new competition in FY 2026.

Extending the project end dates of the 43 AIVRS and one AIVRTTAC grants for one year allows for efficient continuity of VR services for American Indians with disabilities. Pending FY 2027 appropriations, there may be new competitions for all eligible applicants.

For these reasons, the Department waives the requirements in 34 CFR 75.250, which prohibit project periods exceeding five years, as well as the requirements in 34 CFR 75.261(a) and (c)(2), which allow the extension of a project period only if the extension does not involve the obligation of additional Federal funds. These waivers allow the Department to consider FY 2026 continuation awards to the 43 AIVRS projects (ALN 84.250N) and one AIVRTTAC project (ALN 84.250Z) based on their Year 5 planned amount. It is estimated that each grantee's continuation award will be at the amounts listed within the Proposed Waivers and Extensions as published in the **Federal Register** (91 FR 16599), pending review and discussion of carryover.

Any activities to be carried out during the year of these continuation awards have to be consistent with, or a logical extension of, the scope, goals, and objectives of the grantees' applications as approved in the FY 2021 AIVRS and AIVRTTAC competitions. The FY 2021 AIVRS and AIVRTTAC Notices Inviting Applications continue to govern each grantee's project during the extension.

The requirements for continuation determinations and awards are set forth in 34 CFR 75.253.

Regulatory Flexibility Act Certification

The Secretary certifies that the waivers and extensions of the project periods with funding would not have a significant economic impact on a substantial number of small entities. The extension of existing project periods imposes minimal compliance costs, and the activities required to support the additional year of funding would not impose additional regulatory burdens or require unnecessary Federal supervision. The only entities that are affected by the waivers and extensions of the project periods are the 43 ALN 84.250N and the ALN 84.250Z grantees.

Paperwork Reduction Act of 1995

The final waivers and extensions of the project periods with funding do not contain any information collection requirements.

Intergovernmental Review

These programs are not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at www.govinfo.gov. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit

your search to documents published by the Department.

Kelly S. Rogers,

Deputy Assistant Secretary and Acting Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA-HQ-OPP-2024-0354; FRL-13403-01-OCSPPI]

Resin Acids, Esters With Glycerol in Pesticide Formulations; Exemption From the Requirement for a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of resin acids, esters with glycerol (CAS Reg. No. 8050-31-5) when used as an inert ingredient (surfactant) on growing crops and raw agricultural commodities pre- and post-harvest. Croda Inc. submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting establishment of an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of resin acids, esters with glycerol when used in accordance with the terms of the exemption.

DATES: This regulation is effective June 18, 2026. Objections and requests for hearings must be received on or before August 17, 2026 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of this document).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2024-0354, is available online at <https://www.regulations.gov>. Additional information about dockets generally, along with instructions for visiting the docket in person, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Charles Smith, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; main telephone number: (202) 566-1030; email address: RDfRNtices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them.

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

If you have any questions regarding the applicability of this proposed action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is EPA's authority for taking this action?

EPA is issuing this rulemaking under section 408 of the FFDCA, 21 U.S.C. 346a. FFDCA section 408(c)(2)(A)(i) allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is "safe." FFDCA section 408(c)(2)(A)(ii) defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings but does not include occupational exposure. Pursuant to FFDCA section 408(c)(2)(B), in establishing or maintaining in effect an exemption from the requirement of a tolerance, EPA must take into account the factors set forth in FFDCA section 408(b)(2)(C), which require EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ." Additionally, FFDCA section 408(b)(2)(D) requires that the Agency consider, among other things, "available information concerning the cumulative effects of a particular pesticide's residues" and "other substances that have a common mechanism of toxicity."
