Abstract: On December 15, 1989, pursuant to Section 112 of the Clean Air Act as amended in 1977 (42 U.S.C. 1857), the Environmental Protection Agency (EPA) promulgated National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations to control radionuclide emissions from several source categories. The regulations are codified at 40 CFR part 61. Of the eight subparts (B, H, I, K, Q, R, T and W) included in the 1989 rule, as currently amended, four apply to privately-operated facilities. In addition to requiring operational practices that limit emissions, subparts B, K, R, and W impose radionuclide dose and/or emission limits, respectively, to underground uranium mines, elemental phosphorous plants, phosphogypsum stacks, and uranium mill tailings impoundments. Facilities must inspect impoundments, measure radionuclide emissions, perform analyses or calculations per EPA procedures, and report the results to the EPA.

Form Numbers: None.

Respondents/Affected Entities: The North American Industry Classification

System (NAICS) codes of facilities associated with the activity of the respondents are: (1) Elemental Phosphorous 325180, (2) Phosphogypsum Stacks 212390, (3) Underground Uranium Mines 212290, and (4) Uranium Mill Tailings 212290.

Respondent's Obligation To Respond: Mandatory (40 CFR part 61).

Estimated Number of Respondents: 52 (total).

Frequency of Response: Monthly, annual, or one-time depending on the source category and respondent activity.

Total Estimated Burden: 11,301 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total Estimated Cost: \$1,412,827 (per year), which includes \$408,300 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is increase of 7,155 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to additional subpart B and subpart W facilities potentially coming online by 2029. In the case of subpart B, based on information gathered for this ICR renewal, the Agency identified up to 14 respondents that are likely to submit annual reports by 2029, which would be an increase of 12 facilities from the previous ICR. The additional responses for subpart B will lead to increases of 2,760 burden hours and \$63,600 in non-labor cost. In the case of subpart W, there is the potential for an additional 15 non-conventional impoundments to be constructed and operated. This is estimated to produce an additional 4,395 burden hours and \$5,700 in non-labor costs. For subparts K and R, there were no changes to the number of respondents, the annual time burden, or the annual non-labor cost compared to the most recent renewals of this ICR.

Courtney Kerwin,

Deputy Director, Data and Enterprise Programs Division.
