You also may obtain a copy by sending a request to the Federal Aviation Administration, Capacity Analysis and Slot Administration Office, AJR–G5, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–2822. Make sure to identify docket number FAA–2007–29320.

Background

FAA historically limited the number of arrivals and departures at JFK through the implementation of the High Density Rule (HDR).¹ By statute enacted

in April 2000 (Aviation Investment and Reform Act for the 21st Century (AIR–21)), operations were added at JFK through provisions permitting exemptions for new entrant carriers and flights to small and non-hub airports.² The HDR's applicability to JFK operations terminated as of January 1, 2007.³ With the AIR–21 exemptions and the HDR phase-out, some air carriers serving JFK significantly increased their scheduled operations throughout the day and retimed existing flights. This resulted in scheduled demand in peak hours that exceeded the airport's capacity and caused significant congestion and delay.

In October 2007, to mitigate congestion and delays at the airport, FAA held a delay reduction meeting with scheduled carriers operating at JFK.⁴ Subsequently, in January 2008, FAA placed temporary limits on scheduled operations at JFK.⁵ FAA extended the January 18, 2008 Order placing temporary limits on scheduled operations at JFK on October 7, 2009, April 4, 2011, May 14, 2013, March 26, 2014, May 24, 2016, as corrected June 21, 2016, September 17, 2018, September 18, 2020, October 28, 2022, and May 13, 2024.⁶

Under this Order, as previously amended, FAA: (1) maintains the current hourly limits of 81 scheduled operations at JFK during the slot-controlled hours; (2) imposes an 80 percent minimum usage requirement for Operating Authorizations (OAs)⁷ with defined exceptions; (3) provides a mechanism for withdrawal of OAs for FAA operational reasons; (4) establishes procedures to allocate withdrawn, surrendered, or unallocated OAs; and (5) allows for trades and leases of OAs

airports in 14 CFR part 93, subpart K. The HDR required carriers to hold a reservation, which came to be known as a "slot," for each takeoff or landing under instrument flight rules at the high density traffic airports.

⁷ Also referred to as "slots".

for consideration for the duration of the Order, with FAA approval.

The reasons for retaining the Order have not changed appreciably since its initial issuance. Over the years, demand for access to JFK has remained high. Multiple new entrants and other incumbent airlines have requested new peak period operations and retiming of existing flights to higher demand hours. The FAA has determined that the operational limitations imposed by this Order remain necessary. Since 2024, when this Order was last extended, allocated slots in the busiest hours were generally at the limits imposed by this Order. For the Summer 2026 scheduling season, the initial requests for historic slots and retiming of existing slots continue to show demand is higher than the scheduling limits in multiple hours. Without the operational limitations imposed by the Order, FAA expects severe congestion-related delays would occur at JFK with ripple effects at other airports throughout the National Airspace System (NAS).

Accordingly, FAA is extending the expiration date of this Order until October 28, 2028. This expiration date coincides with the extended expiration date for the Order limiting operations at LGA, as also extended by action published elsewhere in this issue of the **Federal Register**. FAA will continue to monitor demand, performance, and runway capacity at JFK, to determine if changes are warranted during the effective period of this Order. FAA continues to study and analyze airport runway configurations, capacity, delays with alternative demand scenarios, as well as consider a number of the complexities associated with JFK operations, including interaction with other nearby airports and operational growth limitations due to the busy airspace surrounding the New York Area. FAA, in coordination with the Office of the Secretary of Transportation (OST), will also continue to consider potential rulemaking to codify policies for slot-controlled airports.

FAA finds that notice and comment procedures under 5 U.S.C. 553(b) are impracticable, unnecessary, and contrary to the public interest, as carriers have begun planning schedules for the Winter 2026/2027 scheduling season and no changes are included in this action. The provisions of this Order have been in place largely unchanged through multiple extensions over the course of many years and are familiar to scheduled carriers operating at JFK. For these reasons, the FAA also finds that it is impracticable and contrary to the public interest to delay the effective

¹ 33 FR 17896 (Dec. 3, 1968). The FAA codified the rules for operating at high density traffic

date of this action under 5 U.S.C. 553(d).

This Order is the equivalent of limited local rules as referenced in the Worldwide Slot Guidelines (WSG) published by the International Air Transport Association (IATA) and takes precedence over the WSG where there are differences.⁸ At JFK, FAA follows the WSG in many respects such as new entrant priority⁹ and consideration of schedule constraints such as terminal, gate, parking, customs and immigration, curfews, and similar operational factors.

The Amended Order

The Order, as previously amended, is recited below in its entirety.

1. This Order continues the process for assigning operating authority to conduct an arrival or a departure at JFK during the affected hours to any certificated U.S. air carrier or foreign air carrier. The FAA will not assign operating authority under this Order to any person or entity other than a certificated U.S. or foreign air carrier with appropriate economic authority and with operating authority from FAA under 14 CFR part 121, 129, or 135. This Order applies to the following:

a. All U.S. air carriers and foreign air carriers conducting scheduled operations at JFK as of the date of this Order, any U.S. air carrier or foreign air carrier that operates under the same designator code as such a carrier, and any air carrier or foreign-flag carrier that has or enters into a codeshare agreement with such a carrier.

b. All U.S. air carriers or foreign air carriers initiating scheduled or regularly conducted commercial service to JFK while this Order is in effect.

c. The Vice President, System Operations Services, in coordination with the Chief Counsel of the FAA, is the final decision maker for determinations under this Order.

2. This Order governs scheduled arrivals and departures at JFK from 6 a.m. through 10:59 p.m., Eastern Time, Sunday through Saturday.

3. This Order took effect on March 30, 2008, and will expire October 28, 2028.

4. Under the authority provided to the Secretary of Transportation and the

FAA Administrator by 49 U.S.C. 40101, 40103, and 40113, we hereby order that:

a. No U.S. air carrier or foreign air carrier initiating or conducting scheduled or regularly conducted commercial service at JFK may conduct such operations without an Operating Authorization assigned by the FAA.

b. Except as otherwise authorized by the FAA based on historic precedence, scheduled U.S. air carrier and foreign air carrier arrivals and departures will not exceed 81 per hour from 6 a.m. through 10:59 p.m., Eastern Time.

c. The Administrator may change the limits if the Administrator determines that capacity exists to accommodate additional operations without a significant increase in delays.

5. For administrative tracking purposes only, the FAA will assign an identification number to each Operating Authorization.

6. A carrier holding an Operating Authorization may request the Administrator's approval to move any arrival or departure scheduled from 6:00 a.m. through 10:59 p.m. to another half hour within that period. Except as provided in paragraph 7, the carrier must receive the written approval of the Administrator, or his delegate, prior to conducting any adjusted arrival or departure. All requests to move an allocated Operating Authorization must be submitted to the FAA Slot Administration Office, email 7-AWA-Slotadmin@faa.gov, and must come from a designated representative of the carrier. If the FAA cannot approve a carrier's request to move a scheduled arrival or departure, the carrier may then apply for a trade in accordance with paragraph 7.

7. For the duration of this Order, a carrier may enter into a lease or trade of an Operating Authorization to another carrier for any consideration. Notice of a trade or lease under this paragraph must be submitted in writing to the FAA Slot Administration Office, email 7-AWA-Slotadmin@faa.gov, must come from a designated representative of each carrier, and is subject to FAA review. The FAA must confirm and approve these transactions in writing prior to the effective date of the transaction. The FAA expects to approve transfers between carriers under the same marketing control up to five business days after the actual operation, but only to accommodate operational disruptions that occur on the same day of the scheduled operation. The FAA's approval of a trade or lease does not constitute a commitment by the FAA to grant the associated historical rights to any operator in the event that slot

controls continue at JFK after this Order expires.

8. A carrier may not buy, sell, trade, or transfer an Operating Authorization, except as described in paragraph 7.

9. Historical rights to Operating Authorizations and withdrawal of those rights due to insufficient usage will be determined on a seasonal basis and in accordance with the schedule approved by the FAA prior to the commencement of the applicable season.

a. For each day of the week that the FAA has approved an operating schedule, any Operating Authorization not used at least 80% of the time over the time-frame authorized by the FAA under this paragraph will be withdrawn by the FAA for the next applicable season except:

i. The FAA will treat as used any Operating Authorization held by a carrier on Thanksgiving Day, the Friday following Thanksgiving Day, and the period from December 24 through the first Saturday in January.

ii. The Administrator of the FAA may waive the 80% usage requirement in the event of a highly unusual and unpredictable condition which is beyond the control of the carrier and which affects carrier operations for a period of five consecutive days or more.

b. Each carrier holding an Operating Authorization must forward in writing to the FAA Slot Administration Office a list of all Operating Authorizations held by the carrier along with a listing of the Operating Authorizations and:

i. The dates within each applicable season it intends to commence and complete operations.

A. For each winter scheduling season, the report must be received by the FAA no later than August 15 during the preceding summer.

B. For each summer scheduling season, the report must be received by the FAA no later than January 15 during the preceding winter.

ii. The completed operations for each day of the applicable scheduling season:

A. No later than September 1 for the summer scheduling season.

B. No later than January 15 for the winter scheduling season.

iii. The completed operations for each day of the scheduling season within 30 days after the last day of the applicable scheduling season.

10. In the event that a carrier surrenders to the FAA any Operating Authorization assigned to it under this Order or if there are unallocated Operating Authorizations, the FAA will determine whether the Operating Authorizations should be reallocated. The FAA may temporarily allocate an Operating Authorization at its

⁸ FAA continues to generally apply edition 9 of the predecessor Worldwide Slot Guidelines (WSG) (Jan. 1, 2019) to inform its slot administration decisions at JFK, available at: www.regulations.gov/document/FAA-2007-29320-0058.

⁹ Under current policy and procedures, the FAA applies the definitions for "new entrant" as set forth in the WSG version 9 (Jan. 1, 2019), which is "an airline requesting a series of slots at an airport on any day where, if the airline's request were accepted, it would hold fewer than 5 slots at that airport on that day."

discretion. Such temporary allocations will not be entitled to historical status for the next applicable scheduling season under paragraph 9.

11. The FAA considers the following factors and priorities in allocating Operating Authorizations, which the FAA has determined are available for reallocation—

- a. Historical requests for allocation of an Operating Authorization in the same time;
- b. New entrant status;
- c. Retiming of historic Operating Authorizations;
- d. Extension of a seasonal Operating Authorization to year-round service;
- e. The effective period of operation;
- f. The extent and regularity of intended use with priority given to year-round services;
- g. The operational impacts of scheduled demand, including the hourly and half-hour demand and the mix of arrival and departure flights; and,
- h. Airport facility constraints.

Any carrier that is not approved for allocation of an Operating Authorization by the FAA may request it be placed on a waiting list for consideration should an Operating Authorization in the requested time become available during that scheduling season.

12. If the FAA determines that an involuntary reduction in the number of allocated Operating Authorizations is required to meet operational needs, such as reduced airport capacity, the FAA will conduct a weighted lottery to withdraw Operating Authorizations to meet a reduced hourly or half-hourly limit for scheduled operations. The FAA will provide at least 45 days notice unless otherwise required by operational needs. Any Operating Authorization that is withdrawn or temporarily suspended will, if reallocated, be reallocated to the carrier from which it was taken, provided that the carrier continues to operate scheduled service at JFK.

13. The FAA may enforce this Order through an enforcement action seeking a civil penalty under 49 U.S.C. 46301(a). The FAA or Department of Justice also could file a civil action in U.S. District Court, under 49 U.S.C. 46106 or 46107, respectively, seeking to enjoin any carrier from violating the terms of this Order.

14. The FAA may modify or withdraw any provision in this Order on its own or on application by any carrier for good cause shown.

Issued in Washington, DC, on June 18, 2026.

Gian Burdhimio,

Acting Deputy Vice President, System Operations Services.

14 CFR Part 93

[Docket No. FAA–2006–25755]

Operating Limitations at New York LaGuardia Airport

AGENCY: Department of Transportation, Federal Aviation Administration (FAA).

ACTION: Extension of order.

SUMMARY: This action extends the Order Limiting Operations at New York LaGuardia Airport (LGA) published on December 27, 2006, as most recently extended May 13, 2024. The Order remains effective until October 28, 2028.

ADDRESSES: Requests may be submitted by mail to Slot Administration Office, System Operations Services, AJR–0, Room 300W, 800 Independence Avenue SW, Washington, DC 20591, or by email to: 7-awa-slotadmin@faa.gov.

FOR FURTHER INFORMATION CONTACT: Al Meilus, Manager, Slot Administration and Capacity Analysis, AJR–G, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone (202) 267–2822; email Al.Meilus@faa.gov.

Background

Before 2007, the FAA limited the number of arrivals and departures at

LGA pursuant to the High Density Rule (HDR). The Aviation Investment and Reform Act for the 21st Century (AIR–21), enacted in April 2000, directed the phase-out of the HDR at LGA on January 1, 2007.¹ The FAA issued the Order Limiting Operations at New York LaGuardia Airport on December 27, 2006, adopting temporary limits on scheduled and unscheduled operations at LGA to address congestion at the airport upon the termination of the HDR.²

At the time, the order was adopted on a temporary basis as the FAA noted it was pending the completion of rulemaking to replace the HDR that would address long-term limits and related policies. On October 10, 2008, the FAA published the Congestion Management Rule for LaGuardia Airport, which would have become effective on December 9, 2008.³ That rule was stayed by the U.S. Court of Appeals for the District of Columbia Circuit and subsequently rescinded by the FAA.⁴

Meanwhile, the December 27, 2006, Order was amended on November 8, 2007, and August 19, 2008.⁵ Under the amended Order, the FAA limited scheduled and unscheduled operations at the airport to prevent congestion-related delays associated with LaGuardia's limited runway capacity. The FAA extended the expiration date of the amended Order on October 7, 2009, April 4, 2011, May 14, 2013, March 27, 2014, May 25, 2016, September 18, 2018, September 18, 2020, October 28, 2022, and May 13, 2024.⁶
