NATIONAL SCIENCE FOUNDATION

Notice of Application of Emergency Provision Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of hazardous waste to be stored at McMurdo Station, Antarctica for more than 15 months due to an emergency, consistent with 45 CFR 671.17.

SUMMARY: The Office of Polar Programs, U.S. National Science Foundation, is giving notice that an emergency relating to considerations of human health and safety caused, and will result in, hazardous waste to be stored at McMurdo Station, Antarctica, for more than 15 months.

Hazardous waste in the form of lithium batteries and fluorescent lights, with an aggregate net weight of approximately 2639 lbs., was, consistent with waste management best practices, segregated, packaged, and stored in a secure location for removal from the station.

SUPPLEMENTARY INFORMATION: The waste was scheduled to be removed in February 2026, at the end of the 2025–2026 season. In early February 2026, it was discovered that the contracted cargo vessel could not safely transport hazardous lithium-ion battery waste, making the removal of the entire hazardous waste container impossible. The removal of the hazardous waste is a priority for the January 2027 annual cargo vessel visit to McMurdo Station.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “NRC Form 361, Reactor Plant Event Notification Worksheet; NRC Form 361A, Fuel Cycle and Materials Event Notification Worksheet; NRC Form 361N, Non-Power Reactor (NPR) Event Notification Worksheet; NRC Form 361S, Part 53 Plant Event Notification Worksheet.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 21, 2026, 91 FR 21333.

1. *The title of the information collection:* NRC Form 361, Reactor Plant Event Notification Worksheet; NRC Form 361A, Fuel Cycle and Materials Event Notification Worksheet; NRC Form 361N, Non-Power Reactor (NPR) Event Notification Worksheet; NRC

Form 361S, Part 53 Plant Event Notification Worksheet.

2. *OMB approval number:* 3150-0238.

3. *Type of submission:* Revision.

4. *The form number, if applicable:* NRC Form 361, NRC Form 361A, NRC Form 361N, NRC Form 361S.

5. *How often the collection is required or requested:* On occasion. NRC licensee events are reportable when they occur.

6. *Who will be required or asked to respond:* Holders of NRC licenses for commercial nuclear power plants, fuel cycle facilities, NRC material licensees, and nonpower reactors.

7. *The estimated number of annual responses:* 563.

8. *The estimated number of annual respondents:* 143.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 281.5.

10. *Abstract:* The NRC requires its licensees to report by telephone certain events and emergencies that have potential impact to public health and safety. In order to efficiently process the information received through such reports from licensees, the NRC created Forms 361, 361A, 361N, and 361S to provide a worksheet for licensees to record the information for the report. NRC licensees are not required to fill out or submit the form, but the form describes the order in which data about the event will be requested to enable a licensee to efficiently make the telephonic notification. Without the format provided by the NRC Forms 361, 361A, 361N, and 361S the information exchange between licensees and NRC Headquarters Operations Officers via telephone could result in delays in completing the notification as the licensee answers questions from the NRC staff taking the report.
