Needs and Uses: This is a request for renewal of an approved information collection. The National Marine Fisheries Service (NMFS), West Coast Region, is the sponsor of this information collection which is authorized under the Endangered Species Act (ESA) to evaluate activities involving threatened green sturgeon (*Acipenser medirostris*).

On April 7, 2006, NMFS listed the Southern Distinct Population Segment (DPS) of North American green sturgeon as threatened under the ESA (71 FR 17757). On June 2, 2010, NMFS established protective regulations for the Southern DPS under section 4(d) of the ESA (ESA 4(d) rule) (75 FR 30714; 50 CFR 223.210). To comply with the ESA and the protective regulations, entities must obtain take authorization prior to engaging in activities involving take of Southern DPS fish unless the activity is covered by an exception or exemption. The ESA defines “take” as to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. Certain activities described in the “exceptions” provision of 50 CFR 223.210(b) are not subject to the take prohibitions if they adhere to specific criteria and reporting requirements. Under the “exemption” provision of 50 CFR 223.210(c), the take prohibitions do not apply to scientific research, scientific monitoring, and fisheries activities conducted under an approved 4(d) program or plan. Similarly, take prohibitions do not apply to tribal resource management activities conducted under a Tribal Plan for which the requisite determinations described in 50 CFR 223.210(c)(3) have been made.

To ensure that activities qualify under exceptions to or exemptions from the take prohibitions, local, state, and federal agencies, non-governmental organizations, academic researchers, and private organizations are asked to submit detailed information regarding their activity on a schedule to be determined by NMFS staff. This information is used by NMFS to (1) track the number of Southern DPS fish taken as a result of each action; (2) understand and evaluate the cumulative effects of each action on the Southern DPS; and (3) determine whether

additional protections are needed for the species, or whether additional exceptions may be warranted. NMFS designed the criteria to ensure that actions meeting the criteria would adequately limit effects on threatened Southern DPS fish, such that additional protections in the form of a federal take prohibition would not be necessary and advisable.

Affected Public: Not-for-profit institutions; State, local, or Tribal government; Federal government; business or other for-profit organizations.

Frequency: Emergency fish rescue reports, on occasion; Written notification describing research, monitoring, or habitat restoration activities, once; State 4(d) research programs, annually; FMEPs and Tribal Resource Management Plan, once; FMEP reports, biannually; All other reports, annually

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: Endangered Species Act.
