

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Particulate matter, Reporting and recordkeeping requirements.

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances (26–3)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for certain chemical substances that were

the subject of premanufacture notices (PMNs) and are also subject to an Order issued by EPA pursuant to TSCA. Once finalized, the SNURs would require persons who intend to manufacture (defined by statute to include import) or process any of these chemical substances for an activity that is proposed as a significant new use by this rulemaking to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the conditions of that use for that chemical substance. In addition, the manufacture or processing for the significant new use may not commence until EPA has conducted a review of the required notification, made an appropriate determination regarding that notification, and taken such actions as required by that determination.

DATES: Comments must be received on or before August 24, 2026.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2026–2014, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What is the Agency's authority for taking this action?

TSCA section 5(a)(2) (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a “significant new use.” EPA must make this determination by rule after considering all relevant factors, including the factors in TSCA section 5(a)(2) (see also the discussion in Unit II.).

B. What action is the Agency taking?

EPA is proposing SNURs for the chemical substances discussed in Unit III. These SNURs, if finalized as proposed, would require persons who intend to manufacture or process any of these chemical substances for an activity that is designated as a significant new use to notify EPA at least 90 days before commencing that activity.

C. Does this action apply to me?

1. General Applicability

This action applies to you if you manufacture, process, or use the chemical substances contained in this proposed rule. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Manufacturers or processors of one or more subject chemical substances (NAICS codes 325 and 324110), *e.g.*, chemical manufacturing and petroleum refineries.

2. Applicability to Importers and Exporters

This action may also apply to certain entities through pre-existing import certification and export notification requirements under TSCA (<https://www.epa.gov/tsc-import-export-requirements>).

Chemical importers are subject to TSCA section 13 (15 U.S.C. 2612), the requirements in 19 CFR 12.118 through 12.127, 19 CFR 127.28, and 40 CFR 707.20. Importers of chemical substances in bulk form, as part of a mixture, or as part of an article (if required by rule) must certify that the shipment of the chemical substance complies with all applicable rules and orders under TSCA, including regulations issued under TSCA sections 5, 6, 7 and Title IV.

Pursuant to 40 CFR 721.20, any persons who export or intend to export a chemical substance that is the subject

of this proposed rule on or after August 24, 2026 are subject to TSCA section 12(b) (15 U.S.C. 2611(b)) and must comply with the export notification requirements in 40 CFR part 707, subpart D.

D. What are the incremental economic impacts of this action?

EPA has evaluated the potential costs of establishing SNUN reporting requirements for potential manufacturers (including importers) and processors of the chemical substances subject to these proposed SNURs. This analysis, which is available in the docket, is briefly summarized here.

1. Estimated Costs for SNUN Submissions

If a SNUN is submitted, costs are an estimated \$45,496 per SNUN submission for large business submitters and \$14,976 for small business submitters. These estimates include the cost to prepare and submit the SNUN (including registration for EPA's Central Data Exchange (CDX)), and the payment of a user fee. Businesses that submit a SNUN would be subject to either a \$37,000 user fee required by 40 CFR 700.45(c)(2)(ii) and (d), or, if they are a small business as defined at 13 CFR 121.201, a reduced user fee of \$6,480 (40 CFR 700.45(c)(1)(ii) and (d)). The costs of submission for SNUNs will not be incurred by any company unless a company decides to pursue a significant new use as defined in these SNURs. Additionally, these estimates reflect the costs and fees as they are known at the time of this rulemaking.

2. Estimated Costs for Export Notifications

EPA has also evaluated the potential costs associated with the export notification requirements under TSCA section 12(b) and the implementing regulations at 40 CFR part 707, subpart D. For persons exporting a substance that is the subject of a SNUR, a one-time notice to EPA must be provided for the first export or intended export to a particular country. The total costs of export notification will vary by chemical, depending on the number of required notifications (*i.e.*, the number of countries to which the chemical is exported). While EPA is unable to make any estimate of the likely number of export notifications for the chemical substances covered by these SNURs, as stated in the accompanying economic analysis, the estimated cost of the export notification requirement on a per unit basis is approximately \$106.

E. What should I consider as I prepare my comments for EPA?

1. Submitting CBI

Do not submit CBI to EPA through email or <https://www.regulations.gov>. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR parts 2 and 703.

2. Tips for Preparing Your Comments

When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/epa-dockets>.

II. Background

This unit provides general information about SNURs. For additional information about EPA's new chemical program go to <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca>.

A. Significant New Use Determination Factors

TSCA section 5(a)(2) states that EPA's determination that a use of a chemical substance is a significant new use must be made after consideration of all relevant factors, including:

- The projected volume of manufacturing and processing of a chemical substance.
- The extent to which a use changes the type or form of exposure of human beings or the environment to a chemical substance.
- The extent to which a use increases the magnitude and duration of exposure of human beings or the environment to a chemical substance.
- The reasonably anticipated manner and methods of manufacturing, processing, distribution in commerce, and disposal of a chemical substance.

In determining what would constitute a significant new use for the chemical substances that are the subject of these SNURs, EPA considered relevant information about the toxicity of the chemical substances, and potential human exposures and environmental releases that may be associated with the substances, in the context of the four bulleted TSCA section 5(a)(2) factors listed in this Unit and discussed in Unit III.

These proposed SNURs are based on orders issued to certain companies for substances that were the subject of PMN submissions. Those orders were issued under TSCA section 5(e)(1)(A), as

required by the determinations made under TSCA section 5(a)(3)(B). The TSCA orders require protective measures to limit exposures or otherwise mitigate the potential unreasonable risk. The proposed SNURs extend those protective measures to any person intending to manufacture, process, use, distribute in commerce, or dispose of the new chemical substances subject to orders and identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying TSCA orders, consistent with TSCA section 5(f)(4).

B. Rationale and Objectives of the SNURs

1. Rationale

Under TSCA section 5(a)(1)(B), no person may manufacture a new chemical substance or manufacture or process a chemical substance for a significant new use until EPA makes a determination as described in TSCA section 5(a)(3) and takes any required action. The issuance of a SNUR is not a risk determination itself, only a notification requirement for "significant new uses," so that the Agency has the opportunity to review the SNUN for the significant new use and make a TSCA section 5(a)(3) risk determination.

During review of the PMNs submitted that identify chemical substances subject to these proposed SNURs, EPA concluded that regulation was warranted under TSCA section 5(e), pending the development of information sufficient to make reasoned evaluations of the health or environmental effects of the chemical substances. Based on the findings outlined in Unit III., TSCA section 5(e) Orders requiring the use of appropriate exposure controls were negotiated with the PMN submitters. As a general matter, EPA believes it is necessary to follow a TSCA order with a SNUR that identifies the absence of those protective measures as significant new uses to ensure that all manufacturers and processors—not just the party subject to a TSCA order—are held to the same standard.

2. Objectives

EPA is proposing these SNURs because the Agency has determined it is appropriate:

- To identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying TSCA Orders, consistent with TSCA section 5(f)(4).

- To have an opportunity to review and evaluate data submitted in a SNUN before the submitter begins manufacturing or processing a listed chemical substance for the described significant new use.

- To be obligated to make a determination under TSCA section 5(a)(3) regarding the use described in the SNUN, under the conditions of use. The Agency will either determine under TSCA section 5(a)(3)(C) that the significant new use is not likely to present an unreasonable risk, including an unreasonable risk to a potentially exposed or susceptible subpopulation identified as relevant by the Administrator under the conditions of use, or make a determination under TSCA section 5(a)(3)(A) or (B) and take the required regulatory action associated with the determination, before manufacture or processing for the significant new use of the chemical substance can occur.

Issuance of a proposed SNUR for a chemical substance does not signify that the chemical substance is listed on the TSCA Chemical Substance Inventory (TSCA Inventory). Guidance on how to determine if a chemical substance is on the TSCA Inventory is available at <https://www.epa.gov/tscainventory>.

C. Significant New Uses Claimed as CBI

EPA is proposing to establish certain significant new uses which have been claimed as CBI subject to Agency confidentiality regulations at 40 CFR parts 2 and 703. Absent a final determination or other disposition of the confidentiality claim under these regulations, EPA is required to keep this information confidential. EPA promulgated a procedure at 40 CFR 721.11 to deal with the situation where a specific significant new use is CBI. Under these procedures, a manufacturer or processor may ask EPA to identify the confidential significant new use subject to the SNUR. The manufacturer or processor must show that it has a *bona fide* intent to manufacture or process the chemical substance. If EPA concludes that the person has shown a *bona fide* intent to manufacture or process the chemical substance, EPA will identify the confidential significant new use to that person. Since most of the chemical identities of the chemical substances subject to these SNURs are also CBI, manufacturers and processors can combine the *bona fide* submission under the procedure in 40 CFR 721.11 into a single step.

D. Applicability of General Provisions

General provisions for SNURs appear in 40 CFR part 721, subpart A. These

provisions describe persons subject to SNURs, recordkeeping requirements, exemptions to reporting requirements, and applicability of the rule to uses occurring before the effective date of the rule. Pursuant to 40 CFR 721.1(c), persons subject to SNURs must comply with the same requirements and EPA regulatory procedures as submitters of PMNs under TSCA section 5(a)(1)(A). In particular, these requirements include the information submission requirements of TSCA sections 5(b) and 5(d)(1), the exemptions authorized by TSCA sections 5(h)(1), 5(h)(2), 5(h)(3), and 5(h)(5), and the regulations at 40 CFR part 720. In addition, provisions relating to user fees appear at 40 CFR part 700.

Once EPA receives a SNUN, EPA must either determine that the significant new use is not likely to present an unreasonable risk of injury under the conditions of use for the chemical substance or take such regulatory action as is associated with an alternative determination under TSCA section 5 before the manufacture (including import) or processing for the significant new use can commence. If EPA determines that the significant new use of the chemical substance is not likely to present an unreasonable risk, EPA is required under TSCA section 5(g) to make public, and submit for publication in the **Federal Register**, a statement of EPA's findings.

As discussed in Unit I.C.2., persons who export or intend to export a chemical substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b), and persons who import a chemical substance identified in a final SNUR are subject to the TSCA section 13 import certification requirements. See also <https://www.epa.gov/tscainport-export-requirements>.

E. Applicability of the Proposed SNURs to Uses Occurring Before the Effective Date of the Final Rule

To establish a significant new use, EPA must determine that the use is not ongoing. The chemical substances subject to this proposed rule have undergone premanufacture review and received determinations under TSCA section 5(a)(3)(C). TSCA Orders have been issued for these chemical substances and the PMN submitters are required by the TSCA Orders to submit a SNUN before undertaking activities that would be designated as significant new uses in these SNURs. Additionally, the identities of many of the chemical substances subject to this proposed rule have been claimed as confidential per

40 CFR 720.85, further reducing the likelihood that another party would manufacture or process the substances for an activity that would be designated as a significant new use. Based on this, the Agency believes that it is highly unlikely that any of the significant new uses identified in Unit III. are ongoing.

When the chemical substances identified in Unit III. are added to the TSCA Inventory, EPA recognizes that, before the rule is effective, other persons might engage in a use that has been identified as a significant new use. Persons who begin manufacture or processing of the chemical substances for a significant new use identified on or after the designated cutoff date specified in Unit III.A. would have to cease any such activity upon the effective date of the final rule. To resume their activities, these persons would have to first comply with all applicable SNUR notification requirements and EPA would have to take action under TSCA section 5 allowing manufacture or processing to proceed.

F. Important Information About SNUN Submissions

1. SNUN Submissions

SNUNs must be submitted on EPA Form No. 7710–25, generated using e-PMN software, and submitted to the Agency in accordance with the procedures set forth in 40 CFR 720.40 and 721.25. E-PMN software is available electronically at <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca>.

2. Development and Submission of Information

EPA recognizes that TSCA section 5 does not require development of any particular new information (e.g., generating test data) before submission of a SNUN. There is an exception: If a person is required to submit information for a chemical substance pursuant to a rule, order, or consent agreement under TSCA section 4, then TSCA section 5(b)(1)(A) requires such information to be submitted to EPA at the time of submission of the SNUN.

In the absence of a rule, TSCA order, or consent agreement under TSCA section 4 covering the chemical substance, persons are required only to submit information in their possession or control and to describe any other information known to or reasonably ascertainable by them (see 40 CFR 720.50). However, upon review of PMNs and SNUNs, the Agency has the authority to require appropriate testing. To assist with EPA's analysis of the

SNUN, submitters are encouraged, but not required, to provide the potentially useful information as identified for the chemical substance in Unit III.C.

EPA strongly encourages persons, before performing any testing, to consult with the Agency pertaining to protocol selection. Furthermore, pursuant to TSCA section 4(h), which pertains to reduction of testing in vertebrate animals, EPA encourages consultation with the Agency on the use of alternative test methods and strategies (also called New Approach Methodologies, or NAMs), if available, to generate the recommended test data. EPA encourages dialog with Agency representatives to help determine how best the submitter can meet both the data needs and the objective of TSCA section 4(h). For more information on alternative test methods and strategies to reduce vertebrate animal testing, visit <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/alternative-test-methods-and-strategies-reduce>.

The potentially useful information described in Unit III. may not be the only means of providing information to evaluate the chemical substance associated with the significant new uses. However, submitting a SNUN without any test data may increase the likelihood that EPA will take action under TSCA sections 5(e) or 5(f). EPA recommends that potential SNUN submitters contact EPA early enough so that they will be able to conduct the appropriate tests.

SNUN submitters should be aware that EPA will be better able to evaluate SNUNs that provide detailed information about human exposure and environmental release that may result from the significant new use of the chemical substances.

III. Chemical Substances Subject to These Proposed SNURs

A. What is the designated cutoff date for ongoing uses?

EPA designates July 23, 2026 as the cutoff date for determining whether the new use is ongoing. This designation is explained in more detail in Unit II.E.

B. What information is provided for each chemical substance?

For each chemical substance identified in Unit III.C., EPA provides the following information:

- PMN number(s) (as well as the proposed CFR citation assigned in the regulatory text section of this document).
- Chemical name (generic name, if the specific name is claimed as CBI).

- Chemical Abstracts Service Registry Number (CASRN) or Accession Number (if assigned for confidential chemical identities).

- Basis for the SNUR (e.g., effective date of and basis for the corresponding TSCA Order).

- Potentially useful information.

The regulatory text section of the proposed rule specifies the activities designated as significant new uses. Certain new uses, including production volume limits and other uses designated in the proposed rules, may be claimed as CBI.

These proposed SNURs include PMN substances that are subject to orders issued under TSCA section 5(e)(1)(A), as required by the determinations made under TSCA section 5(a)(3)(B). Those TSCA Orders require protective measures to limit exposures or otherwise mitigate the potential unreasonable risk. The proposed SNURs identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying TSCA Orders, consistent with TSCA section 5(f)(4).

C. Which chemical substances are subject to these proposed SNURs?

The substances subject to the proposed SNURs in this document are as follows, listed by PMN number and with the proposed CFR citation:

P-23-140 (40 CFR 721.12279)

Chemical Name: Polysaccharide, (hydroxytrialkylammonio)alkyl ether, chloride (generic).

CASRN or Accession No.: Not available.

Effective Date of TSCA Order: February 23, 2026.

Basis for TSCA Order: The PMN states that the generic (non-confidential) use will be as an additive for consumer and commercial products. Based on comparison to analogous chemical substances, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 193 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substance may present an unreasonable risk of injury to the environment. To protect against these risks, the Order requires:

- No domestic manufacture of the PMN substance (i.e., import only);
- Manufacture of the PMN substance only with a degree of substitution of amine-nitrogen at or below the

confidential percentage by weight as measured by Kjeldahl nitrogen testing;

- Use of the PMN substance only for the confidential use listed in the Order;
- No release of the PMN substance, or any waste stream containing the PMN substance, resulting in surface water concentrations that exceed 193 ppb. This does not apply to processors or users who receive the PMN substance at less than 5.5% by weight in formulation; and

- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a "significant new use" the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of aquatic toxicity testing may be potentially useful to characterize the environmental effects of the PMN substance. Although the Order does not require these tests, the Order's restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P-24-24 (40 CFR 721.12280)

Chemical Name: Heteroatom-substituted dihalo acid, methyl substituted-alkyl ester (generic).

CASRN or Accession No.: Not available.

Effective Date of TSCA Order: January 21, 2026.

Basis for TSCA Order: The PMN states that the generic (non-confidential) use will be as an electrolyte additive. Based on reactivity of the PMN substance and test data on a water-mediated hydrolysis product, EPA has identified concerns for skin corrosion, serious eye damage, and respiratory tract irritation. Based on test data for a water-mediated hydrolysis product, EPA has also identified concerns for acute toxicity (inhalation), pulmonary effects, neurotoxicity, systemic effects, and reproductive and developmental effects. Based on test data for an enzyme-mediated hydrolysis product and its metabolite, EPA has also identified concerns for clinical signs, neurotoxicity, systemic effects, reproductive and developmental effects, and carcinogenicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I),

based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substance may present an unreasonable risk of injury to human health. To protect against these risks, the Order requires:

- Use of personal protective equipment where there is a potential for dermal exposure;
- No processing for use or use of the PMN substance in a consumer product;
- Manufacture, processing, and use of the PMN substance only in an enclosed process;
- Disposal of the PMN substance, or waste streams (manufacturing, processing, and use) containing the PMN substance, only by incineration; and
- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of pulmonary effects, carcinogenicity, acute toxicity, developmental toxicity, skin irritation, skin corrosion, eye irritation, eye corrosion, and specific target organ toxicity testing may be potentially useful to characterize the health effects of the PMN substance. Although the Order does not require these tests, the Order’s restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P–24–93 (40 CFR 721.12281), P–24–94 (40 CFR 721.12282), P–24–95 (40 CFR 721.12283), and P–24–96 (40 CFR 721.12284)

Chemical Names: Rhamnolipids, *Pseudomonas putida* strain BS–PP–484-fermented, from D-glucose, potassium salts (P–24–93); rhamnolipids, *Pseudomonas putida* strain BS–PP–484-fermented, from D-glucose, sodium salts (P–24–94); rhamnolipids, *Pseudomonas allopitida* mt-2 KT 2440 strain BS–PP 555-fermented, from D-glucose, potassium salt (P–24–95); and rhamnolipids, *Pseudomonas allopitida* mt-2 KT 2440 strain BS–PP 555-fermented, from D-glucose, sodium salt (P–24–96).

CASRN or Accession Nos.: Not available.

Effective Date of TSCA Order: January 9, 2026.

Basis for TSCA Order: The PMNs state that the uses will be as anionic surfactants in manual dish detergents, laundry detergents, and hard surface cleaners. Based on comparison to analogous chemical substances, EPA has identified concerns for eye corrosion and systemic effects. Based on structure, EPA has also identified concerns for lung effects. Based on comparison to analogous anionic surfactants and submitted test data on the PMN substances, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 989 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- No manufacture or processing of the PMN substances in any manner that results in inhalation exposure to the PMN substances;
- Use of the PMN substances only if the concentration of the PMN substances does not exceed 3% by weight in the final formulation;
- Processing for use of the PMN substances in a consumer product only if the concentration of the PMN substances does not exceed 3% by weight in the final formulation;
- Use of the PMN substances in a consumer product only if the concentration of the PMN substances does not exceed 3% by weight in the consumer product;
- Use of personal protective equipment where there is a potential for dermal exposure;
- Use of a NIOSH-certified respirator with an APF of at least 50 where there is a potential for inhalation exposure; and
- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has

determined that the results of eye irritation, eye corrosion, and pulmonary effects testing may be potentially useful to characterize the health effects of the PMN substances. Although the Order does not require these tests, the Order’s restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P–24–104 (40 CFR 721.12285)

Chemical Name: Carbomonocycle alkylamide, 3,5-bis(1,1-dialkyl)-N-[3-alkylene-2,5-dioxo-1-heteromonocyclic]-4-hydroxy- (generic)

CASRN or Accession No.: Not available.

Effective Date of TSCA Order: January 26, 2026.

Basis for TSCA Order: The PMN states that the generic (non-confidential) use will be as a plastic additive. Based on the physical/chemical properties of the PMN substance (as described in the New Chemical Program’s persistent, bioaccumulative, and toxic (PBT) category at 64 FR 60194; November 1999) and in the absence of data, the PMN substance is a potentially PBT chemical. EPA estimates that the PMN substance will persist in the environment for more than six months and estimates a bioaccumulation factor of greater than or equal to 1,000. Based on comparison to analogous chemical substances, EPA has identified concerns for acute toxicity; irritation to the eyes and respiratory tract; systemic, reproductive, and developmental effects; and carcinogenicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substance may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- Use of personal protective equipment where there is a potential for dermal exposure;
- No processing for use or use of the PMN substance in a consumer product;
- Manufacture, processing, and use of the PMN substance only in a liquid solution;
- Manufacture, processing, and use of the PMN substance only in a manner that does not result in inhalation exposure to the PMN substance;
- No release of the PMN substance, or any waste stream containing the PMN substance, into water; and
- Establishment of a hazard communication program, including human health and environmental

precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of carcinogenicity, eye irritation, developmental toxicity, reproductive toxicity, specific target organ toxicity and bioaccumulation testing may be potentially useful to characterize the health and fate effects of the PMN substance. Although the Order does not require these tests, the Order’s restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P-24-116 (40 CFR 721.12286), P-24-117 (40 CFR 721.12287), P-24-118 (40 CFR 721.12288), P-24-119 (40 CFR 721.12289), P-24-120 (40 CFR 721.12290), P-24-121 (40 CFR 721.12291), P-25-5 (40 CFR 721.12292), P-25-6 (40 CFR 721.12293), P-25-7 (40 CFR 721.12294), P-25-8 (40 CFR 721.12295), P-25-9 (40 CFR 721.12296) and P-25-10 (40 CFR 721.12297)

Chemical Names: Phenol, 4,4’-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic) (P-24-116); alkanic acid, compds. with hydrolyzed bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic) (P-24-117); alkanic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-2-(alkylamino)alkanol reaction products (generic) (P-24-118); amidosulfonic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-2-(alkylamino)alkanol reaction products (generic) (P-24-119); alkanic acid, compds. with hydrolyzed bisphenol-monoalkylamine-epichlorohydrin polymer 4-alkylphenyl ether-alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic) (P-24-120); phenol, 4,4-(1-alkylidene)bis-, polymer with 2-

(chloromethyl)oxirane and monoalkylamine, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic) (P-24-121); cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol and epichlorohydrin, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-5); phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-6); phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-7); benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-8); cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol, epichlorohydrin and benzenediol, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-9); and benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic) (P-25-10).

CASRN or Accession Nos.: Not available.

Effective Date of TSCA Order: January 23, 2026.

Basis for TSCA Order: The PMNs state that the generic (non-confidential) uses will be as coatings for metal parts. Based on submitted test data for P-24-120, EPA has identified concerns for skin sensitization for the P-24-116-121 PMN substances. Based on comparison to analogous chemical substances, EPA has also identified concerns for systemic effects, eye and respiratory tract irritation for the P-24-116-121 PMN substances. Based on comparison to analogous chemical substances, EPA has also identified concerns for clinical signs and systemic effects for the P-24-116 and P-24-121 PMN substances. Based on comparison to analogous chemical substances, EPA has also identified concerns for eye irritation,

reproductive, developmental, and systemic effects for the P-24-119 substance. Based on submitted test data on the P-25-5 PMN substance and comparison to analogous chemical substances, EPA has also identified concerns for skin sensitization for the P-25-5-10 PMN substances. Based on comparison to analogous chemical substances, EPA has also identified concerns for eye and respiratory tract irritation, clinical signs, and systemic effects for the P-25-5-10 PMN substances. Based on comparison to analogous polycationic polymers, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 11 ppb for the P-24-116-120 and P-25-5-10 PMN substances and 9 ppb for the P-24-121 PMN substance. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- No manufacture of the PMN substances unless the weight percentage of nitrogen from cationic amines in each PMN substance is less than or equal to 2% (by weight);
- Manufacture, processing, and use of the PMN substances only in a manner that does not result in inhalation exposure to the PMN substances;
- Manufacture, processing, and use of the PMN substances only if all vapor, aerosol, dust, or mist containing the PMN substances is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the PMN substances;
- No processing for use or use of the PMN substances in a consumer product;
- Use of personal protective equipment where there is a potential for dermal exposure;
- No release of the PMN substances, or any waste stream containing the PMN substances, resulting in surface water concentrations that exceed 11 ppb of the P-24-116-121 and P-25-5-10 PMN substances in aggregate; and
- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to

modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of skin sensitization, eye irritation, and specific target organ toxicity testing on the P-24-116-121 and P-25-5-10 PMN substances, reproductive/developmental toxicity on the P-24-119 PMN substance, and aquatic toxicity testing on the P-24-117-0119, P-24-121, and P-25-5-10 PMN substances may be potentially useful to characterize the health and environmental effects of the PMN substances. Although the Order does not require these tests, the Order's restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P-24-192 (40 CFR 721.12298)

Chemical Name: Poly(oxy-1,2-ethanediyl), .alpha.-(1-oxo-2-propen-1-yl)-.omega.-(4-benzoylphenoxy)-.

CASRN: 478549-43-8.

Effective Date of TSCA Order: January 7, 2026.

Basis for TSCA Order: The PMN states that the use will be as a component in paints, coatings, and inks. Based on test data for components, EPA has identified concerns for skin sensitization. Based on comparison to analogous acrylates/methacrylates, EPA has also identified concerns for respiratory sensitization. Based on test data for benzophenones, EPA has also identified concerns for photosensitization. Based on comparison to analogous chemical substances, EPA has also identified concerns for systemic, reproductive, and developmental effects, and carcinogenicity. Based on comparison to analogous acrylates/methacrylates, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 13 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substance may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- Use of personal protective equipment where there is a potential for dermal exposure;
- Use of a NIOSH-certified respirator with an APF of at least 50 where there is a potential for inhalation exposure;
- No processing for use or use of the PMN substance in a consumer product;
- No spray application of the PMN substance other than using an automated spray booth;

- No release of the PMN substance, or any waste stream containing the PMN substance, into water; and

- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The proposed SNUR would designate as a "significant new use" the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of carcinogenicity, developmental toxicity, endocrine effects, phototoxicity, reproductive toxicity, skin sensitization, specific target organ toxicity, toxicokinetics, and aquatic toxicity testing may be potentially useful to characterize the health and environmental effects of the PMN substance. Although the Order does not require these tests, the Order's restrictions remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

P-25-98 (40 CFR 721.12299) and P-25-99 (40 CFR 721.12300)

Chemical Names: Sulfonium, tricarboxylic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-(haloheterocyclic)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (generic) (P-25-98) and sulfonium, tricarboxylic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-alkyl-2-((halocarbomonocyclic)alkano)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (generic) (P-25-99).

CASRNs: Not available.

Effective Date of TSCA Order: January 15, 2026.

Basis for TSCA Order: The PMNs state that the generic (non-confidential) uses will be for photolithography. Based on the physical/chemical properties of the PMN substances (as described in the New Chemical Program's PBT category at 64 FR 60194; November 1999) and in the absence of data, the anion and cation of the PMN substances and the cation photodegradation products of the PMN substances are potentially PBT chemicals. EPA estimates that the anion and cation of the PMN substances will persist in the environment for more than six months and that their potential to

bioaccumulate is unknown. EPA estimates that the cation photodegradation products of the PMN substances will persist in the environment for more than six months and estimates a bioaccumulation factor of greater than or equal to 5,000. Based on comparison to analogous chemical substances, EPA has identified concerns for acute toxicity, irritation to the skin and respiratory tract, eye corrosion, and neurological and systemic effects for the sulfonium cations of the PMN substances. Based on photoreactivity of the PMN substances, EPA has also identified concerns for photosensitization for the sulfonium cations of the PMN substances. Based on comparison to analogous PFAS substances, EPA has also identified concerns for systemic, reproductive and developmental toxicity for the anions of the PMN substances. Based on submitted test data on the P-25-0099 PMN substance, EPA has also identified concerns for genetic toxicity for the P-25-0099 PMN substance. Due to insufficient information, EPA was unable to estimate the environmental hazard of the PMN substances. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- No manufacture of the PMN substances beyond the time limits specified in the Order without submittal to EPA the results of certain testing described in the Testing section of the Order;
- Use of personal protective equipment where there is a potential for dermal exposure;
- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS;
- No processing of the PMN substances in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process;
- Use of the PMN substances only for the confidential use listed in the Order;
- No domestic manufacture of the PMN substance (*i.e.*, import only);
- Disposal of the PMN substances, or waste streams containing the PMN substances, only by hazardous waste incineration at a facility that is in compliance with RCRA subtitle C;
- Import of the PMN substances only in solution, unless in sealed containers weighing 5 kilograms or less; and

- No exceedance of the confidential annual importation volume listed the Order.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information about the physical/chemical properties, fate, bioaccumulation, environmental hazard, and human health effects of the PMN substances may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the time limits specified in the Order without performing the required Tier I and Tier II testing outlined in the Testing section of the Order.

P-25-100 (40 CFR 721.12301), P-25-102 (40 CFR 721.12302), P-25-111 (40 CFR 721.12303), P-25-112 (40 CFR 721.12304), and P-25-124 (40 CFR 721.12305)

Chemical Names: Aromatic sulfonium tricyclo salt with alkyl carbomonocycle hetero-acid (generic) (P-25-100), carboheterocyclo aromatic sulfonium salt with dicycloalkyl carbomonocycle hetero-acid (generic) (P-25-102), haloaromatic iodonium dicyclo salt with polyfluoroalkyl carbomonocycle hetero-acid (generic) (P-25-111), haloaromatic iodonium dicyclo salt with halogenated hydroxyaryl carboxylic acid (generic) (P-25-112), and alkyl aromatic sulfonium, polycyclic alkyl sulfamate (generic) (P-25-124).

Accession Nos: 303823 (P-25-100), 303834 (P-25-102), 303787 (P-25-111), 303798 (P-25-112), and 303801 (P-25-124).

Effective Date of TSCA Order: February 11, 2026.

Basis for TSCA Order: The PMNs state that the generic (non-confidential) uses will be for photoacid generator use at customer sites (PMNs P-25-100, P-25-102, and P-25-111) and as additives for use in electronics industry (PMNs P-25-112 and P-25-124). Based on the physical/chemical properties of the PMN substances (as described in the New Chemical Program’s PBT category at 64 FR 60194; November 1999) and in the absence of data, the anions of the PMN substances, the cations of the P-25-102, P-25-111, P-25-112, and P-25-124 PMN substances, the cation photodegradation products of the P-25-100 and P-25-124 PMN substances, and the photolysis products of the P-25-111 and P-25-112 PMN substances are

potentially persistent, bioaccumulative, and toxic (PBT) chemicals. EPA estimates that the anions of the PMN substances and the cations of the P-25-102, P-25-111, P-25-112, and P-25-124 PMN substances will persist in the environment for more than six months and that their potential to bioaccumulate is unknown. EPA estimates that the cation photodegradation products of the P-25-100 and P-25-124 PMN substances and the photolysis products of the P-25-111 and P-25-112 PMN substances will persist in the environment for more than six months and estimates a bioaccumulation factor of greater than or equal to 5,000. Based on comparison to analogous chemical substances, EPA has identified concerns for acute toxicity, irritation to the skin and respiratory tract, eye corrosion, genetic toxicity, and neurological and systemic effects for the sulfonium cations of the P-25-100, P-25-102, and P-25-124 PMN substances. Based on photoreactivity of the PMN substances, EPA has also identified concerns for photosensitization for the sulfonium cations of the PMN substances. Based on comparison to analogous chemical substances, EPA has also identified concerns for skin irritation, genetic toxicity, skin and respiratory sensitization, and systemic, reproductive, and developmental toxicity for the P-25-111 PMN substance and eye corrosion and genetic toxicity for the P-25-112 PMN substance. Due to insufficient information, EPA was unable to estimate the environmental hazard of the PMN substances. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that in the absence of sufficient information to permit a reasoned evaluation, the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the Order requires:

- No manufacture of the PMN substances beyond the time limits specified in the Order without submittal to EPA the results of certain testing described in the Testing section of the Order;
- Use of personal protective equipment where there is a potential for dermal exposure;
- Establishment of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS;
- No processing of the PMN substances in any way that generates

vapor, dust, mist, or aerosol in a non-enclosed process;

- Use of the PMN substances only for the confidential use listed in the Order;
- No domestic manufacture of the PMN substance (*i.e.*, import only);
- Disposal of the PMN substances, or waste streams containing the PMN substances, only by hazardous waste incineration in compliance with RCRA subtitle C;
- Import of the PMN substances only in solution, unless in sealed containers weighing 5 kilograms or less; and
- No exceedance of the confidential annual importation volumes listed the Order.

The proposed SNUR would designate as a “significant new use” the absence of these protective measures.

Potentially Useful Information: EPA has determined that certain information about the physical/chemical properties, fate, bioaccumulation, environmental hazard, and human health effects of the PMN substances may be potentially useful in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the time limits specified in the Order without performing the required Tier I and Tier II testing outlined in the Testing section of the Order.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at <https://www.epa.gov/laws-regulations-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review

This action proposes to establish SNURs for new chemical substances that were the subject of PMNs. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866 (58 FR 51735, October 4, 1993).

B. Executive Order 14192: Unleashing Prosperity Through Deregulation

Executive Order 14192 (90 FR 9065, February 6, 2025) does not apply because significant new use rules for new chemicals under TSCA section 5 are exempted from review under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

According to the PRA (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to

respond to a collection of information that requires OMB approval under PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9, and included on the related collection instrument or form, if applicable.

The information collection requirements related to SNURs have already been approved by OMB pursuant to PRA under OMB control number 2070-0038 (EPA ICR No. 1188). This action does not impose any burden requiring additional OMB approval. If an entity were to submit a SNUN to the Agency, the annual burden is estimated to average between 30 and 170 hours per submission. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review, and submit the required SNUN.

EPA always welcomes your feedback on the burden estimates. When submitting comments on these proposed SNURs, include comments about the accuracy of the burden estimate, and any suggested methods for improving the collection instruments or instruction or minimizing respondent burden, including through the use of automated collection techniques.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA (5 U.S.C. 601 *et seq.*). The requirement to submit a SNUN applies to any person (including small or large entities) who intends to engage in any activity described in the final rule as a "significant new use." Because these uses are "new," based on all information currently available to EPA, EPA has concluded that no small or large entities presently engage in such activities.

A SNUR requires that any person who intends to engage in such activity in the future must first notify EPA by submitting a SNUN. Although some small entities may decide to pursue a significant new use in the future, EPA cannot presently determine how many, if any, there may be. However, EPA's experience to date is that, in response to the promulgation of SNURs covering over 1,000 chemicals, the Agency receives only a small number of notices per year. For example, the number of SNUNs received was 23 in FY2023, 7 in FY2024, and 10 in FY2025, and only a

fraction of these submissions were from small businesses.

In addition, the Agency currently offers relief to qualifying small businesses by reducing the SNUN submission fee from \$37,000 to \$6,480. This lower fee reduces the total reporting and recordkeeping cost of submitting a SNUN to about \$14,967 per SNUN submission for qualifying small firms. Therefore, the potential economic impacts of complying with these proposed SNURs are not expected to be significant or adversely impact a substantial number of small entities. In a SNUR that published in the **Federal Register** of June 2, 1997 (62 FR 29684) (FRL-5597-1), the Agency presented its general determination that SNURs are not expected to have a significant economic impact on a substantial number of small entities, which was provided to the Chief Counsel for Advocacy of the Small Business Administration.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more (in 1995 dollars) in any one year as described in UMRA, 2 U.S.C. 1531-1538, and does not significantly or uniquely affect small governments. Based on EPA's experience with proposing and finalizing SNURs, State, local, and Tribal governments have not been impacted by SNURs, and EPA does not have any reasons to believe that any State, local, or Tribal government will be impacted by these SNURs. In addition, the estimated costs of this action to the private sector do not exceed \$183 million or more in any one year (the 1995 dollars are adjusted to 2023 dollars for inflation using the GDP implicit price deflator). The estimated costs for this action are discussed in Unit I.D.

F. Executive Order 13132: Federalism

This action will not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it is not expected to have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, the requirements of Executive Order 13132 do not apply to this action.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action will not have Tribal implications as specified in Executive

Order 13175 (65 FR 67249, November 9, 2000), because it is not expected to have substantial direct effects on Indian Tribes, significantly or uniquely affect the communities of Indian Tribal governments and does not involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Executive Order 13175 do not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it does not concern an environmental health or safety risk. Since this action does not concern a human health risk, EPA's 2026 Policy on Children's Health also does not apply. Although the establishment of these SNURs do not address an existing children's environmental health concern because the chemical uses involved are not ongoing uses, SNURs require that persons notify EPA at least 90 days before commencing manufacture (defined by statute to include import) or processing of the identified chemical substances for an activity that is designated as a significant new use by the SNUR. This notification allows EPA to assess the intended uses to identify potential risks and take appropriate actions before the activities commence.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a "significant energy action" as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

This action does not involve any technical standards subject to NTTAA section 12(d) (15 U.S.C. 272 note).

List of Subjects in 40 CFR part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: July 17, 2026.

Mary Elissa Reaves,

Director, Office of Pollution Prevention and Toxics.

For the reasons stated in the preamble, EPA proposes to amend 40 CFR chapter I as follows:

PART 721—SIGNIFICANT NEW USES OF CHEMICAL SUBSTANCES

■ 1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

■ 2. Add §§ 721.12279 through 721.12305 to subpart E to read as follows:

* * * * *

Sec.

- 721.12279 Polysaccharide, (hydroxytrialkylammonio)alkyl ether, chloride (generic).
- 721.12280 Heteroatom-substituted dihalo acid, methyl substituted-alkyl ester (generic).
- 721.12281 Rhannolipids, *Pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, potassium salts.
- 721.12282 Rhannolipids, *Pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, sodium salts.
- 721.12283 Rhannolipids, *Pseudomonas allopuntida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, potassium salt.
- 721.12284 Rhannolipids, *Pseudomonas allopuntida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, sodium salt.
- 721.12285 Carbomonocycle alkylamide, 3,5-bis(1,1-dialkyl)-N-[3-alkylene-2,5-dioxo-1-heteromonocyclic]-4-hydroxy- (generic).
- 721.12286 Phenol, 4,4'-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic).
- 721.12287 Alkanoic acid, compds. with hydrolyzed bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic).
- 721.12288 Alkanoic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-2-(alkylamino)alkanol reaction products (generic).
- 721.12289 Amidosulfonic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether-2-(alkylamino)alkanol reaction products (generic).
- 721.12290 Alkanoic acid, compds. with hydrolyzed bisphenol-monoalkylamine-epichlorohydrin polymer 4-alkylphenyl ether-alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic).
- 721.12291 Phenol, 4,4-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane and monoalkanamine, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic).
- 721.12292 Cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol and epichlorohydrin, reaction

products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

- 721.12293 Phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).
- 721.12294 Phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).
- 721.12295 Benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).
- 721.12296 Cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol, epichlorohydrin and benzenediol, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).
- 721.12297 Benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

§ 721.12279 Polysaccharide, (hydroxytrialkylammonio)alkyl ether, chloride (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as polysaccharide,

(hydroxytrialkylammonio)alkyl ether, chloride (PMN P-23-140) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(3)(iii) and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and (k). It is a significant new use to manufacture the substance unless the degree of substitution of amine-nitrogen (as measured by Kjeldahl nitrogen testing) is at or below the confidential percentage by weight listed in the Order.

(iii) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4), where N=193. This requirement does not apply to processors or users who receive the substance at less than 5.5% by weight in formulation.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c), (f) through (j), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12280 Heteroatom-substituted dihalo acid, methyl substituted-alkyl ester (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as heteroatom-substituted dihalo acid, methyl substituted-alkyl ester (PMN P-24-24) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been entrained in an article.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general

and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin corrosion, serious eye damage, reproductive toxicity, carcinogenicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(a), (b), (c), and (o).

(iv) *Disposal.* Requirements as specified in § 721.85(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12281 Rhamnolipids, *Pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, potassium salts.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as rhamnolipids, *pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, potassium salts (PMN P-24-93) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (a)(3) through (6), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. For purposes of § 721.63(a)(5) and (6), respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 50.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this substance may cause: serious eye damage and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture or process the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to use the substance at a concentration above 3% by weight in the final formulation, including in any consumer product.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12282 Rhamnolipids, *Pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, sodium salts.

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified as rhamnolipids, *Pseudomonas putida* strain BS-PP-484-fermented, from D-glucose, sodium salts (PMN P-24-94) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (a)(3) through (6), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. For purposes of § 721.63(a)(5) and (6), respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 50.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this

substance may cause: serious eye damage and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture or process the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to use the substance at a concentration above 3% by weight in the final formulation, including in any consumer product.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12283 Rhamnolipids, *Pseudomonas allopitida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, potassium salt.

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified as rhamnolipids, *Pseudomonas allopitida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, potassium salt (PMN P-24-95) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (a)(3) through (6), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. For purposes of § 721.63(a)(5) and (6), respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 50.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this substance may cause: serious eye damage and specific target organ

toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture or process the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to use the substance at a concentration above 3% by weight in the final formulation, including in any consumer product.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12284 Rhamnolipids, *Pseudomonas allopuntida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, sodium salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as rhamnolipids, *Pseudomonas allopuntida* mt-2 KT 2440 strain BS-PP 555-fermented, from D-glucose, sodium salt (PMN P-24-96) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (a)(3) through (6), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. For purposes of § 721.63(a)(5) and (6), respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 50.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this substance may cause: serious eye damage and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the

Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture or process the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to use the substance at a concentration above 3% by weight in the final formulation, including in any consumer product.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12285 Carbomonocycle alkylamide, 3,5-bis(1,1-dialkyl)-N-[3-alkylene-2,5-dioxo-1-heteromonocyclic]-4-hydroxy- (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as carbomonocycle alkylamide, 3,5-bis(1,1-dialkyl)-N-[3-alkylene-2,5-dioxo-1-heteromonocyclic]-4-hydroxy- (PMN P-24-104) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or cured (i.e., the substance has been reacted or cured to the extent that no release of the substance can be detected).

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), and (g)(1) and (5). For purposes of § 721.72(g)(1), this substance may cause: carcinogenicity, eye irritation, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the

Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture, process, or use the substance other than in a liquid solution. It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12286 Phenol, 4,4'-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as phenol, 4,4'-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (PMN P-24-116) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target

organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12287 Alkanoic acid, compds. with hydrolyzed bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alkanoic acid, compds. with hydrolyzed bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- alkylpolyamine and 2-(alkylamino)alkanol reaction products (PMN P-24-117) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12288 Alkanoic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- 2-(alkylamino)alkanol reaction products (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alkanoic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- 2-(alkylamino)alkanol reaction products (PMN P-24-118) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is

primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12289 Amidosulfonic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- 2-(alkylamino)alkanol reaction products (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as amidosulfonic acid, compds. with [(aminoalkyl)imino]bis[alkanol]-bisphenol-epichlorohydrin polymer 4-alkylphenyl ether- 2-(alkylamino)alkanol reaction products (PMN P-24-119) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the

substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12290 Alkanoic acid, compds. with hydrolyzed bisphenol-monoalkylamine-epichlorohydrin polymer 4-alkylphenyl ether- alkylpolyamine and 2-(alkylamino)alkanol reaction products (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as alkanoic acid, compds. with hydrolyzed bisphenol-monoalkylamine-epichlorohydrin polymer 4-alkylphenyl ether-alkylpolyamine and 2-(alkylamino)alkanol reaction products (PMN P-24-120) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative

control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12291 Phenol, 4,4-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane and monoalkanamine, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as phenol, 4,4-(1-alkylidene)bis-, polymer with 2-(chloromethyl)oxirane and monoalkanamine, 4-alkylphenyl ether, reaction products with alkylpolyamine and 2-(alkylamino)alkanol, hydrolyzed, alkanesulfonates (salts) (PMN P-24-121) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12292 Cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol and epichlorohydrin, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol and epichlorohydrin, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It

is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12293 Phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-6) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12294 Phenol, 4,4-(1-alkylidene)bis-, polymer with [(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as phenol, 4,4-(1-alkylidene)bis-, polymer with

[(aminoalkyl)imino]bis[alkanol] and 2-(chloromethyl)oxirane, 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part

apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12295 Benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 4-alkylphenyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It

is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12296 Cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol, epichlorohydrin and benzenediol, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as cashew, nutshell liq., polymer with [(aminoalkyl)imino]bis[alkanol], bisphenol, epichlorohydrin and benzenediol, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12297 Benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as benzenediol, polymer with [(aminoalkyl)imino]bis[alkanol], 2-

(chloromethyl)oxirane and 4,4-(1-alkylidene)bis[phenol], 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkylcarboxylates (salts) alkanesulfonates (salts) (PMN P-25-10) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1) and (3) and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: eye irritation, skin sensitization, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture the substance unless the weight percentage of nitrogen from cationic amines in the substance is less than or equal to 2% (by weight). It is a significant new use to manufacture, process, or use the substance in any manner that results in inhalation exposure to the substance. It is a significant new use to manufacture, process, or use the substance unless all vapor, aerosol, dust, or mist containing the substance is captured and routed through engineering controls (e.g., thermal oxidation) that achieve an efficiency of 98% or greater destruction of the substance.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=11 in aggregate of the P-24-116, P-24-117, P-24-118, P-24-119, P-24-120, P-24-121, P-25-5, P-25-6, P-25-7, P-25-8, P-25-9, and P-25-10 substances. For purposes of § 721.91(a)(7), the control technology is primary and secondary wastewater treatment as defined in 40 CFR part 133 and the percentage removal of the substance resulting from use of the specified control technology is 90%.

(b) *Specific requirements.* The provisions of subpart A of this part

apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12298 Poly(oxy-1,2-ethanediyl), .alpha.-(1-oxo-2-propen-1-yl)-.omega.-(4-benzoylphenoxy)-.

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified as poly(oxy-1,2-ethanediyl), .alpha.-(1-oxo-2-propen-1-yl)-.omega.-(4-benzoylphenoxy)- (PMN P-24-192; CASRN 478549-43-8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or cured (*i.e.*, the substance has been reacted or cured to the extent that no release of the substance can be detected).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (3) through (6), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (*e.g.*, enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.*, workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. For purposes of § 721.63(a)(5) and (6), respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 50.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (d), (f), (g)(1), (g)(3)(iii), and (g)(5). For purposes of § 721.72(g)(1), this substance may cause: respiratory sensitization, skin sensitization, carcinogenicity, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to spray-apply the

substance other than when using an automated spray booth.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12299 Sulfonium, tricarbo-cyclic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-(haloheterocyclic)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as sulfonium, tricarbo-cyclic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-(haloheterocyclic)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (PMN P-25-98) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i) and (iii), (a)(3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (*e.g.*, enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.*, workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin irritation, serious eye damage, skin sensitization, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning

statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 9 months.

(iv) *Disposal.* It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration at a facility that is in compliance with RCRA subtitle C.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12300 Sulfonium, tricarbo-cyclic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-alkyl-2-((halocarbomonocyclic)alkano)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as sulfonium, tricarbo-cyclic-, .alpha.,.alpha.,.beta.,.beta.-polyfluoropolyhydro-2-alkyl-2-((halocarbomonocyclic)alkano)-4,7-methano-1,3-heteropolycyclic-5-alkanesulfonate (1:1) (PMN P-25-99) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering

control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin irritation, serious eye damage, skin sensitization, genetic toxicity, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 9 months.

(iv) *Disposal.* It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration at a facility that is in compliance with RCRA subtitle C.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12301 Aromatic sulfonium tricyclo salt with alkyl carbomonocycle hetero-acid (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as aromatic sulfonium tricyclo salt with alkyl carbomonocycle hetero-acid (PMN P-25-100; Accession No. 303823) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been

completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin irritation, serious eye damage, skin sensitization, genetic toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 18 months.

(iv) *Disposal.* It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration in compliance with RCRA subtitle C.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.12302 Carboheterocyclo aromatic sulfonium salt with dicycloalkyl carbomonocycle hetero-acid (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as carboheterocyclo aromatic sulfonium salt with dicycloalkyl carbomonocycle hetero-acid (PMN P-25-102; Accession No. 303834) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication.*

Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin irritation, serious eye damage, skin sensitization, genetic toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 18 months.

(iv) *Disposal.* It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration in compliance with RCRA subtitle C.

(b) *Specific requirements.* The provisions of subpart A of this part

apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping*. Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements*. The provisions of § 721.185 apply to this section.

§ 721.12303 Haloaromatic iodonium dicyclo salt with polyfluoroalkyl carbomonocycle hetero-acid (generic).

(a) *Chemical substance and significant new uses subject to reporting*.

(1) The chemical substance identified generically as haloaromatic iodonium dicyclo salt with polyfluoroalkyl carbomonocycle hetero-acid (PMN P-25-111; Accession No. 303787) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace*. Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication*. Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: skin irritation, skin sensitization, genetic toxicity, respiratory sensitization, reproductive toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities*. Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new

use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 18 months.

(iv) *Disposal*. It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration in compliance with RCRA subtitle C.

(b) *Specific requirements*. The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping*. Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements*. The provisions of § 721.185 apply to this section.

§ 721.12304 Haloaromatic iodonium dicyclo salt with halogenated hydroxyaryl carboxylic acid (generic).

(a) *Chemical substance and significant new uses subject to reporting*.

(1) The chemical substance identified generically as haloaromatic iodonium dicyclo salt with halogenated hydroxyaryl carboxylic acid (PMN P-25-112; Accession No. 303798) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace*. Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication*. Requirements as specified in § 721.72(a) through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: serious eye damage, skin sensitization, and genetic toxicity. Alternative hazard and warning statements that meet the criteria of the

Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities*. Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 18 months.

(iv) *Disposal*. It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration in compliance with RCRA subtitle C.

(b) *Specific requirements*. The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping*. Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements*. The provisions of § 721.185 apply to this section.

§ 721.12305 Alkyl aromatic sulfonium, polycyclic alkyl sulfamate (generic).

(a) *Chemical substance and significant new uses subject to reporting*.

(1) The chemical substance identified generically as alkyl aromatic sulfonium, polycyclic alkyl sulfamate (PMN P-25-124; Accession No. 303801) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been completely reacted or adhered (during photolithographic processes) onto a semiconductor wafer surface or similar manufactured article used in the production of semiconductor technologies.

(2) The significant new uses are:

(i) *Protection in the workplace*. Requirements as specified in § 721.63(a)(1), (2)(i) and (iii), (3), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (e.g., enclosure or confinement of the operation, general and local ventilation) or administrative control measures (e.g., workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Hazard communication*. Requirements as specified in § 721.72(a)

through (f), (g)(1), (2)(i) through (iii) and (v), (3)(i) and (ii), and (5). For purposes of § 721.72(e), the concentration is set at 1.0%. For purposes of § 721.72(g)(1), this substance may cause: acute toxicity, skin irritation, serious eye damage, skin sensitization, genetic toxicity, and specific target organ toxicity. Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (t). It is a significant new use to import the substance other than in solution, unless in sealed containers weighing 5 kilograms or less. It is a significant new use to process the substance in any way that generates vapor, dust, mist, or aerosol in a non-enclosed process. It is a significant new use to manufacture the substance longer than 18 months.

(iv) *Disposal.* It is a significant new use to dispose of the substance, or waste streams containing the substance, other than by hazardous waste incineration in compliance with RCRA subtitle C.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitation or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

BILLING CODE 6560-50-P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

45 CFR Part 1203

RIN 3045-AA95

Rescinding Portions of AmeriCorps Title VI Regulations To Conform More Closely With the Statutory Text and To Implement Executive Order 14281

AGENCY: Corporation for National and Community Service.

ACTION: Proposed rule.

SUMMARY: The Corporation for National and Community Service (operating as AmeriCorps) proposes to amend its regulations implementing Title VI of the Civil Rights Act of 1964 (“Title VI”) to eliminate disparate-impact liability. The

proposed amendments would align the conduct prohibited by AmeriCorps’ regulations with Title VI’s original public meaning, avoid constitutional concerns, reduce compliance costs, and serve the public interest. In addition, these revisions would be consistent with Executive Order (E.O.) 14281 and conform to regulatory updates recently finalized by the U.S. Department of Justice (DOJ).

DATES: Written comments must be submitted by August 24, 2026.

ADDRESSES: Please send your comments electronically through the Federal government’s one-stop rulemaking website at www.regulations.gov. If you are unable to access the www.regulations.gov for any reason, you may send your comments to publiccomments@americorps.gov or by mail to AmeriCorps (ATTN: Elizabeth Appel), 250 E Street SW, Washington, DC 20525.

FOR FURTHER INFORMATION CONTACT: Elizabeth Appel, Acting General Counsel, (202) 606–3614, eappel@americorps.gov.

SUPPLEMENTARY INFORMATION:

I. Background

AmeriCorps is proposing ¹ to rescind portions of its regulations that were promulgated pursuant to Title VI, 42 U.S.C. 2000d *et seq.*, to more closely align its regulations to Title VI, which prohibits intentionally discriminatory conduct. There are serious statutory and constitutional concerns with the legality of AmeriCorps’ Title VI regulations that go beyond intentional discrimination by prohibiting conduct that has an unintentional disparate impact. This proposed rule accordingly would rescind those portions of the regulations that prohibit conduct having a disparate impact, which are in considerable tension with both the statute and the Constitution and do not sufficiently serve the public interest.

Pursuant to E.O. 12250, *Leadership and Coordination of Nondiscrimination Laws*, the Attorney General “shall coordinate the implementation and enforcement by Executive agencies of various nondiscrimination provisions,” including Title VI of the Civil Rights Act. 45 FR 72995, 72995 (Nov. 4, 1980). As part of this responsibility, the Order

¹ Although many other Federal agencies have amended their Title VI regulations without undergoing public notice and comment, AmeriCorps is seeking public comment to ensure compliance with the public law granting it appropriations, which states that AmeriCorps may “make any significant changes to program requirements, service delivery or policy only through public notice and comment rulemaking.” See Public Law 119–75, Div. B, Title IV, Sec. 401.

provides that other Federal agencies’ regulations implementing Title VI are also subject to the Attorney General’s approval. *Id.* at 72996. The DOJ’s Title VI implementing regulations are codified at 28 CFR 42.101 through 42.112.

On April 23, 2025, the President issued E.O. 14281, *Restoring Equality of Opportunity and Meritocracy*, 90 FR 17537 (Apr. 28, 2025). The Order directed the Attorney General and DOJ to initiate review and repeal or amend Title VI regulations to eliminate the use of disparate-impact liability. *Id.* Section 5 of the Order directed the Attorney General to “initiate appropriate action to repeal or amend the implementing regulations for Title VI of the Civil Rights Act of 1964 for all agencies to the extent they contemplate disparate-impact liability.” *Id.*

On December 10, 2025, DOJ published a final rule to rescind portions of the implementing regulations at 28 CFR part 42 to more closely align the regulations to the language of Title VI of the Civil Rights Act prohibiting intentionally discriminatory conduct, rescinding portions of the regulations that prohibited conduct having an unintentional disparate impact, and revising the regulation to conform with E.O. 14281. See 90 FR 57141. AmeriCorps agrees with the rationale provided in DOJ’s rule and independently issues its own rule to amend its Title VI regulations.

The practical impact of this proposed rule’s modifications would be to make clear to AmeriCorps Federal-funding recipients that AmeriCorps’ Title VI regulations prohibit only intentional discrimination and do not prohibit conduct or activities that have a disparate impact in the absence of intentional discrimination, and that AmeriCorps thus will not pursue Title VI disparate-impact liability against its Federal-funding recipients.

II. Discussion

A. Statutory History of Title VI

Title VI of the Civil Rights Act of 1964, as amended, provides: “No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.” 42 U.S.C. 2000d. Title VI also directs Federal departments and agencies that extend Federal financial assistance to “effectuate the provisions of” Title VI “by issuing rules, regulations, or orders of general applicability.” 42 U.S.C. 2000d–1.
