Incorporation by Reference

Class E5 airspace area designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11K, dated August 4, 2025, and effective September 15, 2025. These updates would be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11K, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 that would modify Class E airspace area extending upward from 700 feet above the surface at the Samaritan North Lincoln Hospital Heliport, Lincoln, OR, to contain private-use special instrument flight procedures in support of passenger shuttle, medevac, and cargo operations.

The Samaritan North Lincoln Hospital Heliport's current Class E airspace area does not fully contain IFR arrival operations for the COPTER Area Navigation (RNAV) (Global Positioning System [GPS]) 09 approach procedure when operating between the surface and

1,500 feet above the surface. A three-mile extension would be established to the west to better contain these operations. Additionally, the airspace area would be extended two miles southwest to appropriately contain the missed approach procedure.

Furthermore, the current Class E airspace area boundary does not fully contain the missed approach procedure for the COPTER RNAV (GPS) 036 and the LMPRY ONE DEPARTURE (RNAV) procedures and the radius would be extended approximately 1.7 miles to more appropriately contain the instrument flight procedures.

Finally, the Class E airspace area boundary does not fully contain IFR departures as they transition to an enroute environment while on the missed approach procedure as aircraft climb above 1,200 feet above the surface on the COPTER RNAV (GPS) 09 and LMPRY ONE DEPARTURE (RNAV) procedures. The boundary would be extended to approximately 6.3 miles northwest to more appropriately contain the instrument flight procedures.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, *FAA National Environmental Policy Act Implementing Procedures*, prior to any FAA final regulatory action.
