Abstract of Proposed Collection

The information requested on the DS-3057 is required for professional medical staff of the Bureau of Medical Services to make decisions on the type of medical clearance an individual and family members are assigned. Under the authority of the Foreign Service Act of 1980 (22 U.S.C. 3901) and the Basic Authorities Act of 1956 (22 U.S.C. 2651), the Secretary has the ability to establish a medical program. As specified in 16 FAM 201.1, the medical program provides medical examinations for applicants for employment and medical examinations as necessary for members of the Foreign Service and employees of the Department and their eligible family members. The Medical Clearance Program ensures that all members of the Foreign Service, other Department employees, other Agency employees through the ICASS program, and their eligible family members have appropriate medical facilities abroad for any underlying medical conditions. Following their initial medical clearance, respondents will use a DS-3057 to maintain medical clearance

validity throughout their employment under Chief of Mission.

Methodology

The information will be collected digitally by the respondent via MED's new online portal system, myMED, within the MED Provider Portal (MPP) application. Identification verification and two-factor authentication will be a requirement to access the online system where the respondent will complete the DS-3057 questions for themselves and any children ages seventeen and younger. Adults eighteen and older will have their own account to complete their personal medical clearance review. Once complete, the answers to the DS-3057 will be submitted to the Office of Medical Clearances for the review to be completed via the secure online portal system.

Jessica A. Martinez,

Director of Medical Clearances, Bureau of Medical Services, Department of State.
