Interests of general deterrence also support a sanction of revocation, as any sanction less than revocation would signal to the registrant community that intentional diversion and repeated acts of unlawful prescribing can be excused, even in cases where a registrant has failed to accept responsibility for such misconduct.

In sum, Respondent has not offered sufficient credible evidence on the record to rebut the Government's case for revocation and Respondent has not demonstrated that she can be entrusted with the responsibility of registration. Accordingly, the Agency will order that Respondent's registrations be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a) and 21 U.S.C. 823(g)(1), I hereby revoke DEA Certificates of Registration Nos. MM3336422 and MR5666106 issued to Joan Rubinger, N.P. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Joan Rubinger, N.P., to renew or modify these registrations, as well as any other pending application of Joan Rubinger, N.P., for additional registration in California and/or New York.²⁷ This Order is effective August 31, 2026.

SUPPLEMENTARY INFORMATION:

I. Background

The NRC is making available to the public the "Environmental Assessment for the Proposed Renewal of Crow Butte Resources, Inc.'s License for In-Situ Uranium Recovery at the Crow Butte Project and Marsland Expansion Area in Dawes County, Nebraska." The EA is available in ADAMS under Accession No. ML26204A421.

II. Introduction

The NRC is considering the renewal of source and byproduct materials license SUA-1534 for CBR's ISR project in Dawes County, Nebraska at the Crow Butte Project (CBP) and Marsland Expansion Area (MEA) sites for an additional 20 years. CBR plans to continue recovering uranium and producing yellowcake using the ISR process. The CBP is an operating facility that has been in standby since 2018. The MEA has not yet been constructed. Yellowcake, the uranium oxide product of the ISR process, is used in the production of fuel for commercially operated nuclear power reactors.

The NRC staff has prepared an EA for this proposed licensing action in accordance with NRC regulations in part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," which implement the National Environmental Policy Act of 1969, as amended (NEPA). Based on the EA, the NRC has concluded that a FONSI is appropriate. Therefore, in
