Needs and Uses: This is a request for revision and extension of an approved information collection. The National Marine Fisheries Service (NMFS), Alaska Regional Office (AKR), is the sponsor of this information collection. The Amendment 80 Halibut Prohibited

Species Catch (PSC) Management Plan is being removed from this collection as it is no longer provided to the Council. The Council receives only one report annually. All voluntary information has been consolidated into the Amendment 80 Bycatch Report to the Council.

The North Pacific Fishery Management Council (Council) has developed cooperative programs as options in several fishery catch share programs. As part of cooperative programs, the Council and the National Marine Fisheries Service (NMFS) have required or requested that the cooperatives submit annual reports detailing various fishery activities. These reports are intended to be a resource for the Council to track the effectiveness of cooperatives and their ability to meet the Council's goals, and as way for NMFS to monitor the internal fishery management practices of cooperatives. Additionally, they are a tool for the cooperatives to provide feedback on the programs. This collection covers the following required and voluntary cooperative and inter-cooperative reports, agreements, and plans:

- The Alaska Crab Rationalization Program Cooperative Annual Report is voluntary and provides information about measures taken by cooperatives to increase the availability of crab quota share (QS) for transfer to active participants and crew members in the fishery, as well as actions to decrease high QS lease rates and improve low crew compensation.

- The Rockfish Program Cooperative Annual Report is a voluntary summary of cooperative harvests, retention, discards, monitoring methods, and disciplinary actions made within each Rockfish Program cooperative. Additionally, it contains voluntary reporting requirements including monthly chinook bycatch by origin, and intertemporal harvest information.

- The Amendment 80 Cooperative Annual Report is a required summary of cooperative harvests, discards, monitoring methods, disciplinary actions taken against non-compliant members, groundfish retention calculations, and a third-party audit. Voluntary elements of the report include catch from the Northern Bristol Bay Trawl Area, fleet catch capacity over time, and intertemporal harvest information. An additional voluntary element was added to this report in 2019 requesting information on cooperatives or other measures implemented to reduced bycatch in the Bering Sea and Aleutian Islands (BSAI) yellowfin sole Trawl Limited Access Sector fishery by A80 participants.
