

SUPPLEMENTARY INFORMATION: Section 315(f) of the Coastal Zone Management Act (CZMA) requires NOAA to conduct periodic evaluations of federally approved National Estuarine Research Reserves. The evaluation process includes holding one or more public meetings, considering public comments, and consulting with interested Federal, State, local agencies, and members of the public. During the evaluation, NOAA will consider the extent to which the state has met the national objectives and adhered to the management plan approved by the Secretary of Commerce, the requirements of Section 315 of the CZMA, and the terms of financial assistance under the CZMA. When the evaluation is complete, NOAA's Office for Coastal Management will place a notice in the **Federal Register** announcing the availability of the final evaluation findings.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Subpart 215.4, Contract Pricing, and Related Clause at DFARS 252.215; OMB Control Number 0704–0232.

Type of Request: Extension of a currently approved collection.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On Occasion.

Number of Respondents: 124.

Responses per Respondent: 1.2, approximately.

Annual Responses: 147.

Average Burden per Response: 42.2 hours, approximately.

Annual Burden Hours: 6,200.

Needs and Uses: The clause at DFARS 252.215–7002, Cost Estimating System Requirements, requires that certain large business contractors—

- Establish an acceptable cost estimating system and disclose the estimating system to the administrative contracting officer in writing;
- Maintain the estimating system and disclose significant changes in the system to the administrative contracting officer on a timely basis; and
- Respond in writing to written reports from the Government that identify material weaknesses in the estimating system.

DoD contracting officers use this information to determine if the contractor has an adequate system for generating cost estimates, which forecasts costs based on appropriate source information available at the time, and has the ability to monitor the correction of material weaknesses. The need for information collection decreases as contractor estimating systems improve and gain contracting officer approval. Due to the use of current data, the burden calculation for this information collection has been reduced.
