National Agricultural Statistics Service

Title: Livestock Slaughter.

OMB Control Number: 0535–0005.

Summary of Collection: The primary functions of the National Agricultural Statistics Service (NASS) are to prepare and issue State and national estimates of crop and livestock production, disposition, and prices and to collect information on related environmental and economic factors. Crop and livestock statistics help maintain a stable economic atmosphere and reduce risk for production, marketing, and distribution operations. The agricultural industry increasingly calls upon NASS to supply reliable, timely, and detailed information in its commodity estimation program. General authority for data collection activities is granted under U.S. Code title 7, section 2204(a). This statute specifies the “The Secretary of Agriculture shall procure and preserve all information concerning agriculture which he can obtain . . . by the collection of statistics . . . and shall distribute them among agriculturists”. Information from federally and non-federally inspected slaughter plants are used to estimate total red meat production. NASS will use a Federally and non-Federally inspected livestock slaughter survey to collect data.

Need and Use of the Information: plants are combined to estimate total red meat production, consisting of the number of head slaughtered and live weights of cattle, calves, hogs, sheep/lambs, goats, and buffalo/bison. Knowing total red meat production, the number of head slaughtered, and live weights allows the industry to prepare and address issues related to supply and pricing. The data are also used at the end of the year to confirm production and disposition information for NASS livestock estimates made during the year.

Description of Respondents: Business or other for-profit.

Number of Respondents: 700.

Frequency of Responses: Reporting: Quarterly.

Total Burden Hours: 1,701.
