

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

- 1. The authority citation for part 171 continues to read as follows:
- Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.
- 2. In § 171.8, revise the definitions for “hazardous substance” and “reportable quantity” in alphabetical order to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

Hazardous substance for the purposes of this subchapter, means a material, including its mixtures and solutions, that—

(1) Is listed in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter;

(2) Is in a quantity, in one package, which equals or exceeds the reportable quantity (RQ) listed in the 40 CFR 302.4 as referenced in appendix A to § 172.101 of this subchapter; and

(3) When in a mixture or solution—

(i) For radionuclides, the following requirements shall be used in determining if a package contains an RQ of a hazardous substance: (a) if the identity and quantity (in curies or terabecquerels) of each radionuclide in a mixture or solution is known, the ratio between the quantity per package (in curies or terabecquerels) and the RQ for the radionuclide must be determined for each radionuclide. A package contains an RQ of a hazardous substance when the sum of the ratios for the radionuclides in the mixture or solution is equal to or greater than one; (b) if the identity of each radionuclide in a mixture or solution is known but the quantity per package (in curies or terabecquerels) of one or more of the radionuclides is unknown, an RQ of a hazardous substance is present in a package when the total quantity (in curies or terabecquerels) of the mixture or solution is equal to or greater than the lowest RQ of any individual radionuclide in the mixture or solution; and (c) if the identity of one or more radionuclides in a mixture or solution is unknown (or if the identity of a radionuclide by itself is unknown), an RQ of a hazardous substance is present when the total quantity (in curies or terabecquerels) in a package is equal to or greater than either one curie or the lowest RQ of any known individual radionuclide in the mixture or solution, whichever is lower.

(ii) For other than radionuclides, is in a concentration by weight which equals or exceeds the concentration

corresponding to the RQ of the material, as shown in the following table:

RQ pounds (kilograms)	Concentration by weight	
	Percent	PPM
5,000 (2,270)	10	100,000
1,000 (454)	2	20,000
100 (45.4)	0.2	2,000
10 (4.54)	0.02	200
1 (0.454)	0.002	20

(iii) The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

* * * * *

Reportable quantity (RQ) for the purposes of this subchapter, means the final RQ specified for each hazardous substance identified in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

- 3. The authority citation for part 172 continues to read as follows:
- Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.
- 4. In § 172.101, revise “Appendix A to § 172.101—List of Hazardous Substances and Reportable Quantities” to read as follows:

§ 172.101 Purpose and use of the hazardous materials table.

* * * * *

Appendix A to § 172.101—List of Hazardous Substances and Reportable Quantities.

Refer to 40 CFR 302.4 to see the list of hazardous substances and their reportable quantities (RQs) in Table 302.4. The list includes an Appendix B to § 302.4 for radionuclides and their adjusted RQs.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

- 5. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 6. In § 173.29, revise paragraph (h) to read as follows:

§ 173.29 Empty packagings.

* * * * *

(h) A package that contains a residue of a hazardous substance, Class 9, that does not meet the definition of another hazard class and is not a hazardous waste or marine pollutant, may remain marked, labeled and, if applicable, placarded in the same manner as when it contained a greater quantity of the material even though it no longer meets the definition in § 171.8 of this subchapter for a hazardous substance.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,
Administrator, Pipeline and Hazardous Materials Safety Administration.

49 CFR Parts 171 and 173
[Docket No. PHMSA–2025–0101 (HM–268M)]
RIN 2137–AG15
Hazardous Materials: Adoption of Department of Transportation Special Permit 21287

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).
ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S Department of Transportation (DOT) special permit (SP) 21287 to streamline the transportation of refrigerating machines—including common household appliances like refrigerators, window-mounted air-conditioning units, and dehumidifiers—that contain small quantities of certain low flammability refrigerant gases.

DATES: *Effective date:* This final rule is effective August 19, 2026.

Incorporation by reference date: The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of August 19, 2026.

The incorporation by reference of certain other material listed in the rule

was approved by the Director of the Federal Register as of January 1, 2004.

FOR FURTHER INFORMATION CONTACT:

Candace Casey, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202-366-8553, candace.casey@dot.gov.

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 21287 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) by revising 49 CFR 173.307(a)(4) to provide an exception for the transportation of refrigerating machines containing certain low flammability refrigerant gases (*i.e.*, refrigerants). This revision expands the existing exception to include refrigerating machines that use a refrigerant that is a Category 1B refrigerant as specified in the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals (which PHMSA is incorporating by reference) or a Group A2L refrigerant as specified in American National Standards Institute/American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ANSI/ASHRAE) Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34–2024, “*Designation and Safety Classification of Refrigerants*,” which refers users to the list of flammable gases eligible for this exception.

B. Does this action apply to me?

Effective 15 days after publication of this final rule, offerors and carriers of affected refrigerating machines may begin to transport these products in accordance with the exceptions in 49 CFR 173.307 without expending the time and resources associated with obtaining special permit.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to provide relief to stakeholders by allowing the transportation of refrigerating machines containing certain flammable gases by adopting the provisions in DOT SP 21287. This change facilitates the transportation of refrigerating machines affected by the American Innovation and Manufacturing (AIM) Act, which

required manufacturers to transition away from certain hydrofluorocarbon (HFC) refrigerants and replace them with refrigerants that were regarded as less damaging to the environment.¹ This action allows the HMR to account better for the more widespread use of certain refrigerants following the new requirements imposed by the AIM Act. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Incorporation by Reference Discussion Under 1 CFR Part 51

According to the Office of Management and Budget (OMB), Circular A–119, *Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities*, government agencies must use voluntary consensus standards wherever practical in the development of regulations.

PHMSA currently incorporates by reference into the HMR all or parts of numerous standards and specifications developed and published by standard development organizations (SDO). In general, SDOs update and revise their published standards every two to five years to reflect modern technology and best technical practices. The National Technology Transfer and Advancement Act of 1995 (NTTAA; Pub. L. 104–113) directs Federal agencies to use standards developed by voluntary consensus standards bodies in lieu of government-written standards whenever possible. Voluntary consensus standards bodies develop, establish, or coordinate technical standards using agreed-upon procedures. OMB issued Circular A–119 to implement section 12(d) of the NTTAA relative to the utilization of consensus technical standards by Federal agencies. This circular provides guidance for agencies participating in voluntary consensus standards bodies and describes procedures for satisfying the reporting requirements in the NTTAA. Accordingly, PHMSA is responsible for determining which standards currently referenced in the HMR should be updated, revised, or removed, and which standards should be added to the HMR. Revisions to materials incorporated by reference in the HMR are handled via the rulemaking process, which allows for the public and regulated entities to provide input.

During the rulemaking process, PHMSA must also obtain approval from the Office of the Federal Register to incorporate by reference any new materials. The Office of the Federal Register issued a rulemaking that revised 1 CFR 51.5 to require that an agency detail in the preamble of a notice of proposed rulemaking (NPRM) the ways the materials it proposes to incorporate by reference are reasonably available to interested parties, or how the agency worked to make those materials reasonably available to interested parties.²

In this final rule, PHMSA is incorporating by reference ANSI/ASHRAE Standard 34–2024, “*Designation and Safety Classification of Refrigerants*,” copyright 2024, including addenda approved through August 30, 2024,” ANSI/ASHRAE Standard 34–2024 establishes a uniform system for assigning unambiguous reference numbers, safety classifications (based on toxicity and flammability), and refrigerant concentration limits to refrigerants. This document is available for viewing at: <https://www.ashrae.org/technical-resources/standards-and-guidelines/read-only-versions-of-ashrae-standards>. PHMSA is also incorporating by reference Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition, ST/SG/AC.10/30/Rev.9 (2021). This document serves as the international standard for defining and classifying chemical hazards (physical, health, and environmental) and communicating safety information through harmonized labels and Safety Data Sheets (SDS). ANSI/ASHRAE Standard 34–2024 and the Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition can be reasonably obtained by interested parties through the applicable publisher contact information listed in § 171.7.

ANSI/ASHRAE Standard 15–1994 is referenced in §§ 171.7 and 173.307 of this document but was previously approved for those sections.

III. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published an NPRM, cited as *HM–268M*, to gather feedback on adopting the provisions of DOT SP 21287 into the HMR.³ Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

¹ 42 U.S.C. 7675 (2020).

² 79 FR 66278 (Nov. 7, 2014).

³ 90 FR 28548 (Jul. 1, 2025).

TABLE 1—COMMENTERS TO THE NPRM

Commenter name	Docket No.
American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE)	PHMSA–2025–0101–0003
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0101–0004
Dangerous Goods Advisory Council	PHMSA–2025–0101–0005

All commenters were supportive of the proposed amendment to facilitate the streamlined ground transportation of refrigerating machines containing low flammability gases. However, some commenters had additional questions or suggestions related to the NPRM proposal.

First, ASHRAE expressed support for the proposed amendments but requested that PHMSA incorporate by reference the 2024 editions of both ANSI/ASHRAE Standards 15 and 34 in the relevant sections of the HMR. With respect to ANSI/ASHRAE Standard 15, *Safety Code for Mechanical Refrigeration*, PHMSA did not propose any changes to its current incorporation by reference and—therefore—the suggested change is considered beyond the scope of this rulemaking. However, PHMSA will consider this recommendation in a future rulemaking. With respect to ANSI/ASHRAE Standard 34, though the NPRM did not propose to incorporate by reference the 2024 edition, PHMSA agrees with ASHRAE that using this more recent version to include additional refrigerants that would otherwise not be eligible if the 2019 edition were incorporated by reference is appropriate. Moreover, PHMSA sees no safety concern with incorporating by reference the 2024 edition of ANSI/ASHRAE Standard 34 (instead of the proposed 2019 edition) for determination of eligible refrigerants.

Second, while supportive of the proposed amendments, COSTHA notes the provisions are limited to highway and rail only, and do not facilitate the transport of refrigerating machines to remote areas in the United States (*i.e.*, certain areas in Alaska) where air service is the only practical means of transportation. Similarly, COSTHA asked whether PHMSA intends to allow—or continue to restrict—vessel transportation under the exceptions for refrigerating machines. PHMSA recognizes that continuing to limit eligibility for exceptions to transportation by highway and rail may complicate the logistics of transporting these items to remote areas. However, PHMSA notes that, given the limited experience authorizing these items for vessel and air transportation, it is more appropriate at this time to continue

permitting such transportation on a case-by-case basis through special permits, rather than codifying a general provision applicable to all modes. Once PHMSA gets more experience with these non-ground modes, we may consider this recommendation in a future rulemaking.

For these reasons, PHMSA is revising 49 CFR 173.307 to except from the HMR refrigerating machines containing up to 20 kg (44 pounds) of a flammable, non-toxic gas, classified as Category 1B in accordance with GHS or classified as an A2L refrigerant as specified in ANSI/ASHRAE Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34 into 49 CFR 171.7 and referencing it in 49 CFR part 173.307.

One additional editorial note. At the proposed rule stage, PHMSA inadvertently omitted a cross-reference to 49 CFR 173.307 for the GHS Classification and Labelling of Chemicals publication in 49 CFR 171.7(dd)(3). Importantly, PHMSA included the full intent in the preamble and the substantive proposed regulatory text was correctly placed in 49 CFR 173.307. This text would add GHS criteria for Category 1B as an alternative criterion for eligibility for exception. PHMSA therefore asserts this additional editorial cross-reference revision to 49 CFR 171.7(dd)(3) is within the scope of this final rule and does not create a substantive amendment.

IV. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop

regulations that “impose the least burden on society.”⁴ In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.”

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for shippers of refrigerating machines by allowing for their transportation without the need for a special permit. Those cost savings may also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs. In addition, the final rule will produce cost savings for the Federal Government, hence taxpayers, due to

⁴ 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); see also DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

the reduction of special permit applications that would otherwise need to be processed by PHMSA personnel.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.⁵ PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”⁶

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).⁷ The President has declared a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia* the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a “significant energy action” under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁸ Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has therefore not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22,

2009.⁹ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are “substantively the same” as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses a covered subject item listed in Paragraph (1) above and would preempt State, local, and Tribal requirements not meeting the “substantively the same” standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to complete a Final Regulatory

Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. Executive Order 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.¹⁰ PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration’s procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration’s CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA’s

⁵ 90 FR 9065 (Feb. 6, 2025).

⁶ 90 FR 10583 (Feb. 25, 2025).

⁷ 90 FR 8433 and 90 FR 8353 (Jan. 29, 2025).

⁸ 66 FR 28355 (May 22, 2001).

⁹ 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

¹⁰ 67 FR 53461 (Aug. 16, 2002).

Categorical Exclusion Determination memo for this action is available on PHMSA's website.¹¹

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).¹² E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing "substantial direct compliance costs" or "substantial direct effects" on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires PHMSA to provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137-0051:
Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 12.

Decrease in Annual Responses: 12.

¹¹ DOT, *Implementing Procedures for Considering Environmental Impacts* (Aug. 28, 2025), available at <https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures>.

¹² 65 FR 67249 (Nov. 9, 2000).

Decrease in Annual Burden Hours: 17.

Decrease in Annual Burden Cost: \$0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH-12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590-0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.¹³ In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96-39), as amended by the Uruguay Round Agreements Act (Pub. L. 103-465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to

"persistent and increasingly sophisticated malicious cyber campaigns."¹⁴ PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <http://www.dot.gov/privacy>. DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at <http://www.dot.gov/privacy>.

N. National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) directs Federal agencies to use voluntary consensus standards in their regulatory activities unless doing so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specification of materials, test methods, or performance requirements) that are developed or adopted by voluntary consensus standard bodies. This rulemaking involves a voluntary consensus standard.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements, Definitions and abbreviations.

49 CFR Part 173

Hazardous materials transportation, Incorporation by reference, Training, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

¹³ 77 FR 26413 (May 4, 2012).

¹⁴ 86 FR 26633 (May 17, 2021).

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

- 2. Amend § 171.7 by:
 - a. Revising paragraph (d);
 - b. Redesignating paragraphs (g) and (h) as paragraphs (h) and (i);
 - c. Adding new paragraph (g); and
 - d. Revising paragraph (dd) introductory text and paragraph (dd)(3).

The revisions and addition read as follows:

§ 171.7 Reference material.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

- 3. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

- 4. In § 173.307, revise paragraph (a)(4)(iv) to read as follows:

§ 173.307 Exceptions for compressed gases.

(a) * * *

(4) * * *

(iv) Except when offered or transported by air or vessel—

(A) 20 kg (44 pounds) or less of a Group A1 refrigerant gas specified in ANSI/ASHRAE Standard 15 (IBR, *see* § 171.7 of this subchapter); or

(B) 20 kg (44 pounds) or less of a flammable, non-toxic refrigerant gas in Category 1B as classified by the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals (IBR, *see* § 171.7 of this subchapter), or a Group A2L refrigerant gas as specified in ANSI/ASHRAE Standard 34 (IBR, *see* § 171.7 of this subchapter); or

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171 and 173

[Docket No. PHMSA–2025–0102 (HM–268N)]

RIN 2137–AG16

Hazardous Materials: Adoption of Department of Transportation Special Permit 21379

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S. Department of Transportation (DOT) special permit (SP) 21379 to streamline the transportation of refrigerating machines

and components containing certain low flammability refrigerant gases.

DATES:

Effective date: This final rule is effective September 3, 2026.

Incorporation by reference date: The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of September 3, 2026.

The incorporation by reference of certain other material listed in the rule was approved by the Director of the Federal Register as of January 1, 2004 and December 28, 2020.

FOR FURTHER INFORMATION CONTACT:

Candace Casey, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, candace.casey@dot.gov.

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 21379 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) by revising 49 CFR 173.306 to streamline the transportation of refrigerating machines containing certain low flammability refrigerant gases (*i.e.*, refrigerants). This revision allows up to 5,000 lbs. of low flammability refrigerants in refrigerating machines if they are a Category 1B refrigerant as specified in the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals (which PHMSA is incorporating by reference) or a Group A2L refrigerant as specified in American National Standards Institute/American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ANSI/ASHRAE) Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34–2024, *Designation and Safety Classification of Refrigerants*, which refers users to the list of flammable gases eligible for this exception.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, offerors and carriers of affected refrigerating machines may begin to transport these products in accordance with the exceptions in 49 CFR 173.306 without expending the time and resources associated with obtaining a special permit.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to
